I . Introduction

1. Charge and Activate

Align the magnetic charger with the magnetic hole on the back of the watch until the charging reminder appears on the watch screen. **Please charge the watch for 2 hours before using it for the first time.**

2. Wear Correctly

Please ensure that your watch is at least one finger above your wrist bone and that the sensor on the back touches your skin.

3. Button and Touchscreen

KNOB BUTTON

1. Long press to turn on the watch when off state
2. In the power-on state, press and hold to display the shutdown page, and draw the right page to shut down.
3. Rotate the switchable dial on the dial page
4. Press once on the watch dial to enter the menu, and press the knob key twice in quick succession to switch the menu styles
5. On the menu interface, you can rotate the button to scroll the menu and zoom icons
6. When on the other interfaces, press the button to return to the watch dial interface

SWIPE UP: MESSAGE NOTIFICATION

SWIPE LEFT: SPORTS DATA

SWIPE RIGHT: SHORTCUT KEYS AND WEATHER

UNDERScore: CONTROL CENTER

II. Bluetooth Connection

1. APP Using Tips:

- a. Please use official applications to download the FitCloudPro APP and avoid using third-party applications to download. If you download the APP in a third-party application or browser, spam ads may pop up and require you to provide credit card information, please do not click and do not provide credit card information.
- b. When connecting, the Bluetooth pairing request and notifications request appear on your phone, please click **【Pair】** and **【Allow】**
- c. Log in to the APP and fill in the correct information of gender, birthday, height, weight, etc. (*Incorrect information will affect the accuracy of health and activity Data.)

2. Connection steps:

Step A. *Connect to Bluetooth in the FitCloudPro App (for data transfer)*

- a. Turn on the **【Bluetooth】** function of your phone.
- b. Search **【FitCloudPro】** in the store or scan QR code on the manual to download the APP.
- c. Open the APP, click **【Device】**, find **【Watch】** to pair and agree to bind on the watch.

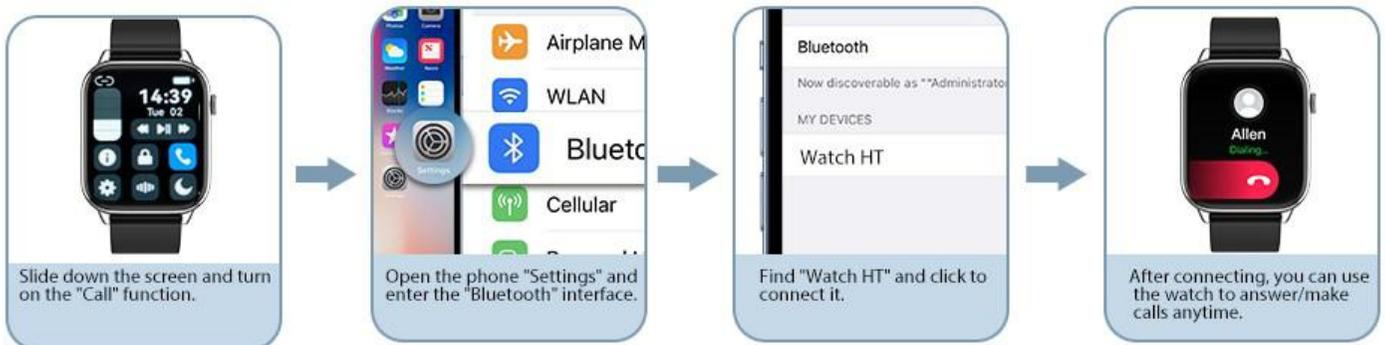

Step B. *Connect to audio Bluetooth in your phone (for answering/ dialing/ listening to music)*

- a. Slide down the screen and turn on the **【Call】** function.
- b. Open the phone **【Settings】** and enter the **【Bluetooth】** interface.
- c. Find **【Watch HT】** and click to connect it.

A: Connect to Bluetooth in the "FitCloudPro" App, so that you can sync data.

B: Connect to audio Bluetooth in your phone, so that you can make phone call.

3. Phone Permission Settings:

For iOS

Location: After it is turned on, the APP can obtain the local weather conditions and synchronize it to your watch.

