# SOFABATON U1

The One for All Smart Remote

## Smarter, Better

The Elegant, Powerful Universal Remote With An App

## Why SofaBaton UI ?

---

We love home electronics that make our life comfortable, but we dislike having a remote come with every device. Learning how to use each remote device separately is a hassle, and every remote drains battery power even when not in use.

It isn't convenient or environmentally friendly to have so many remote controls at home, so let's replace them with one.

# Meet the U1

## Better, Smarter and Simpler with the SofaBaton App

- Simple mobile App used to set up and configure the U1 remote
- Cover thousands of IR codes of remotes with a secure cloud database
- Self-learning capability to adapt to old or new devices, offering superior flexibilities
- Consume less energy with Ble 4.0 Technology
- Support upto 50 devices, making the U1 truly universal
- Advanced OLED display
- Customizable Macro keys functionality, making the U1 more powerful
- Supporting Bluetooth remotes, including Amazon Fire TV and others

Streamline your streaming experience

### **Wider Angle Further Distance**

We custom made our Infrared emitter and adjusted to ensure it will cover a wide angle and reach up to 10m distance. The Bluetooth ranges further at 50m in open space or 20m indoor.

### **IR Code On the Cloud**

Sofabaton U1 is backed with dynamic cloud database that already contains over 5500 remote controllers and 125,000 IR codes, and it keeps growing each day. The code is hosted on the cloud which is safe and secure.

