

## Paint By Numbers

**Here is a useful tip before you get started!**  
For best results, print patterns onto cardstock or glue onto cardboard.

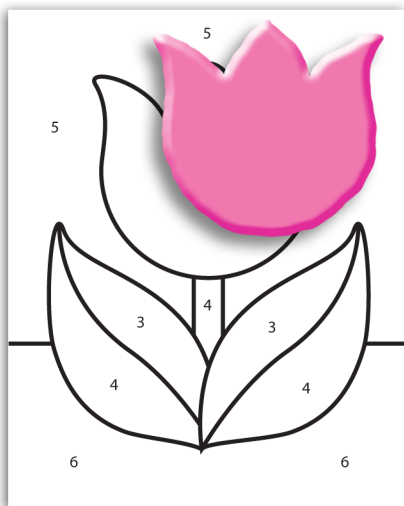

1. Using a color printer, print the paint by numbers style templates onto 8.5" x 11" paper.

2. Now you have two paint by numbers style templates to choose from.

3. Create shapes out of PLAY-DOH compound matching the blank areas of the image using the numbers as a guide.

4. Creating art with PLAY-DOH compound is as easy as 1-2-3.

**CREATIVE TIP:** To cut out more precise PLAY-DOH shapes, parents can trace the shapes using a plastic knife and help their kids add the shapes to the templates.

**Color Key:** (or use your favorite colors)
