

## **Black Shark FunCooler 3 Pro**

Read this manual carefully before use, and retain it for future reference.

## Device layout

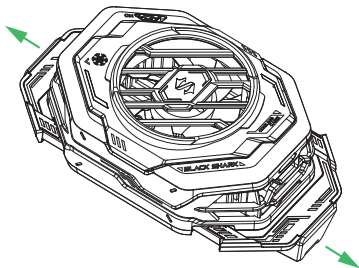

On/Off button

Type-C power port

## How to use your cooler

Pull the side arms to fit your phone.

## Configuring the cooler

1. Download and install the app.

Black Shark phone support performing configuration in the Shark Space. There is no need to download the app. And please make sure the OS version of the phone is the latest.

2. Switch on the cooler.

1) Attach the cooler to the back of your phone and keep it as close as possible to your phone. When installing, watch out the buttons on the side of the phone.

2) Connect the adapter to the cooler through the USB-C cable. Make sure the output power of the adapter is no less than 20W.

3) Switch on the cooler.

Once the power is on, the cooler enters Bluetooth pairing mode. If no phone connect to the cooler, the green light will flash for 30 seconds, and then the lighting effect will be restored to the user settings or factory default mode. Bluetooth pairing mode will always be on.

3. (Optional)\* Configure the cooler.

1) Turn on Bluetooth on the phone, and connect the cooler in the Shark Space or app.

2) Set the lighting effect and cooling mode. Also, you can view the temperature data of the cooler in Shark Space or the app.

\*If “(Optional) Configure the cooler” is not performed, the cooler will be the default mode.

\*When the cooler is working, the temperature of the device decreases. Then the warm and humid air will condense into water droplets and attach to the surface of the cooler. This is normal.
