RED

MEDIUM  
GREEN

LOW  
BLUE

## CLOTHING INSTRUCTIONS

### MATERIAL

|                  |                                                   |
|------------------|---------------------------------------------------|
| Fabric           | 100% Nylon                                        |
| Inner Layer      | 100% Polyester                                    |
| Lining           | 100% Polyester                                    |
| Heating Elements | Metal composite fiber wire (Safety Certification) |

### WORKING DURATION

Heating in seconds with a 7.4V certified battery.

Operates up to 6-7 hours (Low), 7- 9 hours (Medium), 10-11 hours (High), on a single charge.  
(The duration of use is influenced by the ambient temperature to some extent.)

6-7H

6-7 hours  
(High)

7-9 H

7- 9 hours  
(Medium)

10-11H

10-11 hours  
(Low)

## BATTERY INSTRUCTIONS

### BATTERY TECHNICAL PARAMETERS

|                        |               |
|------------------------|---------------|
| Capacity               | 20000mAh      |
| DC output              | 7.4V-2A       |
| Rated energy           | 74Wh          |
| Type-c input           | (5V-3A 9V-2A) |
| Battery maximum output | 20W           |

### STORAGE, MAINTENANCE AND SAFETY MATTERS

- |                                                                                                                                                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. When the battery is stored, please charge the battery to 3 bars and place it in a dry and ventilated place. Avoid contact with corrosive substances, keep away from fire and heat sources, and avoid spontaneous combustion. |
| 2. When the battery is not used for a long time, it is recommended to charge it once every six months or so, and replenish it for 1-2 hours.                                                                                    |
| 3. It is not allowed to replace the battery without authorization, and it is strictly forbidden to dissect the battery.                                                                                                         |
| 4. If you find that the battery is bulging, please stop using it.                                                                                                                                                               |

### CHARGE AND DISCHARGE INSTRUCTIONS

1. The battery supports a variety of chargers, 5V2A 5V3A or fast charging chargers (using fast charging chargers can be fully charged in about 6 hours), and charging with chargers below 5V2A is prohibited.
2. Output: It is forbidden to connect and use other equipment products.
3. When the temperature is lower than minus 10°C, the battery life will be shortened; when the temperature is lower than minus 20°C, the battery may not start normally.

### OPERATING INSTRUCTIONS

1. When using it for the first time, it should be fully charged, and then fully discharged (adjust the clothes heating function to the middle and high level) until the battery is fully discharged and self-protection stops discharging.
2. When the battery is connected to the clothes, if the heating function is not used for more than 24 hours, the battery will automatically protect and stop output, and you need to press the battery button to restart.
3. When you do not want to use the heating function, press and hold the battery button for 2 seconds to turn off. To restart, just press the battery button to turn on.

## SAFETY INSTRUCTIONS

The heated vest used to keep a person warm in cold environments.  
Do not use this product in any way other than that indicated for normal use.

- Do not use this vest with an infant, child, helpless person, or anyone insensitive to heat, such as a person with poor blood circulation.
- Never wear when the inner lining is wet.
- Heating elements are not recommended for touching bare skin.
- Cut the power immediately if there is a fire occurs.
- If you notice any malfunction of this vest or battery element, stop use it immediately and contact customer service to have it repaired.
- Never break and open batteries and chargers.
- Store only in a dry place, keep dry at all times.
- No metal parts should enter the battery section of the charger (may cause risk of short circuit).
- Do not use pins on clothing, it may damage electrical wiring.
- Maintain labels and nameplates, these carry information important, If illegible or missing, contact customer service.
- Do not dispose of used batteries in household refuse or by burning.
- Do not store the battery with metal objects (may cause risk of short circuit).
- Only use batteries or charger, do not use batteries from other brands.
- Battery acid can leak from damaged batteries under extreme load or temperature extremes. In case of eye contact rinse thoroughly for at least 10 minutes and immediately consult a doctor.

## ABOUT US

---

Designed from France. Our inspiration comes from the challenges posed by extreme climates around the world. We are dedicated to developing the most comfortable and lightweight smart heated vests.

We understand the challenges of finding a jacket that combines warmth, lightweight and stylish, particularly use it in the cold winter months. We share your frustration with the need of wearing thick heavy clothes to keep warm. This inspired the creation of our smart heated vests.

Our design team, hailing from France, We have been persistently pursuing innovation and refinement. By incorporating advanced heating technology, we have embedded metal composite fiber heating elements into the fabric of the vests, providing long-lasting and consistent heat distribution. Whether in frigid regions or any cold setting, Our heated vests will be your most reliable companion.

We embrace a LOVE for Nature and Outdoor Activities, so that we consider Product Quality and Environmental Sustainability as the core values of our brand. Employing high-quality materials, we pay meticulous attention to details and craftsmanship, ensuring that each heated vest exemplifies exceptional quality and durability. Additionally, we strive for sustainable development, aiming to minimize our impact on the environment.

Our heated vests are more than just outerwear, it represent our brand's pursuit of Comfort, Freedom and Individuality. Driven by our team, we continuously innovate and strive for excellence, providing you with an enhanced heated vest experience. Join our brand story and become part of our journey, where warmth and style intersect harmoniously.

## LIMITED WARRANTY

### WARRANTY COVERAGE:

#### Warrant coverage includes the following situations:

- **Quality Assurance of Our Products:** We assure that the heated vests we sell meet all relevant standards and regulations. If you encounter any quality issues such as manufacturing defects, workmanship problems, or damaged parts after purchase, we will provide free warranty service.
- **Warranty Period:** We offer a 1 year free warranty from the date of purchase. Within this period, if the product experiences any quality problems, we will offer repairs, free replacement parts, or warranty services for the entire heating vest, depending on the situation.
- **Manufacturing Defects:** Manufacturing problems such as circuit failures, poor wiring connections, etc.
- **Manufacturing Defects:** Issues arising from manufacturing, such as circuit failures or faulty wiring connections.
- **Workmanship Problems:** Quality issues related to sewing, insulation materials, and similar factors.
- **Component Damage:** Any failures of critical components like batteries or controllers.

### EXCLUSIONS FROM WARRANTY:

#### The following situations are not covered by our warranty and will not receive free warranty service:

- **Damage Caused by Human Actions:** Accidental damage, improper use, unauthorized repairs, and negligence resulting in damage to the heating system and components will void the warranty.
- **Abnormal Use:** Improper usage, violation of product instructions, incorrect cleaning methods, etc.
- **Accidents:** Damage caused by natural disasters, fire, flooding, or any other force majeure events.
- **Warranty Process:** If you have any inquiries or need warranty service, please contact our customer service department within the warranty period. Provide necessary information such as purchase receipts and follow our instructions for product repair or return. We will promptly process your request and provide the relevant repair or replacement services.

Please note that the above information serves as a general guideline, and specific warranty terms for our heated vests may vary based.
