How to fluff the pillow?

STEP1 Fluffing Pillows by Hand

Vacuum-sealed

Squeeze

Fold

Wait for 24 hours

STEP2 Drying Pillows to Fluff Them

Prepare Your Pillow

Take it out, slight shaking & patting, then leave it for 6 hours let it fully expand.

METHOD 1

OR

METHOD 2

Remove the peculiar smell

1. Putting your pillow in the dryer.
2. Placing the inner case/pillow open areas to release the smell. (This can be done every other month to keep fresh)

FAQ:

1. Flat after decompressed

The pillow may be flat because it had been packed in a reusable vacuum-sealed bag for some weeks. Please pat and shake the pillow. It will fluff up a few hours later. It may take a 5-10mins to reach full size.

2. Too high or thick pillow?

If you feel that the pillow is too hard, or out of shape, you can take out some filling to make the pillow softer.

3. Hard to put on a pillowcase after washed?

If it's hard to put on a pillowcase after the pillowcase is washed, please take some filling out and refill the pillow after putting it in a pillowcase.

4. How to take the filling out to adjust?

Unzip the pillow and then you can take out or move some filling to adjust the height of several parts as you prefer.

5. There is a slight bamboo smelling of the cover.

Please don't worry. Because there are bamboo materials in the cover. It is cooling and healthy.

Care Instructions

Separate outer cover and inner pillow

- Machine wash cold
- DO NOT USE BLEACH
- Tumble dry in low heat
- Completely dry before use.

Maintenance

To maintain firmness of pillow, tumble dry in low heat once every 3 months.
