Pair Your Phone with Smart Lock

The TTLock app home screen features a large circular button with a plus sign in the center. A red arrow points to this button. Below the button, a text note states: "The Phone needs to be within 2 meters of the Smart Lock during the Pairing process."

The "Choose Lock Type" screen displays a grid of lock options. The "All Locks" option, which includes the subtext "Scan all types of locks", is highlighted with a red box and a red arrow. Other visible options include Door Lock, Padlock, Safe Lock, Lock Cylinder, Parking Lock, Bicycle Lock, and Remote Control.

The "Nearby Locks" screen shows a list of detected locks. The first lock, labeled "M203T_2eb76a", has a red box around its plus icon, with a red arrow pointing to it. The second lock, "M203T_94e092", is shown in a grayed-out state.

Note:

1. Please wake up the keypad of the smart lock when you add it.
2. The first device which added the lock will possess administrator permission.

*If you cannot add the lock into app (all gray even if touch the keypad), please reset the smart lock or contact customer service.

Generate Passcode

Manage Passcode

Note:

The system will generate an 8-digit passcode randomly, and click "Passcode" to change it to the 4-9-digit passcode as you like. (The first random passcode should be used on the keypad once before modification)

Send eKey

Note:

The recipient should download the TT Lock app and register their own account. They can lock/unlock on the app after received the eKey.

*Home Page of the eKey Recipient

Authorized Admin

Note:

The recipient should download the TT Lock app and register their own account.

Upload Admin Passcode

Note:

- 1. The admin passcode can be changed as you like.
- 2. When all generated passcodes are deleted, you can use the admin passcode to unlock.

Settings--Auto Lock

Note:

Customize auto-lock time on the app, the smart lock will auto-lock after you **close the door**.

(It will still lock even if the door is not closed.)

Please click “save” after setting.

Settings--Touch to Unlock

Note:

Why my lock will unlock when I just input one number on keypad?

Please open the app and click the upper right 'three bars' >click 'Settings'> turn off 'Touch to Unlock'.

Customer Service
