What's in the Box?

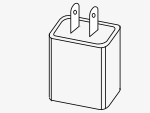

1 LED Light Strip

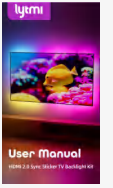

2 HDMI 2.0 Sync Stick

3 Power Cable

4 AC Power Adapter

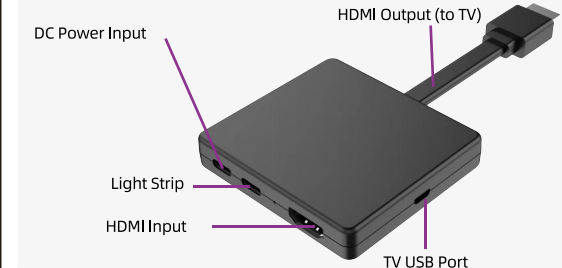

5 User Manual

Description

The Lytmi TV backlight is controlled by the HDMI 2.0 sync Stick, which detects relevant RGB and intelligently inputs them into the algorithm for automatic color reproduction, creating much more complex and creative lighting patterns. The HDMI 2.0 sync Stick is slim and sleek, supporting a maximum resolution of up to 4K@60Hz. Brace yourself for an epic adventure as the lights bring color and rhythm to your surroundings for a more enjoyable experience. Furthermore, a variety of additional lighting synchronization options are available, forming an immersive ecosystem for your personal home theater.

HDMI2.0 Sync Stick Features

DC Power Input

HDMI Output (to TV)

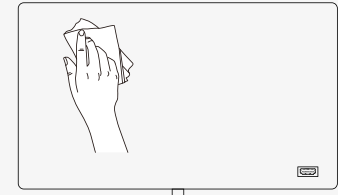

Light Strip

HDMI Input

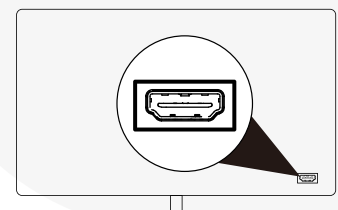

TV USB Port

Installation

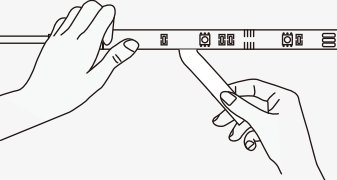

1. Clean the back of your TV.

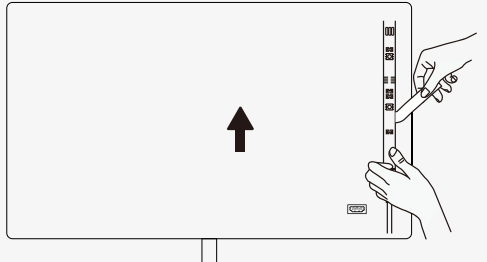

2. Locate HDMI ports.

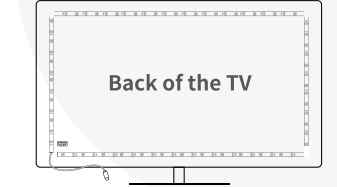

3. Remove the adhesive tape.

4. Stick the LED strip lights. ALWAYS start from the BOTTOM. It is recommended to install the light strip in the position close to the HDMI port on the television.

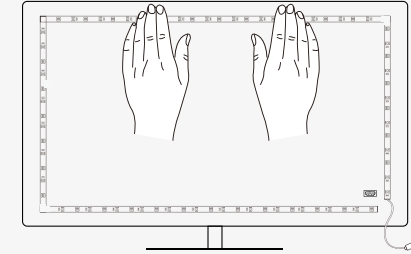

5. If the HDMI port of TV is on the left, stick the LED strip lights as shown in the picture below.

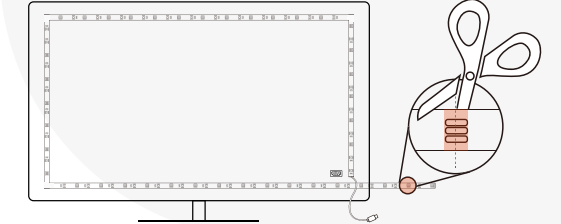

Back of the TV

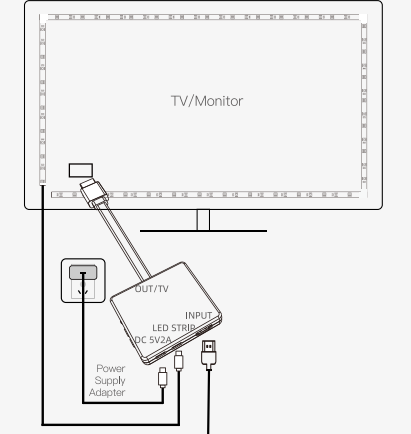

6. Firmly press the light strip into place.

7. If the LED strip is too long, it can be cut to fit the size of your television.

8. Connect the HDMI 2.0 Sync Stick to the TV (the stick output plugs into the TV HDMI port).

Notice

1. The HDMI 2.0 Sync Stick supports up to 4K/60HZ sources

2. We recommend storing the HDMI 2.0 Sync Stick in a dry, well-ventilated area away from damp or humid areas.

3. It is normal for the HDMI 2.0 Sync Stick to get warm after a few hours of usage.

4. The light strip can be cut.

5. Risk of Shock-Disconnect power before installation.

6.The HDMI 2.0 Stick supports :
HDMI-CEC(bypass), HDMI-ARC(bypass), Dolby atmos, Dolby vision(LLDV format), HDR10, HDR10+, for almost all the major TV brands such as Samsung TV, Sony TV, etc.

Specifications

Brand	Lytmi
Input Current	2A (Max.)
Input Voltage	DC 5V
Operating temperature	32°F~104°F (0°C~40°C)
Operating humidity	5% < H < 55% (Non-condensing)

Troubleshooting

1. Unable to use sync mode

Make sure the HDMI2.0 Stick is connected to an external HDMI input device, such as a game console or TV box. Otherwise, the sync mode function cannot be used.

2. The strip light does not illuminate/some LED do not illuminate

Check all wired connections. Before turning on the strip light, make sure it is securely plugged into the Type-C LED port.

If you have any questions about the device or if something is missing or damaged in the package, feel free to contact our support team with your order number.