Contacts: After it is turned on, you can add frequently used contacts on the APP and it will be synced to your watch for quick calls.

Photos: After it is turned on, you can choose any photo in your phone to customize the watch face.

Bluetooth: After it is turned on, the APP can be ready for pairing with the watch.

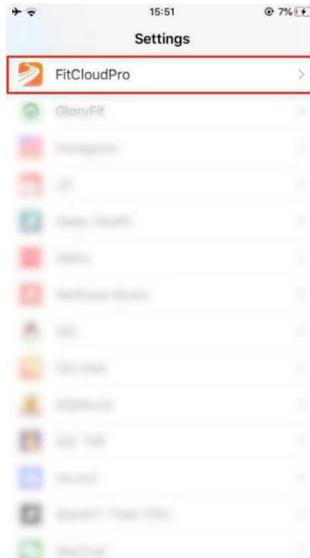

Camera: After it is turned on, enter the remote camera function on the APP, and shake the watch to realize remote camera.

Siri & Serach: After it is turned on, you can use the watch to wake up siri to perform quick operations.

Background App Refresh: After it is turned on, the system will update the latest version of FitCloudPro synchronously.

Q:How to open these permissions?

- Enter **【Settings】**
- Scroll down to find **【FitCloudPro】** APP and click to enter
- Open Contacts, Bluetooth, Camera, Background App Refresh permissions.

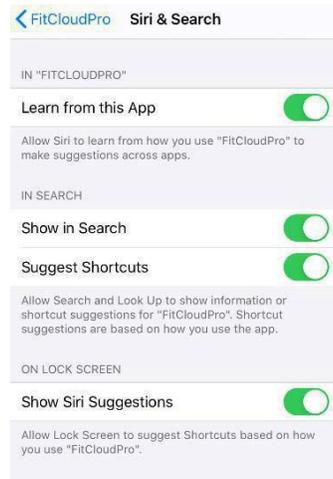

- Enter **【Location】** , choose **【Always】** , open **【Precise Location】**

- Enter **【Photos】** , choose **【All photos】**

- Enter **【Siri & Search】** , open all permissions.

