- Great travel alarm –Hotel rooms,apartments
- 120dB alarm sounds when alarm is activated

2. Remove screw on the bottom of the door stop and battery compartment cover.
3. Fit 9V battery to the connecting leaf, making sure the terminal polarities are correct.

1. Toggle the On/Off switch to 'ON'.
2. Quickly but firmly tap down and release the metal on the cover unit. A quick siren chirp indicates proper operation. NOTE: The palm of your hand can be used to cover the alarm to reduce risk of hearing damage.
3. Toggle the On/Off switch to 'OFF'.

INSTALLATION: Insert door wedge at the base of the door as shown in the diagram, with the pointed edge under the door gap. The alarm is properly installed if the alarm sounds and the metal contact plate is depressed when the door is opened. Make sure the non-skid pads on the bottom of the alarm are in firm contact with the floor.

OPERATION

1. Toggle the On/Off switch to 'ON' to activate alarm.
2. Toggle the On/Off switch to 'OFF' to deactivate alarm.
