MODES

Mode button serves to switch modes of the speaker: Bluetooth, radio FM and input devices, i.e. micro USB, Micro SD and AUX.

BLUETOOTH MODE

(1) Power on/off

Switching the power on/off button to turn the speaker on/off.

(2) Bluetooth connection

The PA speaker's device name is LR69Q68. When you enable the Bluetooth function in your bluetooth device like phone or tablet, search the device name "LR69Q68". Select this device name to pair it with your bluetooth device. When the Bluetooth pairing is successful, you will hear a "Ding-dong" sound. Then you can play the music. In case of unsuccessful pairing, disable the Bluetooth function and enable it again. If you turn off the PA speaker, but the Bluetooth on your smart phone remains active, when you power on the PA speaker again, the Bluetooth will be connected automatically.

RADIO MODE

To activate radio FM mode, switch the loudspeaker on. Use Mode button to select Radio. To search for available radio stations automatically, click and hold ►||. Stations will be saved automatically. To switch stations, click ◀◀ or ▶▶. To start searching radio stations manually, click and hold ◀◀.

AUX MODE

To activate AUX mode, switch the loudspeaker on, use Mode button to select AUX. Once you have selected this mode, sound will be played through AUX port.

SD MODE

To activate SD mode, switch the loudspeaker on, use Mode button to select SD. Once you have selected this mode, sound will be played from previously installed micro SD memory card.

Microphone set up instruction

This wireless PA speaker comes with a UHF microphone. The UHF frequency is 902-928MHz, FCC compliant. The wireless receiver is built inside the speaker, so you can use the microphone once the batteries are installed and microphone and speaker are powered on. You can also use additional wireless microphones by plugging the wireless receiver into the Mic Input 1 (#9 #10 in the speaker control panel) in the speaker.

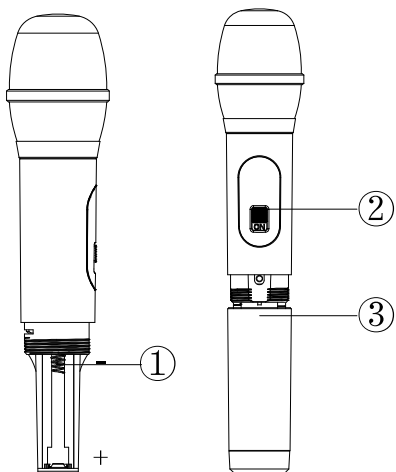

Here are the set up steps for the microphone that comes with the speaker.

1. Install the AA battery in the correct direction. Battery level indicator is displayed in the microphone LCD screen. Change the battery when the battery level is low.
2. Power on/off the microphone by long pressing the power button for about 3 seconds.
3. Change the microphone volume by pressing the microphone volume knob #12 in the left of speaker control panel.
4. Change the echo if necessary. The dial for the echo control is in the top of the speaker (#14 Echo dial in the speaker control panel).
5. Change the frequency in case of interference:
 - ① Power on the microphone.

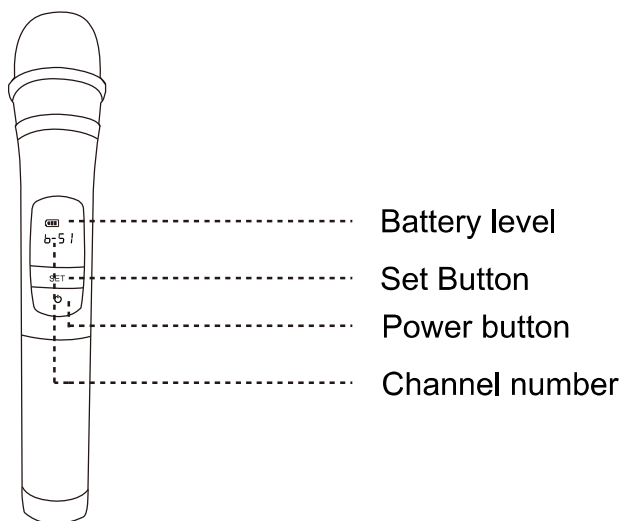

- ② Long press the SET button until you see the LCD screen starts to flash.
- ③ Before the LCD screen stops blinking, short press the SET button to change the frequency, wait for about 5 seconds until the screen stops blinking. The receiver inside the speaker syncs with the microphone at the selected frequency. There are 40 channels in each microphone. For A microphone, the screen reads A-01 ~ A-40 and for B microphone, it reads B-41 ~ B-80. For Q68 with single microphone, the microphone is B Mic and it reads B-41~B80.

6. When multi Q68 and mics are used at the same time, in order to avoid interference between each microphone, please pair and lock the Q68 speaker with its correspondent mics manually. Here is how:

- ① Power on one of the mics and power on one Q68 speaker.
- ② Hold and press the SET button and the Power button for about 3 seconds.
- ③ When you see a LOCK icon  lights up in the LCD screen, this mic is locked with this Q68 speaker.
- ④ Repeat the above process to pair and lock other mics.
- ⑤ Make sure each microphone works at a different frequency number to avoid interference with each other.

1. Battery installation position (note the positive and negative poles)
2. Microphone switch
3. Battery cover (tighten clockwise, loosen counterclockwise)
