

About more troubleshoots

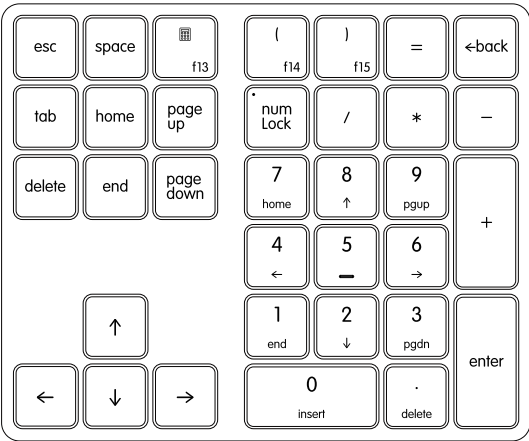

Q:Does this work in an apple Macbook Pro?
A: Yes, the keypad is designed with OS identification IC, which can automatically adjust some key functions to match Windows or Mac operating system. F13-F15 is customizable as your preferred shortcuts via system setting in Mac OS. Calculator, left parenthesis and right parenthesis functions only work in Win system.

Q:Can this numpad connected by Bluetooth?
A:No, this numpad is wired,only through a USB-C connection. Connect your number pad into any USB Type C port on your computer.

Q:How long is the cable?
A:It's designed for a laptop so not intended to be long ,the cable is 2.62ft long.

Q:Can this keypad send alt codes when used in conjunction with a computer keyboard?
A: The keypad doesn't work to input unicode or ASCII character by using ALT-XXX format, only works for entering straight numbers.