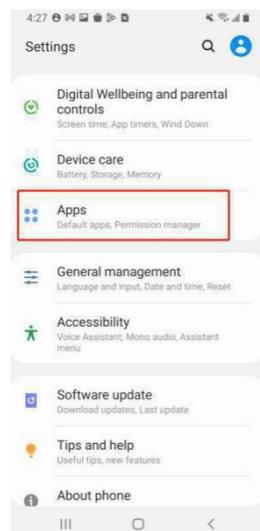

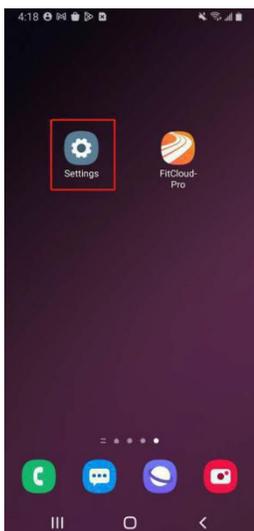

- Enter **【Wireless Date】** , choose **【WLAN &Cellular Data】**

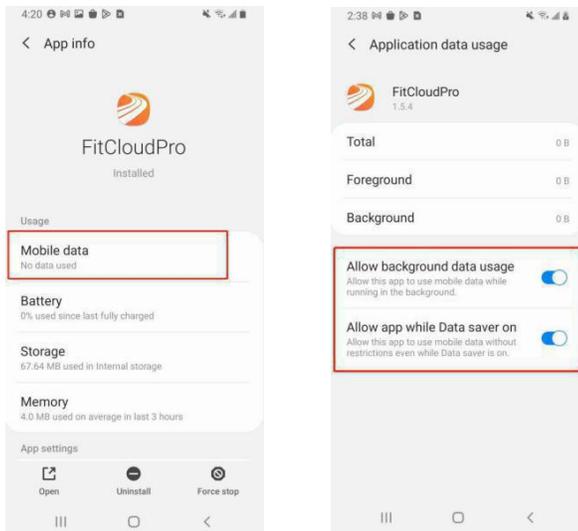

For android

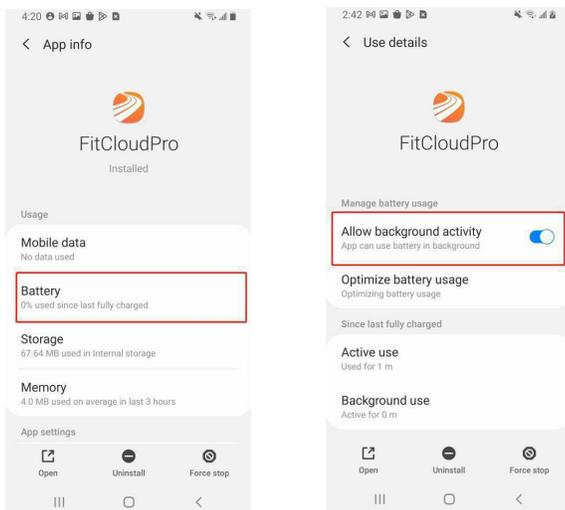

- Enter **【Settings】**
- Scroll down to find **【FitCloudPro】** APP and click to enter the relevant permission setting page

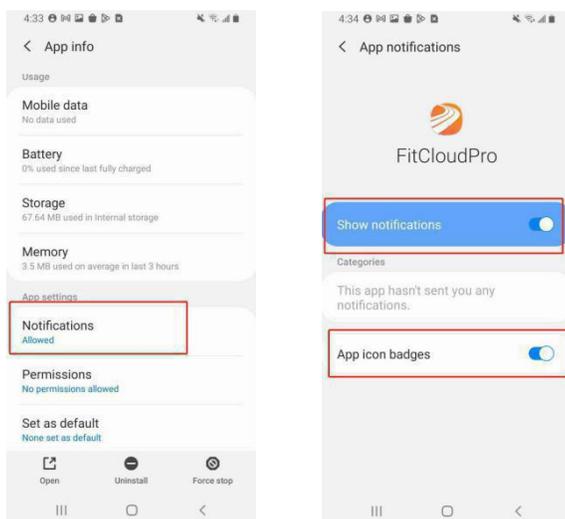

- Enter **【Mobile data】** , turn on **【Allow background data usage & Allow app while data saver on】**

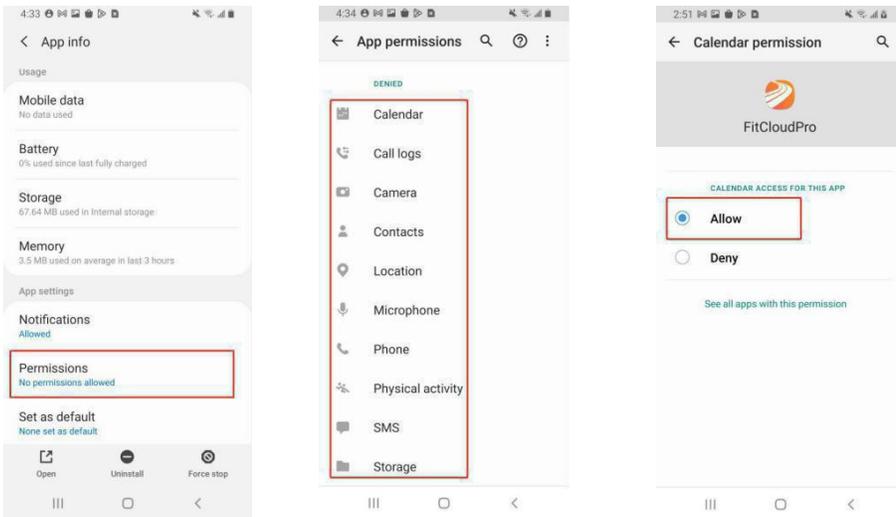

- Enter **【Battery】** , turn on **【Allow background activity】**

- Enter **【Notifications】** , turn on **【Show notifications & App icon badges】**

- Enter **【Permissions】** , turn on **【Calender, Call logs, Camera, ect】** , choose **【Allow】**

