1. Median users can get up to 12 hours of battery life in about 11 min of charge. Tested under controlled laboratory conditions. Actual charging speed will vary based on temperature, device settings and other factors. Battery must be substantially depleted; charging rate slows as charging progresses. Charger sold separately. Charge using Motorola TurboPower™ 45W charger or higher (sold separately). Higher chargers will not increase maximum 45W charge capability. Use of other chargers not recommended and may impair charging performance. 2. Testing conducted in a controlled environment at room temperature, using accelerated life testing protocols; many factors, not all of which are included in such testing protocol, affect the durability of a phone; subject to Motorola's standard limited warranty. 3. Tested under controlled laboratory conditions, the phone is water and splash resistant to a rating of IPX8 (IEC 60529) and can be submerged up to 1.5 meters in still, fresh water for up to 30 minutes. Resistance will decrease as a result of normal wear. Not designed to work while submerged underwater. Do not expose to pressurized water, or liquids other than fresh water. Do not attempt to charge a wet phone. Not waterproof. Not advised for beach or pool use. Not dust- or sand-resistant. 4. Available user storage is less due to many factors, including operating system, software and functions utilizing part of this capacity; may change with software updates. 5. Gemini, Android, YouTube, Google Photos and other marks are trademarks of Google LLC. Gemini mobile app available on select devices, languages, and countries. Internet connection required. Check responses for accuracy.
