

# HL-103

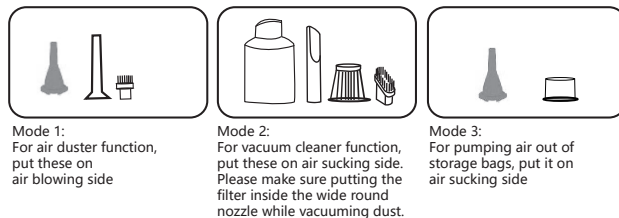

## 3 IN 1 VACUUM CLEANER

### AIR DUSTER/VACUUM CLEANER INSTRUCTIONS

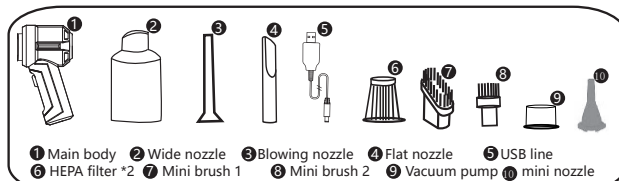

#### Product introduction

Q: How can I know which side is for blowing/sucking?  
A: Remove all accessories, turn on the switch, you can feel the air flow by hands

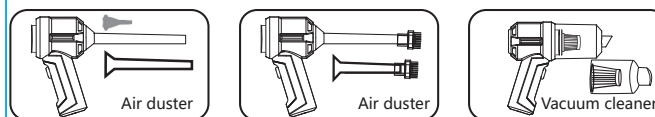

#### Parts

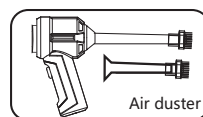

#### Instructions of Electric Compressed Air Duster

1. Ensure that the air duster has electricity.
2. Open the air duster switch "ON" key, you can start to work.
3. According to the need to clean the dust on different occasions, the replacement of different suction mouth, the better effect.
4. Unplug the HEPA filter from dustbin to clean the filter net.
5. When rechargeable battery is charged, the USB lamp shows red for normal charge and green is full.
6. The charging time is about three to four hours, full of about 25 minutes of sustainable use.
7. If the motor appears fast and slow alarm, this is because the battery is not charged in time to charge.
8. The filter element can be washed with water and needs to be dried before being installed in the vacuum cleaner.

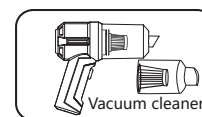

### HOW TO ASSEMBLE ALL ACCESSORIES?

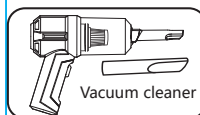

Put the blowing nozzle on main body, turn on the switch. Take it to blow everything you want! Keyboard, computer, laptop, electronics, desktop, car seat and so on.

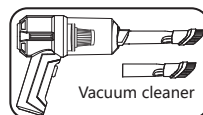

Put the mini brush (little round one) on blowing nozzle, then you can brush item's surface and clean stuffs thoroughly while blowing now.

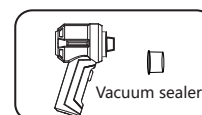

Put the HEPA filter inside wide nozzle first, then install the wide nozzle on main body. This wide nozzle for sucking up chunk items, suck as crumbs, debris, nuts, coffee beans... (Please make sure you put the filter in wide nozzle before start vacuuming)

Put the flat nozzle on wide nozzle for cleaning hard to reach corners, crevices. Like the crevices of keyboard, sofa, car seat...

Put the mini brush (short flat ones) on long flat vacuum nozzle. Then you can brush the keyboard keys, computer tower fans or other electronics while vacuuming now!

Put the vacuum pump nozzle on main body, then take it to pump air out from storage bags, like to save space for your suitcase when you take it to travel, or pump air out from food compression bags and so on.

#### Parameters

| NAME       | Voltage | Power | G.W        | Dust cup capacity |
|------------|---------|-------|------------|-------------------|
| Air duster | 7.4V    | 120W  | About 290g | 0.4L              |

#### Disassembly and cleaning

1. Rotate the dust bin anticlockwise to remove the dust bin from the fuselage.
2. Take out the filter screen from the dust bin and pour the garbage into the garbage can
3. If necessary, the dust cup can be cleaned with a slightly wet rag or disposable paper towel, and the filter screen can be washed with water. After washing, it must be completely dried and reused.
4. To reinstall the dust bin, put the HEPA filter screen into the dust bin, and rotate and tighten it in the opposite direction according to step 1.