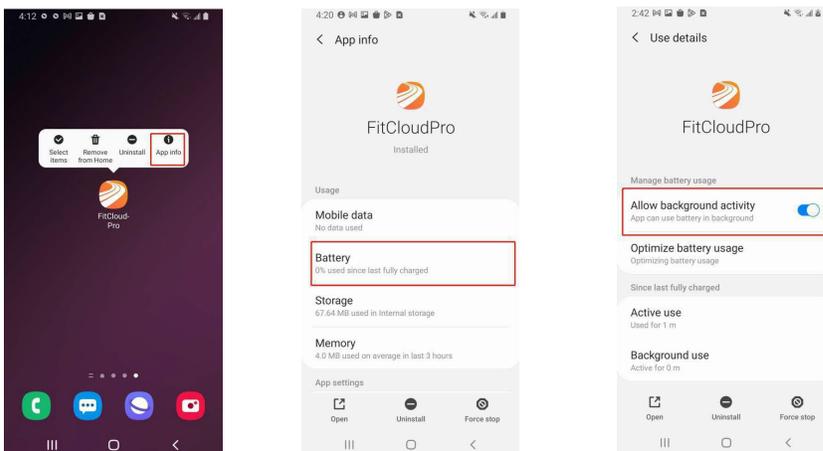

Q: Why are Android phones easily disconnected?

A: "FitCloudPro" APP must be running in the phone so that the Bluetooth will not be disconnected automatically. But the storage management of Android system will forcibly turn off the APP, in order to prevent the FitCloudPro APP from being killed by the system, please make the following 3 settings:

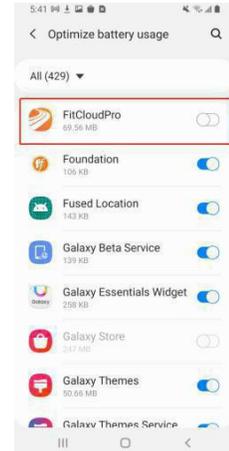

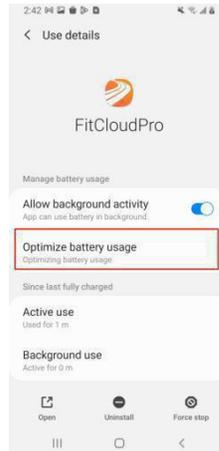

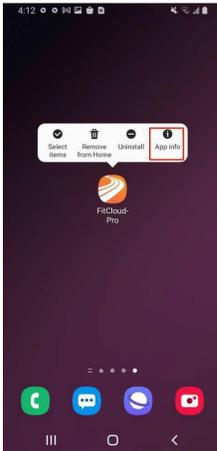

1) Background running permission setting

[long press] FitCloudPro → click [App information] → [Battery] → turn on [Allow background activity] to enable background protection settings.

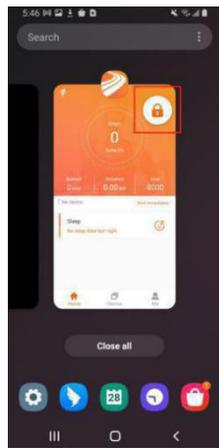

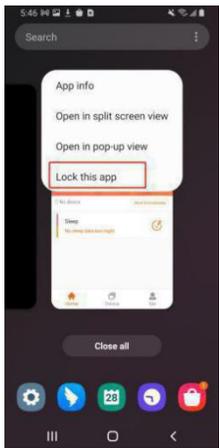

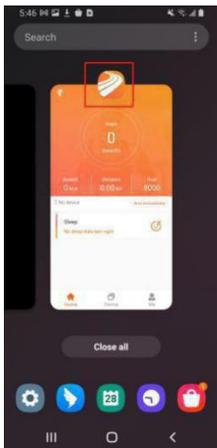

2) Battery optimization permission settings

[long press] FitCloudPro → click [App information] → [Battery] → [Optimize battery usage] → [All] → [Close] FitCloudPro App optimization button.

3) Clean up protection permission settings

To prevent the App process from being closed, click the [Multitasking] button in the navigation bar (or slide and stay from the bottom of the screen) → [FitCloudPro] → [Lock this application].

