

Quick Start Guide

Getting started with Raven Scanner

Claim Your **FREE** Product - visit Raven.com/freeproduct

1 What's in the box:

Scanner

Rear Input Tray (optional)

Replacement Pad Module (After 10,000 scans)

AC Power Adapter & Cable
USB Power Cable

Micro USB Cable

2 Install the scanner:

2.1 Remove all protective tapes and wrapping from the inside and outside the scanner.

2.2 If you plan to feed documents using the rear input tray (not required), attach the rear input tray to the back slot of the scanner as indicated. If not, only use the ADF and/or the front input tray.

2.3 Assemble the power plug of the AC power adapter by sliding on, then power by the AC power adapter cable, or by the USB power cable. Plug the round power cable tip into the power jack of your scanner. Insert the other end to an appropriate power outlet for AC power, or USB port for USB power.

2.4 Press the Power button on the front panel and wait for the LED indicator to stop flashing.

2.5 Connect the micro-USB end of the USB cable into the micro-USB port on your scanner. Plug the rectangle end to the USB port on your computer.

3 Installing Raven Desktop and Scanner Drivers:

3.1 Visit Raven.com/Desktop to download Raven Desktop and drivers to your Mac or PC.

3.2 Choose the Compact Scanner in the installation wizard.

3.3 Choose the USB connection method to your scanner, using the USB cable included in the box.

4 Scanning with Raven Desktop:

4.1 Home screen shows available workflows, scan settings and destinations. Create custom workflows by clicking the **+** button.

4.2 Click the **ADVANCED** button to choose additional scan settings.

4.3 Set up and manage destinations by clicking the **MANAGE** button. Click the **+** button to save to folders on your computer.

5 Three ways to scan:

5.1 To use the Automatic Feeder, unfold the document feeder and its extension and raise the paper guide to hold your document. Load the stack of document Facing Down with the top of the pages pointing into the feeder and verify that the paper guides are aligned with the edges of the stack.

5.2 To scan a single page document or ID card with the front input tray, open the cover of the front input tray and load your single-page document to the front input tray with the top of the page pointing to the front input tray. Load documents facing up and center your document with the paper size marks.

5.3 To scan a single page document or ID card with the rear input tray, load your single-page document face down, top edge first into the rear feed tray, align it to the paper size mark, and gently push document into the feed tray as indicated. After scanning, the document will be ejected to the same side of the input tray.

6 Tips for seamless scanning:

6.1 To avoid occasional multi-feeds or paper jams, please fan your documents by holding both ends of the documents and fanning them a few times. Align the top edges in a step-like pattern before feeding them into the scanner.

6.2 Only one sheet of paper is allowed to load in the front paper tray. The automatic feeder can support up to 20 sheets.

6.3 Remove items such as staples, paper clips and sticky notes before feeding into the scanner to prevent damage.
