Q/A

1.Does it have the function of the auto shut-off?

Yes, it does. The unit will shut off automatically after 4 hours.

2.How long does it take to heat the drink?

This product is mainly for keeping warm, not for boiling water quickly,so it usually takes a long time to heat your cold beverage, about half an hour to an hour or even longer to heat cold beverage.

3.Do I need to wait til 4 hours to automatically turn coffee warmer off? Or I have to unplug the power cord?

No, you only need to tap the power button three times to turn off the coffee warmer right now.

Warning tips: please put out the power plug in time after using.