III. Function Description

1. Watch Face

Long press the screen to enter the watch face selection interface, swipe left or right to switch the dial, and click it after confirming the dial.

(Note: The system presets 12 watch faces, the last face is "customize", this watch face will change with the watch face market updating of the APP port and the download settings of the custom watch face.)

Q: How to customize the watch face?

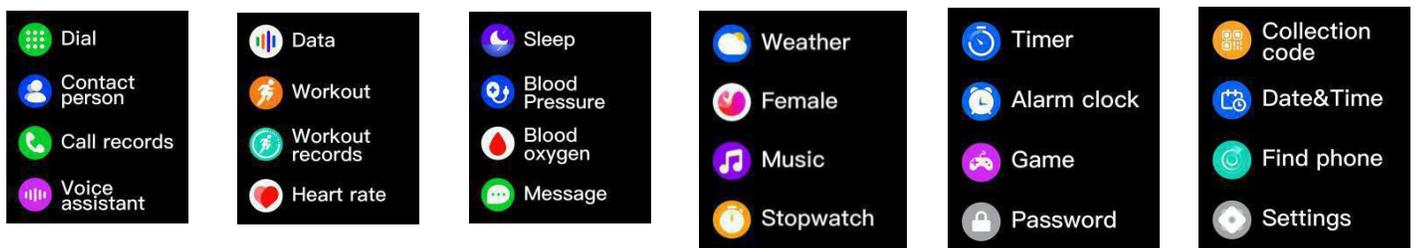

A: Enter FitCloudPro APP → Select "Device" in the bottom middle → Click "Dial library" → The first watch face is a custom watch face.

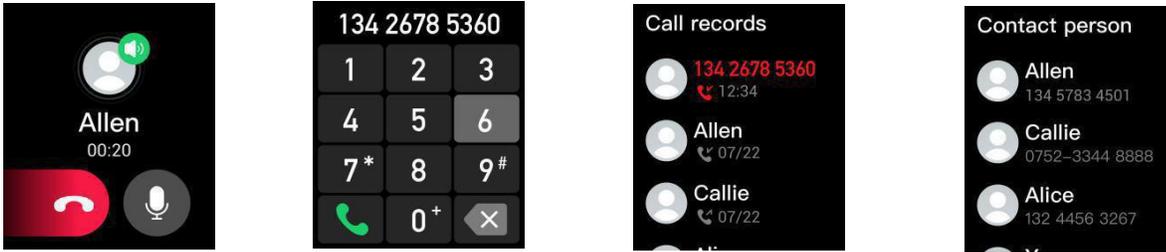

2. Application List

On the main interface, short press the physical button to enter the application list, from top to bottom is: Dial, Contact person, Call records, Voice assistant, Data, Workout, Workout record, Heart rate, Sleep, Blood pressure, Blood oxygen, Messages, Weather, Female, Music, Breath training, Clock (Stopwatch, Timer, Alarm), Game, Password, Collection code, Business card, Set time, Calculator, Find phone, Settings.

List View

3. Bluetooth Call

- After connecting to dual Bluetooth, you can answer/ reject/ make calls on the watch directly.
- You can view recent call history on your watch and call the numbers displayed in the call records.
- You can add up to 10 frequent contacts to your watch through the APP, then call these contacts on your watch directly.

4. Voice assistant

Click to wake up, and speak to complete the command operation. Completely liberate hands and make your life more convenient.

5. Acitivity Data

Display the number of steps, distance, and calories recorded on the day, and you can set the target steps, distance, and calories in the APP.

