X3 Auto Version

Electric Mason Jar Vacuum Sealing Machine Manual

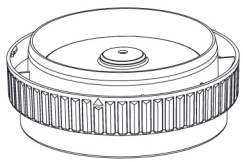

Please read this manual carefully before use

Product introduction

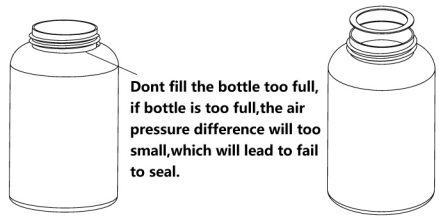

Host:
(Suitable for 3.4-inch /85mm wide mouth Mason jar)

Conventional port converter:
(Suitable for 2.7-inch /68mm Mason jar with regular mouth)

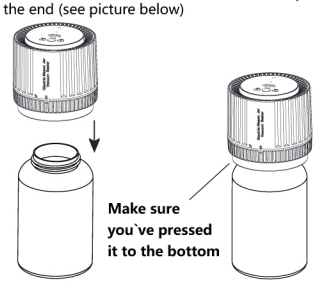

Instructions for use

1，Before use, please select the appropriate sealing machine according to the diameter of the Mason jar (wide mouth/ regular mouth).
2，Fill the food in the mason jar (Please reserved some space,Fully fill will affect the sealing effect)
3，Wipe the bottle mouth and sealing cap to make, no dirt or liquid residue
4，Align sealing cap with bottle mouth (see image below)

Dont fill the bottle too full, if bottle is too full,the air pressure difference will too small,which will lead to fail to seal.

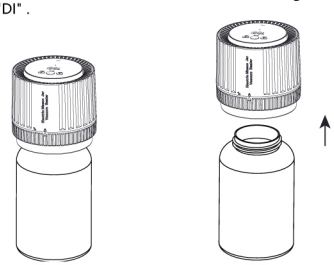

5，Align the sealer with the mouth of the bottle and press firmly down to the end (see picture below)

Make sure you`ve pressed it to the bottom

Tips:
For first time use, please long press the "ON" button for about 3 seconds to activate the host.After the host is activated, next time use just click the "ON" button once to work. no need to long press 3s.

Automatic mode:
① Press the "ON/OFF" button to start the machine. At this time, the Auto blue indicator on the top will light up. When the air in the Mason jar has been emptied, the machine will automatically stop working, and the sealing machine can be taken off after hearing "DI";;
② Press the left/right button, the machine will automatically countdown work 30S/60S . You can take off the sealing machine when you hear "DI" .

Charging and remaining Battery indication:

1, The remaining battery will be on the screen after each use, In standby mode,press and hold" ON" key to view it;
2，In standby mode,press and hold "ON" key,the screen don`t light up and the green chaging indicator flashes,which means the machine is out of battery and needs to be charged
3, The green charging indicator will flash all the time during the charge till it is full.

How to Remove "Conventional Port Converter"

Please rotate the "conventional port converter" clockwise, and remove it after hearing a "click" (see the picture below)

Product specification

Charging power:	Type-C 5V/1A
Rated power:	＜5W
Material:	ABS、Silicone
Weight:	348g
Dimension:	105*105*97
What in the box:	Machine*1
	Regular port converter*1
	Type-C Charging cord*1
	Manual*1 Bottle opener *1
	Wide-mouth cover *5
	Regular mouth cover *5

Troubleshooting

Wide mouthed Mason jars cannot be sealed:
1. Check for any dirty or liquid on the bottle mouth and lid
2. Check if the sealing rubber rings of wide port are offset
3, when using, check whether the sealer is pressed to the bottom, if you are not sure, please try to align and press again until the sealer is pressed to the bottom
4, check whether the jar is too full, please make sure that the food does not exceed the thread line to get a better sealing effect

Conventional mouth Mason jars cannot be sealed:
1, please check the above 4 points firstly and try again
2, check that the regular port converter is fully inserted into the sealing rubber ring of the wide port . If you are unsure, repeat the action to make sure it is done as required

Warm reminder

1, When use, it is necessary to press the sealing machine with more force to ensure that the sealing machine can tightly fit onto the bottle cap;
2, When the battery is low, please charge in time;
3, Please do not use steel balls, abrasive cleaners or corrosive liquids (such as gasoline, acetone, etc.) to clean the machine;
4, Do not put the host into water or other liquids, do not clean the product in running water, so as to avoid damage to the host;
5, This product is not waterproof, if the water sputter on the machine, please wipe in time;
6,Press and hold "ON" key about 5 seconds to enter the manual mode. It will continuous operate for 150 seconds unless you click "ON" key to stop it;
7, Please do not overfill the linquid food in the glass jar. Fill fully will cause too small air pressure difference and the mason jar can not be properly sealed.
