

# TF39 Quick Operation Guide

(Read Before Use)

## 1. Model Compatibility Instructions

This device is compatible only with the following phone models:

**USB-C interface devices:** iPhone 15/16 series, Android phones (must support OTG functionality, displayport alternate mode).

**Incompatible devices:** iPhone 14 and earlier models (Lightning interface), Android phones with non-USB-C interfaces.

### How to confirm your phone's interface type:

Check the charging port's shape. An oval-shaped port indicates a USB-C interface; a narrow, rectangular port indicates a Lightning interface.

USB-C interface devices

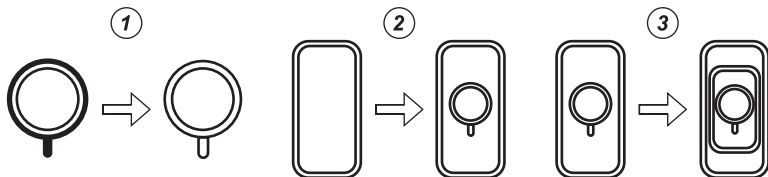

Incompatible devices

## 2. Device Connection and Settings

- 1) Connect the device to your phone using the **included data cable**.
- 2) Open Settings on your phone and ensure **USB Debugging** or **OTG Mode** is enabled.

## 3. Magnetic Attachment Instructions

- 1) Align the back of the device with your phone's back cover, ensuring the magnetic strip faces the center.
- 2) If the magnetic attachment is weak: Check if your phone case is too thick or made of non-magnetic material.
- 3) For stronger adhesion: Attach the included magnetic sheet to your phone or case, then align the device with the plate.

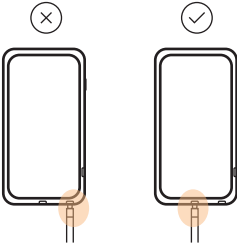

## 4. Troubleshooting

### 1) Device Not Working

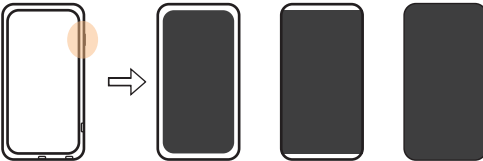

A. Ensure the cable is connected to the **data interface** (located at the bottom center of the device), not the charging/audio port.

B. Restart your phone or reconnect the cable.

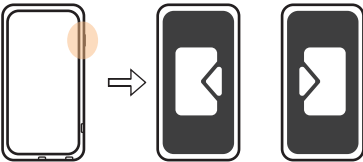

### 2) Adjusting Screen Aspect Ratio

Short-press the MFB key to cycle through three modes: 1:1, Reduced Horizontal, and Full Screen.

### 3) Video/Image Appears Reversed

Long-press the MFB key to toggle mirror mode.

### 4) Even After Charging, It Cannot be Turned on

Our device has no separate switch button or built-in battery, offering plug-and-play convenience and ease of use.