### **Energy Efficient**

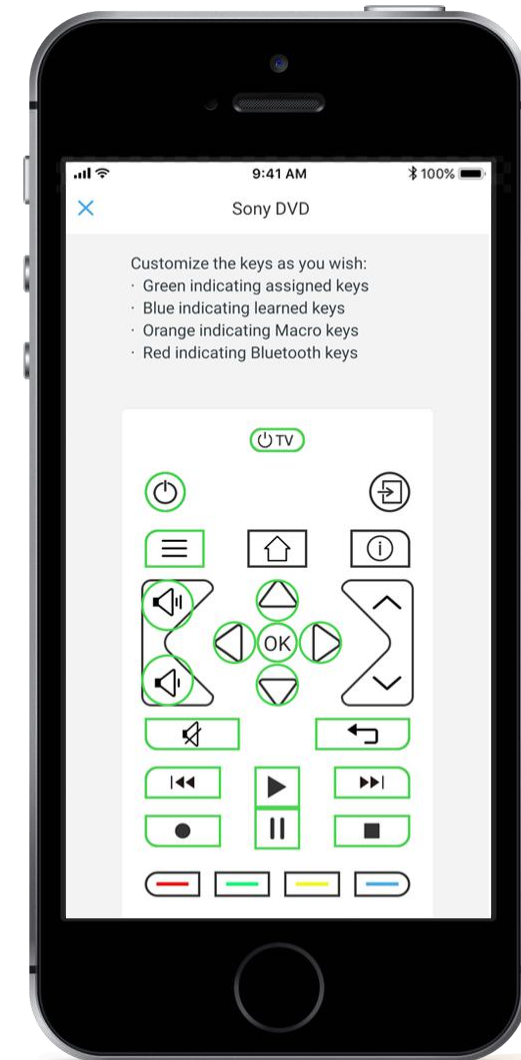

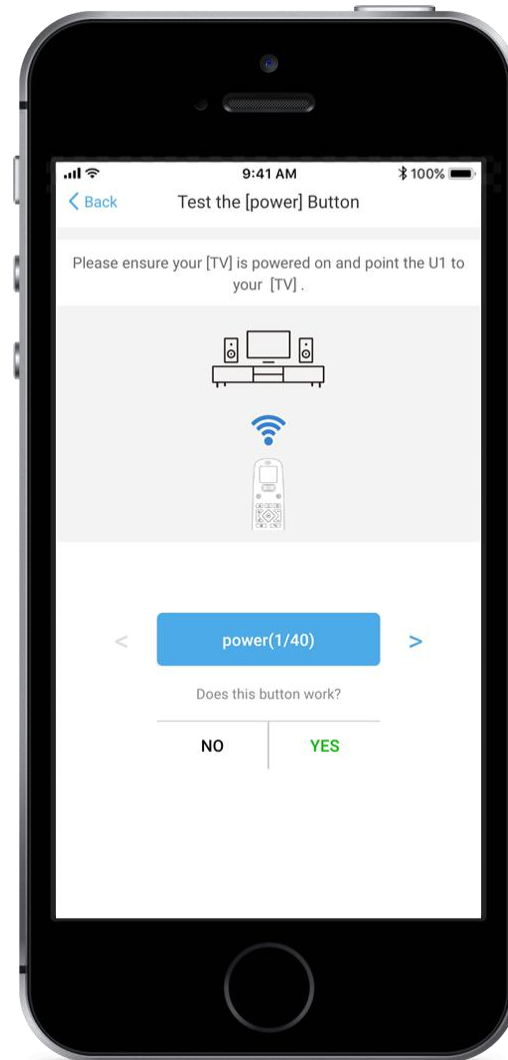

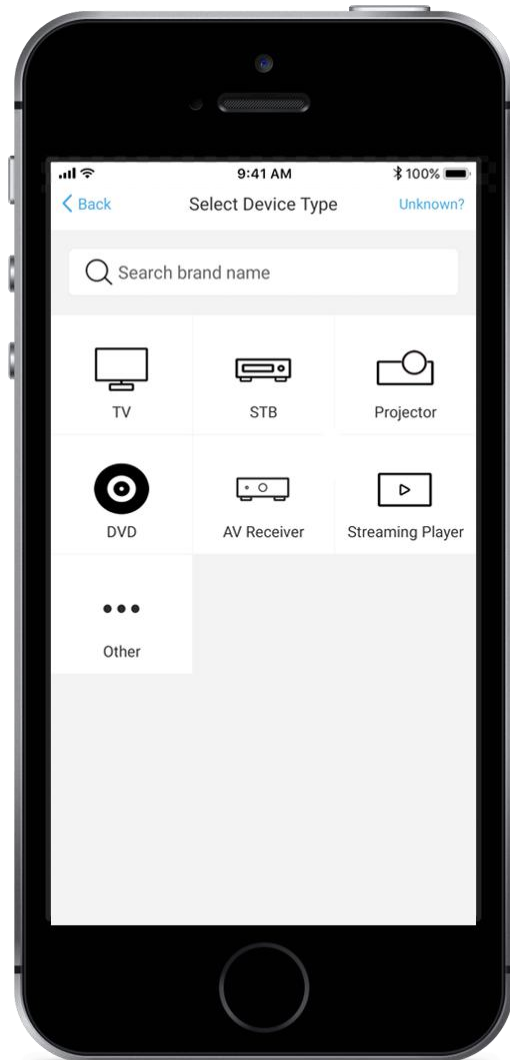

Our several months-long testing shows that two classic AA batteries should last at least 6 months with normal daily usage.

### **Ble Remote Supported**

With the increasing popularity of streaming players, like amazon FireTV, it is necessary to include Bluetooth remote protocol in the U1.

