

Thank you for purchasing your DLux DOUBLE WALLED GLASS CUPS

Your DLux double walled cups are unique handmade products that are crafted via a complex creation process. Just like your elegant wine glasses, be gentle with them. They are made of the finest quality borosilicate glass making them thin, light, elegant and therefore fragile. **We strongly recommend you read and follow the care and use instructions below to keep the cups beautiful for years.**

Care and use instructions

INITIAL INSPECTION

1. Upon reception, please take the time to inspect your cups for any cracks or missing silicone seal. If you notice any issues, do not use the cups and please contact us directly at support@mydlux.com

WASHING

1. Wash thoroughly before your first use. Use a mild detergent for washing. Do not use scouring pads, steel wool or abrasive cleaners.
2. Handwashing is highly recommended. However, it is safe to put the cups in the dishwasher under a normal cycle, in the top rack.

CAREFUL USAGE

3. Take extreme caution if using a metal spoon as it could crack the glass. Wooden or plastic spoons are highly recommended.
4. Never drop ice cubes in an empty cup, or cups could crack. Always fill the cups with liquid first.
5. Avoid sudden extreme temperature changes. Cups can shatter when exposed to rapid temperature/pressure changes.
6. Never place cups on a heat source, such as a gas stove, stovetop or in microwave.

CAUTION

7. Caution required: Due to the double wall insulation design, the outside walls will feel cool to the touch, but the contents can be very hot.
8. Not intended for chemicals storage or industrial use. Home use only.

DLux®
