Brief Introduction

Full spectrum LED Plant Grow Light is the newest trend for indoor plants. Advanced LED grow light provide broad spectrum of light of wavelength 380nm~780nm , similar to sunlight. The red and blue LED lights are best for plant growth. They are suitable for all stages of plant growth. This is a revolutionary step for LED grow lights. Full spectrum led grow light covers 380nm~780nm (similar to sunlight)

Spectrum

The main part of the whole spectrum light is blue (peak 460nm) and red (peak 660nm), and warm white (3000k), the whole spectrum is 380~780nm which supplies the most efficient wavelength to enhance photosynthesis performance

Item Type	LED Grow Lights	Rated Voltage	AC110V-240V
Rates Power	30W	Wavelengths	380~780nm
Working Temperature	-20°C-40°C	Product Size	245*380mm
Product Weight	630g	Packing Size	340*180*80mm

Function setting:

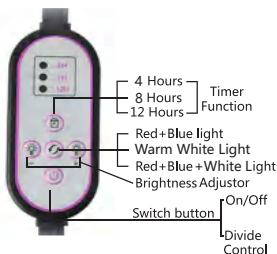

1. Working voltage: AC110-240V

2. Timing function button: first press, start 4H timing function, "4H" blue indicator light will flash; Press the second time to start the 8H timing function, and the "8H" blue indicator lights will flash; Press the third time will activate the 12H timing function and the "12H" blue indicator light will flash.
