

Material Instruction

English

1. Cutting Mat Introduction

Cutting Mat

Common Types of Applicable Materials

Vinyl, Heat Transfer Vinyl

① The size of the mat included is 4.5*6.5 in (11.43*16.51cm)

- 01** Before use, remove the protective film of the mat and keep the film carefully.

- 02** After use, reapply the protective film to it for more reuse.

① Change the mat when it is not adhesive anymore.

2. Material Types

Liner
thicker and printed

Cutting surface
glossy

Smart adhesive vinyl

① Works without the cutting mat

Liner
matte

Cutting surface
glossy

Vinyl

① Works with the cutting mat

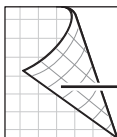

Liner
glossy

Cutting surface
matte

Heat transfer vinyl

① Works with the cutting mat

Adhesive side

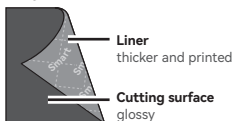

Transfer tape

- ①
- Only applicable to vinyl materials and smart adhesive vinyl.
 - Not applicable to heat transfer vinyl.

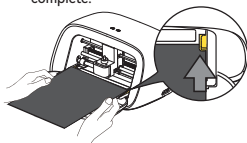

3. Materials Usage Guide

3.1 Smart Adhesive Vinyl

- 01** Place the glossy cutting surface facing up, with the printed liner facing down.

- 02** Feed and cut the material, then remove it once the cutting is complete.

① Make sure the material is placed in the manual feed slot as shown in the figure.

- 03** Use the weeder on the mat to remove the excess parts of the design.

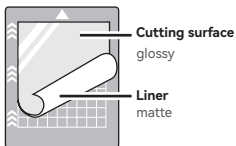

- 04** The weeding is completed.

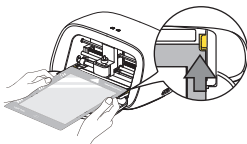

① For design transfer steps, refer to Section 4. *How to Use the Transfer Tape.*

3.2 Vinyl

- 01** Place the vinyl cutting surface facing up and the liner facing down within the white frame of the mat.

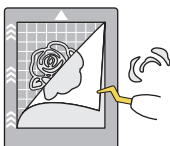

- 02** Feed and cut the material, then remove it once the cutting is complete.

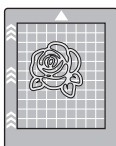

① Make sure the material is placed in the manual feed slot as shown in the figure.

- 03** Use the weeder on the mat to remove the excess parts of the design.

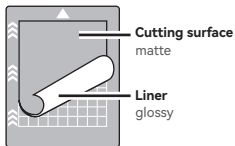

- 04** The weeding is completed.

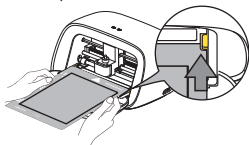

① For design transfer steps, refer to Section 4. *How to Use the Transfer Tape.*

3.3 Heat Transfer Vinyl

- 01** Place the heat transfer vinyl cutting surface facing up and the liner facing down within the white frame of the mat.

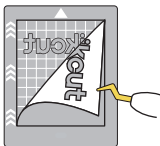

- 02** Feed and cut the material, then remove it once the cutting is complete.

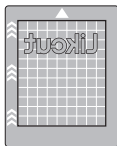

- ① Make sure the material is placed in the manual feed slot as shown in the figure.

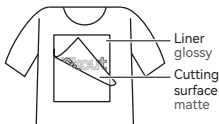

- 03** Use the weeder on the mat to remove the excess parts of the design.

- 04** The weeding is completed.

- 05** After cutting, place the material cutting surface facing down over the fabric.

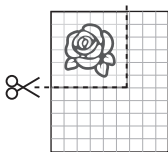

- 06** Use a heat press machine to iron the design onto the fabric, and peel off the liner.

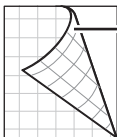

4. How to Use the Transfer Tape

- 01** Cut the transfer tape to match the design size.

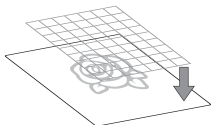

- 02** Remove the liner of the transfer tape.

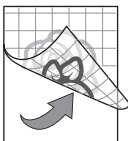

Adhesive side

① Only applicable to vinyl materials and smart adhesive vinyl.

- 03** Attach the adhesive side of the transfer tape over the design.

- 04** Use your hand or a tool to press the transfer tape and then peel it away from the bottom.

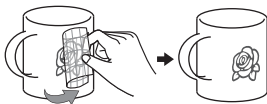

① If the design is not successfully transferred, please press more firmly on the design area of the tape.

- 05** Attach the design to a clean, flat and dry surface and press the design area tightly with your hands.

- 06** Remove the transfer tape.

① If the design stays on the tape, press more firmly on the design area.