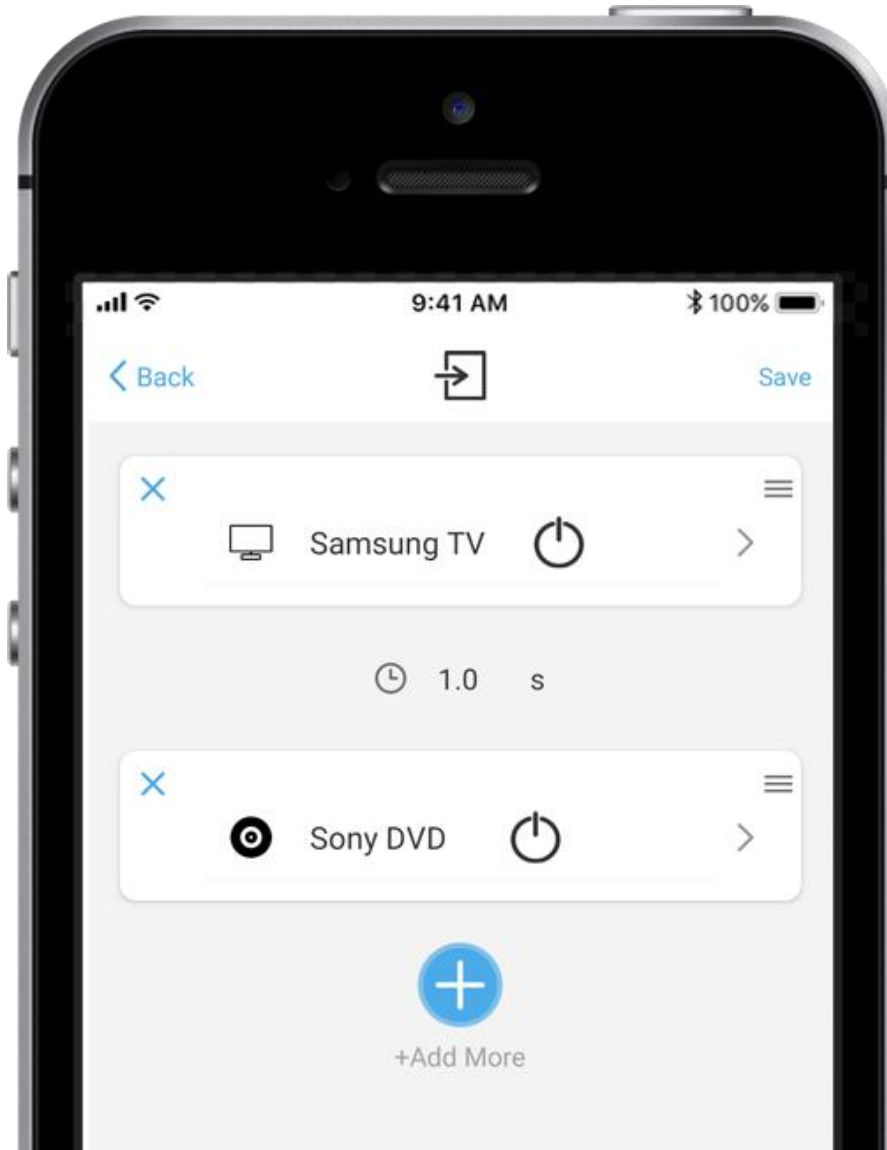

Now you can ditch your remote and enjoy streaming truly freely.

# Easy to Use App, Even Your Grandma Can Do It

# Customizable by Creating Your Own Scene

Let the Macro Keys Do the Magic

# Got a Bluetooth Remote supported device?

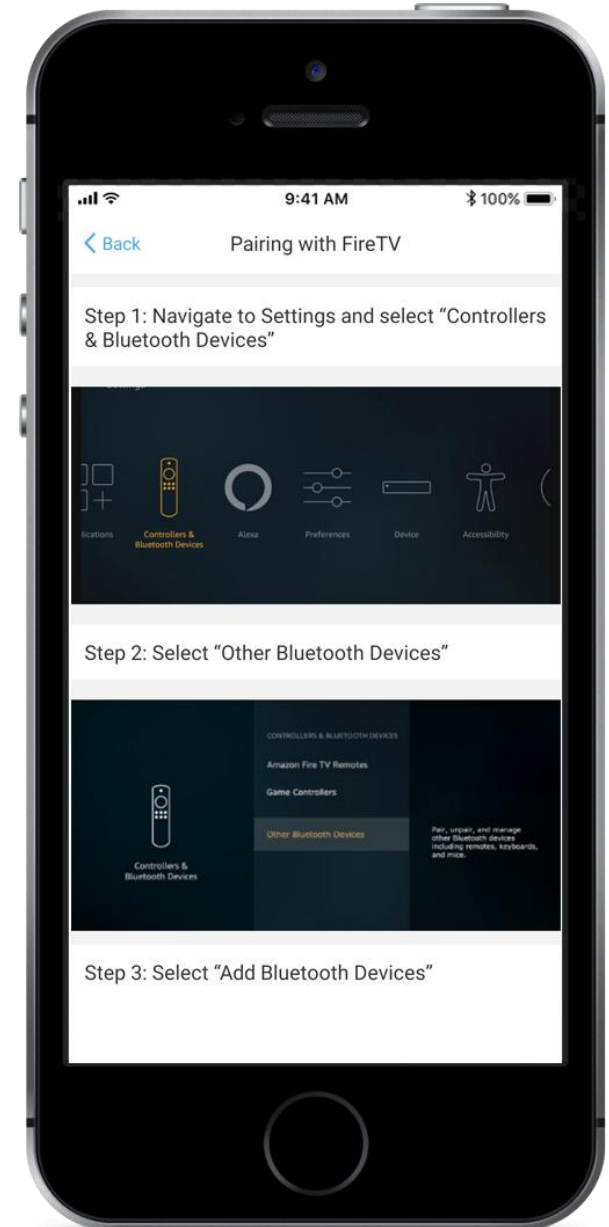

No Problem. You are covered.

