Disclaimer

This artwork is a technical document built with pantone colors (or compounds) recommended for printing; the choice of spot colors and their equivalences is at the discretion of the repro according to technical constraints. The laser output of this document could not serve as a print proof or color reference. The knockouts, collection nets and overlays are not taken into account. The "images" are to be considered for placement. It is essential to do work of photogravure following the constraints of the printer. For color illustrations and images, please refer to the enclosed model output (validated color printout) or document provided by the customer. Accordingly, this file is not a file ready to flash. It is mandatory to go through the stage of photogravure and ask for a contract proof (cromalin, iris or testing).
