Arlo Go Quick Start Guide

What's in the box

Arlo Go camera

**Rechargeable
battery**

**Outdoor power adapter
(varies by region)**

**Arlo Go
wind bracket**

**Arlo Go
USB port cap**

Mount and screws

**Synthetic
grease**

Introducing Arlo Go

Arlo Go is designed to connect to the Arlo mobile network. Connecting to the camera through the cloud requires that you are using a compatible device and that your Internet connection is active. Coverage and service are not available everywhere.

During setup, the Arlo app uses the mobile network to find your Arlo Go camera so that you can add the camera to your Arlo account. After setup, the Arlo Go camera uses the mobile network to send recordings to the cloud storage associated with your Arlo account.

You must select an Arlo subscription plan either during the setup process or once you've used the video minutes that came with your camera. Arlo sends email and app notifications when you're getting near the end of the video minutes that came with the camera.

Note: Arlo Go cameras are shipped with SIM cards installed and activated. The SIM card comes with enough minutes of video for you to see how the camera works.

Insert the battery

1. Unlock the battery compartment by pressing and holding the latch.
2. Gently pull the battery door back to open the compartment.
3. If you plan to store video recordings on an SD card, insert the SD card now.
4. Align the battery contacts.
5. Insert the battery.
6. Close the battery door.

Get the app

Download the free Arlo app to get started.

The app guides you through installation.

Mount your camera

1. Place the wall plate and secure it with three screws.
2. Attach the camera to the wall plate.

If you're mounting the camera to drywall, be sure to use the included plastic drywall anchors.

If you're plugging in the camera outdoors

Pay attention to the weather and to power outlet safety considerations:

- You must use an Arlo Go outdoor power adapter. Do not use any other power adapter.
- Install the the wind bracket for support between the camera and the power adapter.
- Connect the Arlo Go outdoor power adapter only to a weatherproof power outlet.

Install the wind bracket

1. Remove the USB port cap from the camera by pulling firmly on the cap.
2. Slide the wind bracket onto the power adapter cable.
3. Apply a thin layer of synthetic grease around the cable connector end.
4. Connect the cable connector to the USB port on your camera and press in firmly.

Extra USB port caps are included so that you can use the camera wire-free later.

5. Press the tab on the cable connector into the bottom of the USB port.
6. Slide the wind bracket along the cable until it fits tightly against the camera and align the bracket hole with the camera screw threads.
7. Screw the camera onto the mount.

Start streaming

The Arlo Go camera uses the mobile network to send recordings to the cloud storage associated with your Arlo account.

Use the Arlo app to see your camera feed, to arm and disarm your camera, and more.
