Regular Mouth Mason Jar Sealer Use

1

Place the food in the Mason jar, select the regular mouth jar lid, and close the lid.

2

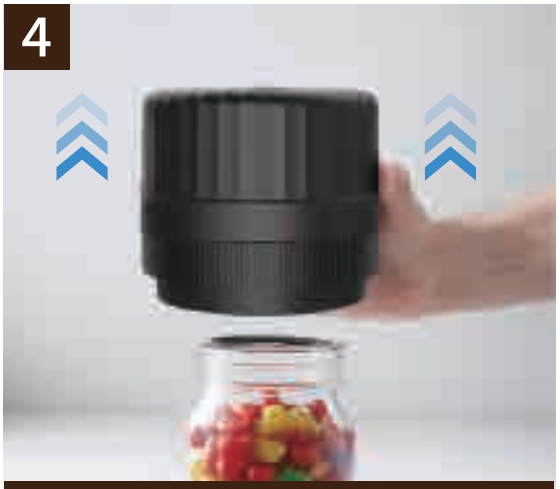

Align the electric Mason jar sealer with the jar mouth and press down to secure it at the bottom.

3

Press the button to start the vacuum process. The display wil show the working time, about 20 seconds for solid foods and 40 seconds or longer for liquids.

4

To stop, click the button (the display shows the battery level) and lift the sealer upwards to unplug.

Part 4

Wide Mouth Mason Jar Sealer Use

Rotate the red arrow on the regular mouth sealing adapter to the left to the unlock symbol on the host, you will get the wide-mouth sealer.

The wide mouth sealer is used in the same way as the regular mouth sealer, follow page 5.

How to install the regular mouth seal converter into the main machine?

1

Align the red arrow on the regular port seal adapter with the unlock symbol on the main unit.

2

Insert the regular port seal adapter into the silicone ring of the wide port seal area.

3

Tighten the standard port seal converter to the right.

4

At this point, the red arrow on the scale-port seal converter, aligned with the locking symbol , you get a regular mouth Mason jar sealer.

Upgrade Electric Vacuum Sealer

a Efficient & Save Time

Say goodbye to traditional hand vacuum pumps and bulky vacuum sealers. Our electric Mason jar vacuum is simple and efficient. Just press a button, and it quickly seals your food for you.

b Long-lasting Battery & Powerful Suction

Our electric Mason jar vacuum sealer is equipped with a high-capacity 1300mAh battery, providing longer-lasting battery life compared to common 400mAh battery models on the market. With a single charge, it can be used up to 200 times, and it boasts a stronger suction, ensuring superior food sealing results.

The Ultimate Secret to Keeping Food Fresh!

Our electric Mason jar vacuum sealer is your best companion for food preservation. Whether it's jams, pickles, sauces, vegetables, coffee beans, cashews, cookies, peanuts, candies, oats, nuts, spices, rice, or beans, just press the button, and within seconds, you can easily create a vacuum seal to maintain the freshness and deliciousness of your food. Whether you're preparing meals, packing snacks for travel, or storing leftovers, this powerful little tool meets all your needs.

Troubleshooting

Wide Mouth Mason Jars Won't Seal

1. Check whether there are particles or liquids in thesealing area of the mason jar bottle mouth and lid.If there is any, please wipe it clean.

2. Check whether the sealing silicone ring in the wide-mouth sealing area is offset, if so, please install it in place.

3. Check whether the sealer is pressed to the bottom when using the sealer.If you cannot be sure,please repeat the operation to ensure that the sealer is pressed to the bottom.

4. If sealing liquid items, please keep the liquid items under the mason jar thread to ensure a reliable sealing effect.

(Note: When vacuuming, make sure there is enough air in the bottle. If the liquid is filled to the brim, a full seal may not be achieved in 40 seconds, please extend the operating time of the vacuum to 60 seconds and beyond to ensure a better seal is obtained.)

Regular Mouth Mason Jars Won't Seal

1. Check the above four points.

2. Check whether the regular mouth sealer has been inserted into the sealing silicone ring in the wide mouth sealing area.If you are not sure,please repeat the operation to ensure that it is completed as required.
