

WATER BOTTLES

TECHNOLOGY

EASY TO CARRY

Flexible bail handle for comfortable carrying, quick attachment and filling in a lake or river.

NEW FLUX™+ 1.5L FAST & SAFE FILTRATION

42mm Integrated filter removes bacteria and protozoa from approximately 1,500 liters of water at a rate of >1L per minute.

DUAL LAYER FILM CONSTRUCTION

New molded hard top and dual layer walls enable the bottle to stand upright, RF-welded soft walls provide a flexible grip.

POCKET SIZED

FLEXIBLE BOTTLE DESIGNS

COMPRESSIBLE

Lightweight, flexible and minimal designs allow you to roll or twist bottles down for space saving storage in your pack.

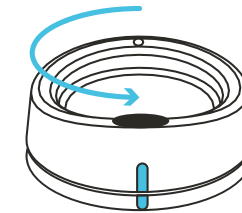

SMOOTH FLOW TWIST CAP

180° turn delivers the perfect flow rate for a glasslike drinking experience, twist back to close for leakproof transport

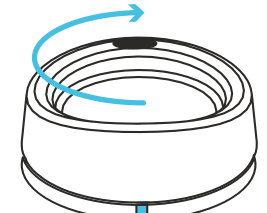

BAIL HANDLE

Flexible TPU bail handle is comfortable to carry, lightweight and nearly indestructible

OPEN

CLOSE

TO DRINK

Align the colored indicator on the cap with matching colored indicator on the bottle for a smooth drink-through experience.

TO CLOSE

Twist cap half rotation clockwise until tight, creating a leak-proof seal

**RECON® BOTTLES
MADE FROM
50% RECYCLED
CONTENT**

* Recycled content is achieved through allocation of a third-party recycled plastic using a mass balance method

SLENDER BOTTLE SHAPE

Designed to fit in your backpack pocket, but versatile enough for everyday use - fits in most cup holders.