6. Workout

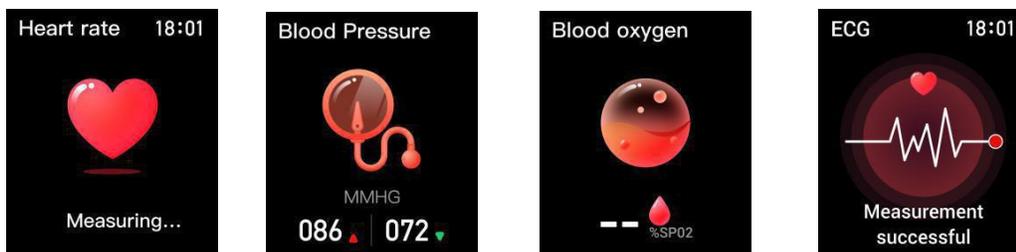

20 sport modes: walking, running, indoor running, climbing, cycling, basketball, swimming, badminton, elliptical, yoga, table tennis, skipping, rowing machine, lazy car, exercise bike, tennis, baseball, rugby, cricket, strength training. Click the icon to start exercising.

7. Workout Record

You can view your recent exercise records on the watch, including detailed data about your exercise.

8. Health Monitor

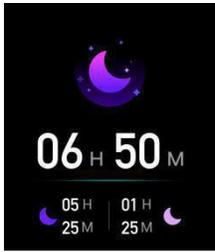

You can manually measure the health data on the watch. Each time to measure, keep your arm and wrist still and wait patiently, and It will vibrate to remind when the measurement is completed.

If you want continuous monitoring, you need to turn on "Automatic Health Monitor" in the APP first, then the watch will measure the health data at intervals over a set period of time. **Path to turn on "Automatic Health Monitor"**: Enter FitCloudPro APP → Select "Device" in the bottom middle → Click and turn on "Automatic Health Monitor".

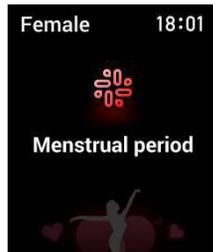

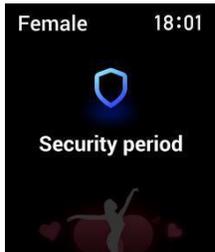

*****This watch is not a professional medical device, and the measured data should not be used as the basis for any treatment of diseases.**

9. Sleep

You can view the most recent sleep record and sleep status, the data is updated every day and will be saved synchronously when connected to the APP.

10. Female Health

After the watch is connected to the APP, open the female health reminder on the APP, and you can check the security period, menstrual period information on the watch.

11. Breathing Training

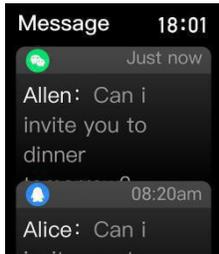

There are 1 minute and 2 minute options. After clicking start, follow the icons in the breathing training to zoom in and inhale, and zoom out to exhale.

12. Health Reminder

It can be turned on in the APP [Path: Device → Activity Reminder, Drink Reminder], and after turning on, you can set the start, end time, and do-not-disturb period.

13. Messages Notifications

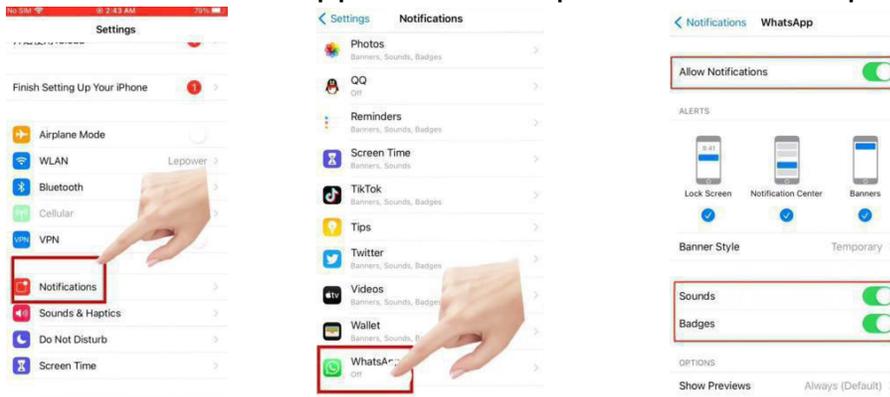

After the watch is connected to the APP, open the Push Notifications on the APP side, and the watch side can receive the corresponding messages push, and can save up to 15 recent messages.

