# TREBLAB

Z2

Wireless headphones

How to pair with Windows 7/8/8.1/10 for phone calls

Please read this guide before using the product with Windows systems

The **Windows** system divides connected headphones with built-in microphone into two separate devices (modes): **Hands-free** (for calls) and **Stereo** (for music). The **Z2** headphones are designed in such a way that if there is no sound coming through the **Stereo** mode (as these headphones are made mainly for music listening) they will turn off automatically in **10 minutes** for the battery saving purpose. So, to disable this battery saving feature, it is necessary to turn off the **Hands-free** mode and use it in the **Stereo** mode only. Please follow the instructions below to do so.
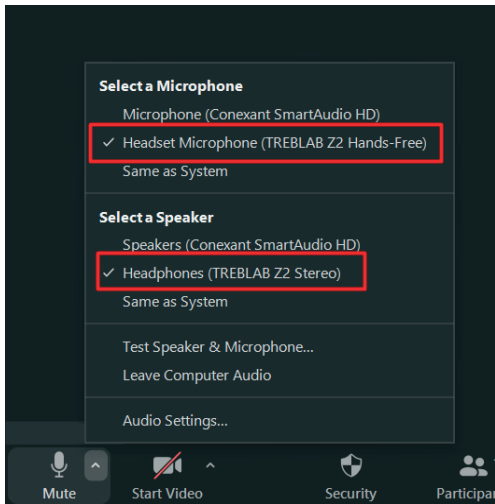

For Windows 7/8/8.1

1) Having successfully paired the **TREBLAB Z2** headphones to your **PC**, right click on the **Volume icon** on the task bar and select **Playback devices**:

2) In the opened window, **right click** on the **TREBLAB Z2 Hands-Free** and select **Disable**, leaving **TREBLAB Z2 Stereo** as the default device:
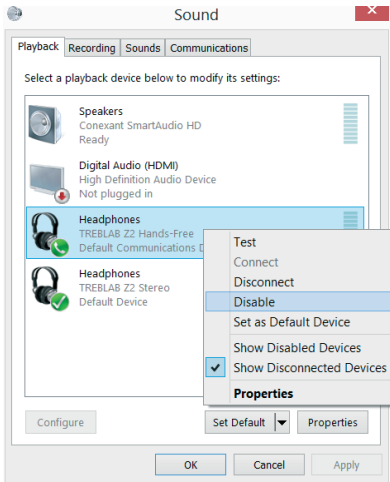

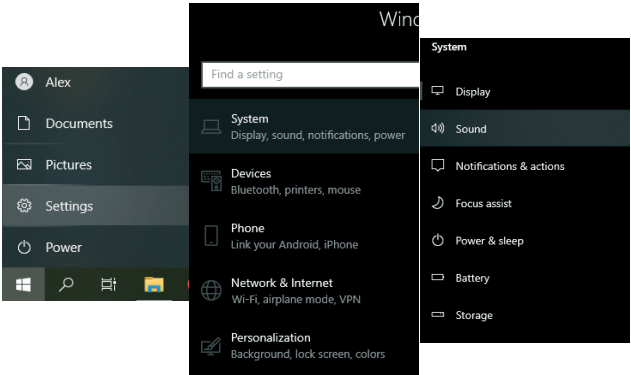

3) When using Zoom or another application, please make sure to select the correct **Input/Output** devices:

For Windows 10

1) Having successfully paired the **TREBLAB Z2** headphones to your **PC**, go to **Start** => **Settings** => **System** => **Sound**:

2) Scroll down and find the option **Sound Control Panel:**

Test your microphone
