EYOCEAN LED Desk Lamp

USER MANUAL

(CLED-0397C)

(CLED-3907C)

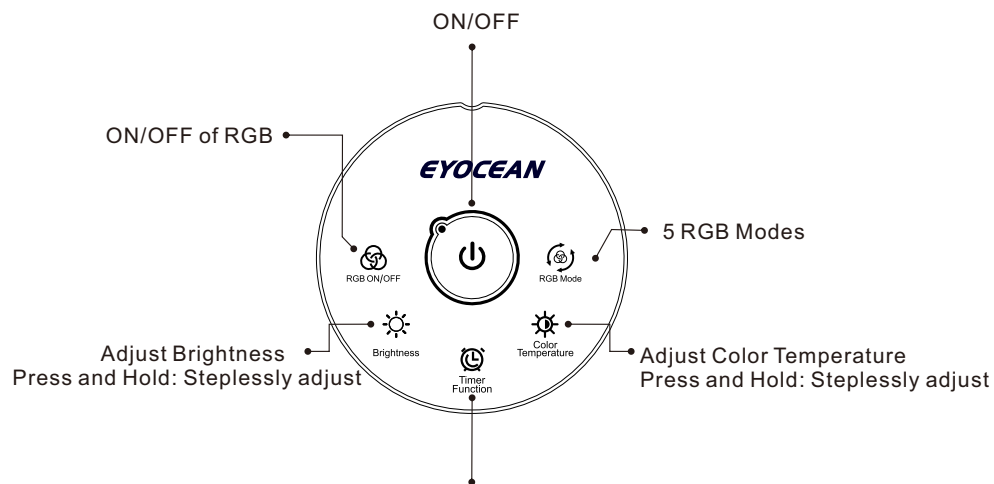

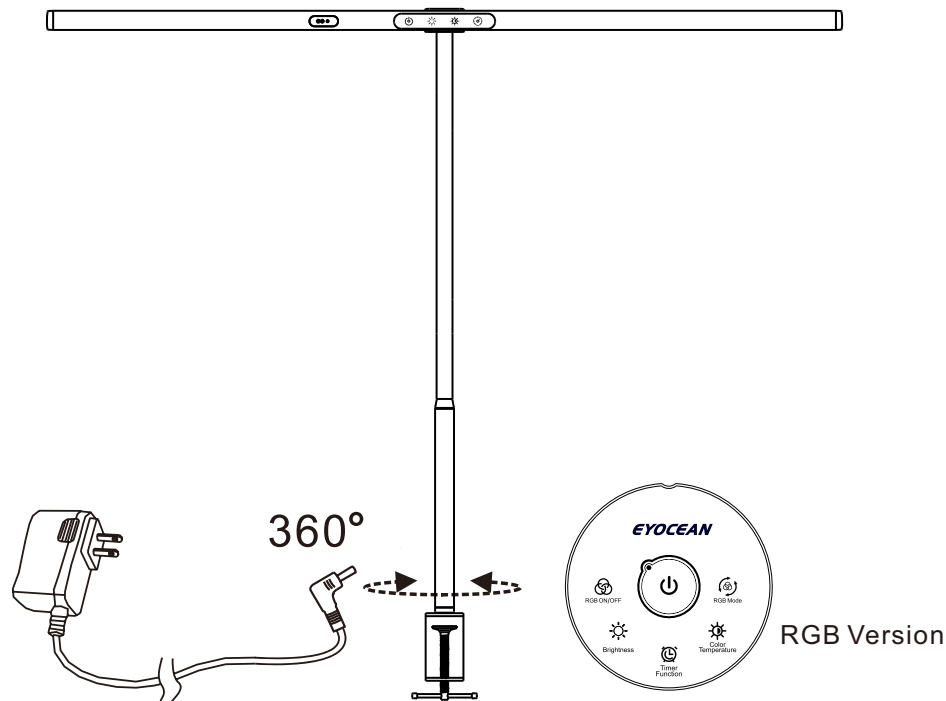

Common problem about remote control:

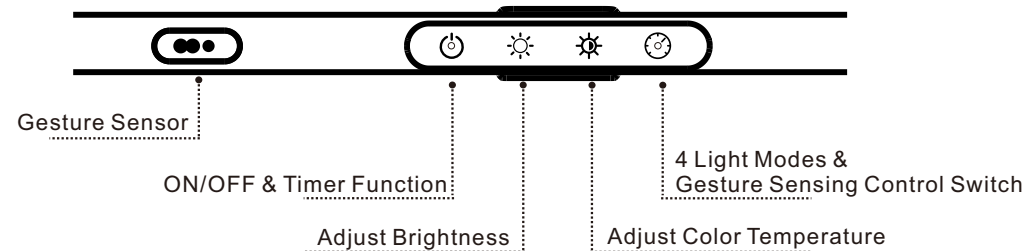

1. The working range of remote control is 10 meters / 32.8 foot, please use the remote control within this distance.
2. Remote control needs to replace batteries. Due to the limitations of some polices, batteries are not included, you need to use 2 AAA batteries to power the remote control, usually the batteries can be used continuously for more than 6 months. If you don't use it for a long time, please take out of the batteries.
3. The remote control and the desk lamp have been matched before leaving the factory, you can use it directly. If remote control doesn't work, please reset the remote control follow these steps.
 - a. Make sure the battery is normal.
 - b. When the remote control cannot control the desk lamp, please unplug the adapter first, and plug it in again to supply power to the desk lamp. Long press the + buttons same time for 15 to 25 seconds, the desk lamp will flash alternately once, the reset is successful.
 - c. If the remote still doesn't work yet, you can repeat the steps above and try again.

You can also control other products of our brand with one remote control at the same time through the reset operation. If you have any other problems that you can't solve, please contact us through eyocean-eu@outlook.com, and we will provide a satisfactory solution for you.

(CLED-3907C)

Timer Function(10/40 Mins)
Press 1st: activates 10 mins OFF function.
Press 2nd: activates 40 mins OFF function.
Press 3rd: Close the function.