Built-in Ble 4.0 Low Energy Chip

Working seamlessly with both your phone and your device via the same Bluetooth chip

Fire TV and many more

Adding SofaBaton U1 as a third party remote is as easy as learning ABC

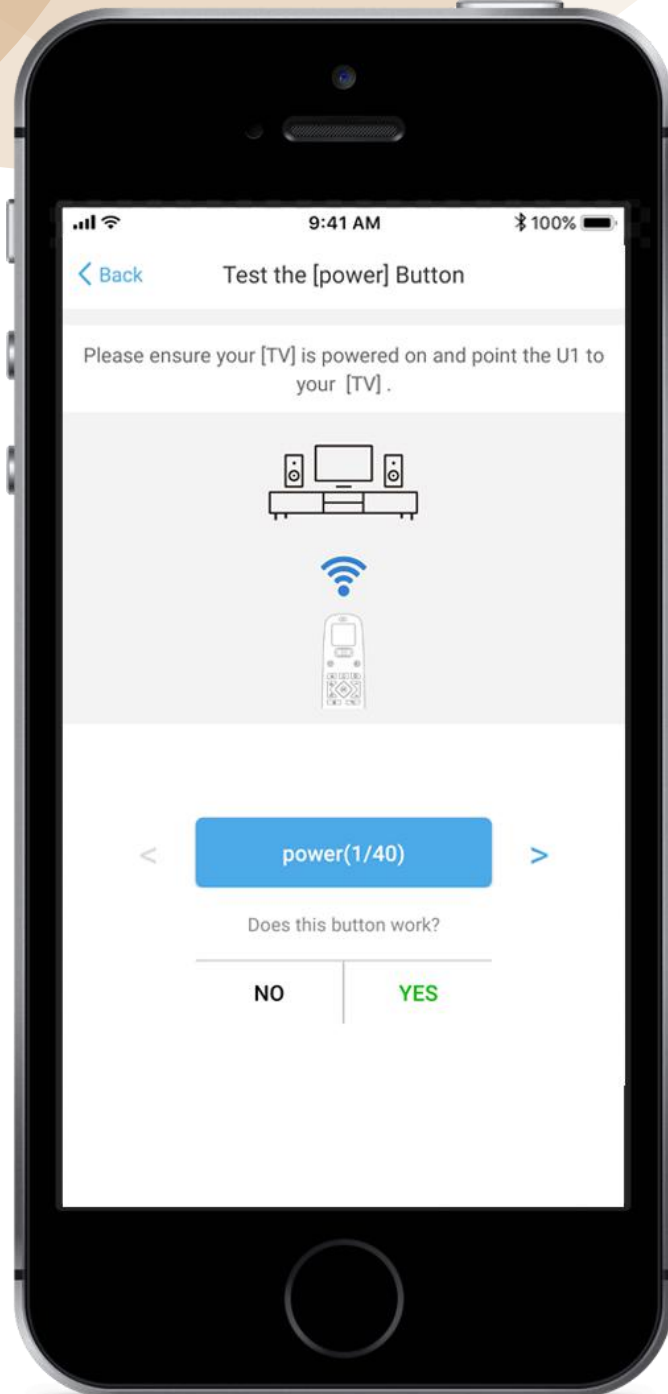

# More Devices, Fewer Remotes

Add upto 50 devices, ditch all your remotes

# IR Code on the Cloud

Thousands of Codes, Secured.

Powerful

5500 remote controllers and 125,000 IR codes

Secure

IR code sets hosted on secure remote server, and encrypted

Flexible

Missing IR codes? NO problem. Use the learning feature to learn from your old remote.
