

HOW TO USE SNOZZLEPRO WITH YOUR NOZZLE ATTACHMENTS

Attach SnozzlePro **TOP** to nozzle of Xtava Black Orchid Diffuser or Concentrator.

Place SnozzlePro **BOTTOM** (end with logo) on hair dryer.

SnozzlePro fits most hair dryers with a nozzle diameter measuring 1.5" to 2.25".

TROUBLESHOOTING

■ If it seems like the SnozzlePro **TOP** is "too small" to fit the Xtava Black Orchid diffuser nozzle, it actually isn't! SnozzlePro must be tight-fitting to stay securely attached to this short nozzle diffuser. SnozzlePro **WILL STRETCH** when enough effort is applied.

■ **PRO TIP:** If you notice SnozzlePro is slipping off during use, clean it with dishwashing liquid to remove hair product residue and restore its grip.

XTAVA BLACK ORCHID DIFFUSER

Insert your fingers into the SnozzlePro **BOTTOM**, holding it steady from the outside with your thumb.

Place the diffuser nozzle within the **TOP** rim of the SnozzlePro.

Stretch SnozzlePro over the edge of the nozzle. (Anchor your thumb on the nozzle for extra leverage if needed.)

Push SnozzlePro further onto the nozzle until it's snugged-up tight against the diffuser head.

Secure SnozzlePro **BOTTOM** (with Xtava Black Orchid attached) over hair dryer. Do not use high heat or high-speed settings.

DYSON SUPERSONIC™ HAIR DRYER

First—attach SnozzlePro to the Xtava Black Orchid Diffuser nozzle. (See instructions, left). Insert the Dyson Smoothing Nozzle* ONLY HALFWAY into SnozzlePro **BOTTOM**. (Do NOT over-insert the Smoothing Nozzle; it will cause the diffuser to detach.) Connect Dyson Smoothing nozzle to hair dryer.

*SMOOTHING NOZZLE (PART NO. 967703-05)

The Dyson Smoothing Nozzle (shown above) has a gentle, low-speed airflow. If your Dyson hair dryer came equipped with only the thin, high-velocity Styling concentrator, a Smoothing Nozzle can be purchased at [Dyson.com](https://www.dyson.com).

PLEASE NOTE: Do not use SnozzlePro on Dyson Supersonic hair dryers manufactured prior to April 2018. Please check your model prior to use.

CONCENTRATOR NOZZLE

Insert concentrator nozzle inside the **TOP** rim of the SnozzlePro. Stretch the SnozzlePro over the nozzle and secure it into place.

Secure the SnozzlePro **BOTTOM** over hair dryer. Do not use high heat or high-speed settings.
