# FAQs

1. Why the watch cannot be searched in the App?

A: a. When the Bluetooth on the watch is not searched by the mobile phone during Bluetooth broadcast, the Bluetooth on the watch will sleep. Please turn off the Bluetooth on the watch and that on the mobile phone and search and connect

the Bluetooth again about one minute later.

b. The GPS positioning function on the mobile phone must be turned on. In "Setup" on the mobile phone using Android operating system, be sure to allow the App to obtain the positioning authority.

2. Why no reminders are received after the reminder function has been enabled?

A: If the message notification function and the corresponding notification authority have been enabled, the Bluetooth on the mobile phone should be kept on and connected to the watch at all times. For example, only when WeChat or QQ has not been logged in on other clients will the message reminder function on the watch be available when any message pops up on the mobile phone. A mobile phone using Android operating system must allow the App to run in the background and set white lists.