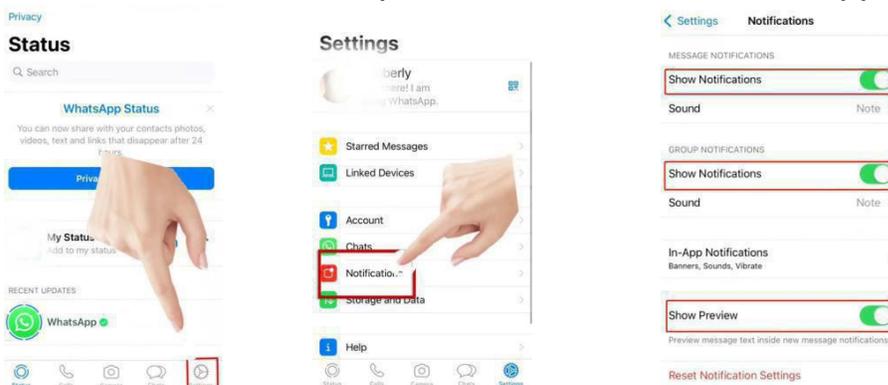

Q: How does the watch receive messages?

A: Firstly, please make sure that the message can be displayed normally in the notification bar of the mobile phone. The watch receives the message by reading the message of the mobile phone; if there is no message in the notification bar of the mobile phone, the watch cannot receive message reminder. And you need to turn on 3 notification permissions. (take WhatsApp example)

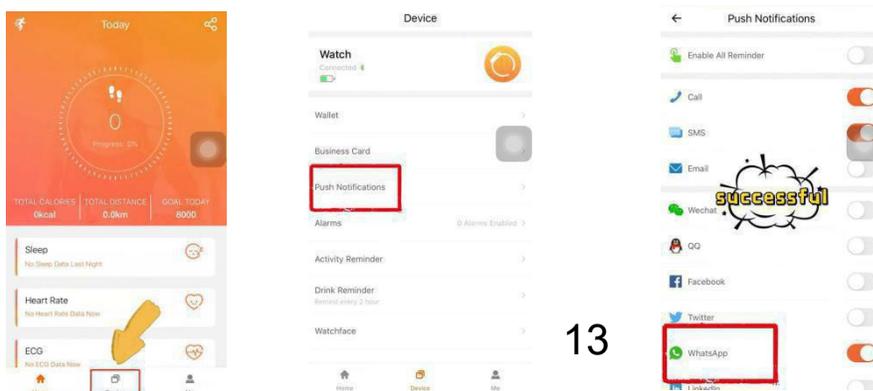

1 Turn on the WhatsApp notification permission in the phone settings.

2) Turn on the notification permission in the in WhatsApp application.

3 Turn on the notification permission in the "FitCloudPro" APP.

14. Weather

After the watch is connected to the APP, the weather interface will display the real-time weather temperature and weather type.

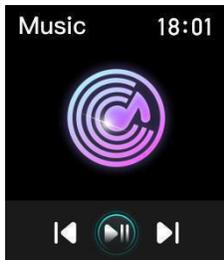

Q: How is the weather forecast temperature updated?

A: Update of weather forecast requires several conditions:

- 1) APP positioning has been authorized;
- 2) The mobile phone network is normal;
- 3) The Bluetooth connection is normal.

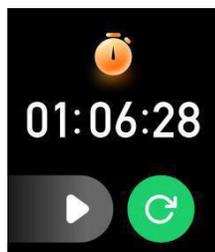

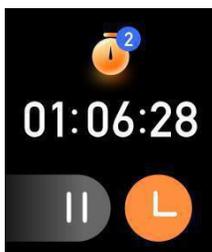

If the above conditions are met, the weather will be updated every hour. If it still does not change, please close the "FitCloudPro" APP from the background and reopen it.

15. Music

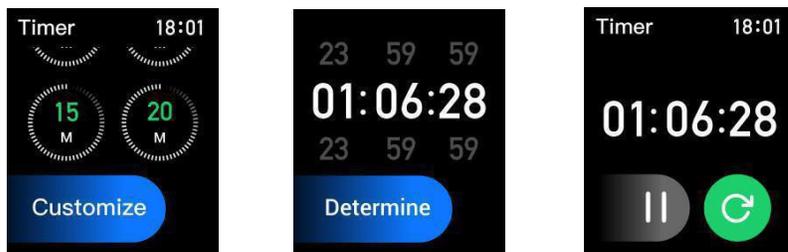

When only connected to the APP Bluetooth, it can control the pause and start of the mobile phone music player, and song switching. If you want to play music on the watch, you need to connect dual Bluetooth - APP Bluetooth and audio Bluetooth.

16. Stopwatch

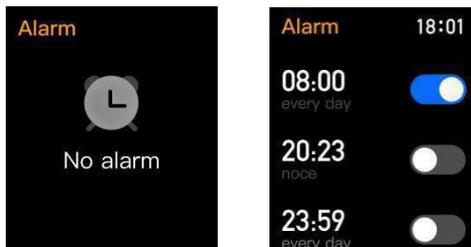

Click the start button to start the timing, click the pause button to pause the timing, and click the reset button to reset the timing to zero. Up to 99 pieces of data can be saved.

17. Timer

The system presets the commonly used timing duration, and you can also click the custom button to set the time. click the pause button to pause the timing, and click the reset button to reset the timing to zero.

18. Alarm Clock

After the watch is connected to the APP, you can set a single alarm clock or a cycle alarm clock in the APP, which can be synchronized to the watch. Up to 5 alarms can be set.

19. Games

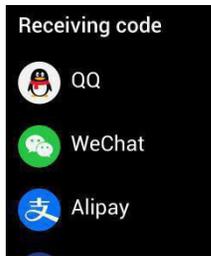

2 games, amuse yourself at any time, so that you can have a proper entertainment and relaxation during your busy work. Lighten up your life.

20. Password

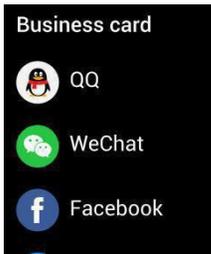

You can set a 4-digit screen saver password for your watch. If you set a password, you need to enter the password every time you turn on the screen.

21. Code Information

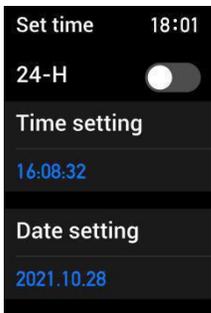

Bind the collection code in the APP and save the receive money QR code to your watch to receive money anytime, anywhere.

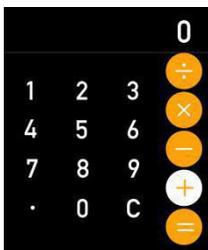

Bind the business card in the APP and save it to your watch, others can scan your social QR code to add you as a friend.

22. Set Time

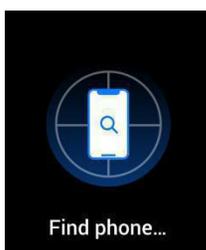

The watch supports editing date and time directly.

23. Calculator

There is a mini calculator on the smart watch. You can do arithmetic on your watch anytime, anywhere, more convenient and faster.

24. Find Phone

After the watch is connected to the phone, click Find Phone, and the phone will ring.

25. NFC Door Card

Currently only supports simulating unencrypted door cards with a frequency of 13.56MHZ on the market.

It's similar to IC access card. In the community, you can find the property and let the property enter the access card information on your watch through the read-write device. If your home is equipped with a smart electronic lock, there will be a corresponding APP, you can add it on the APP and then put the watch close to the electronic lock to entry access card information on your watch. After success, you can use the watch to open the door.

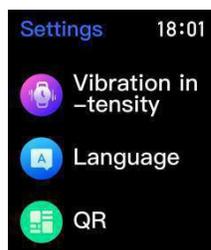

26. Do Not Disturb Mode

Swipe down on the main interface, if the lower right corner is red, it means that the DND mode is turned on.

***When the DND mode is turned on, the screen will not turn on when you raise your wrist, and the message notifications will not remind.

27. Settings

Under the setting function, there are 10 menu styles, screen display (switching dial, brightness adjustment, screen on time, wrist turning on time), battery, vibration intensity, language, APP QR code, time setting, password, system information, etc.
