# At the bottom

BW4

# Indicator light definition

<b>Reset</b>	Green light flashes 
<b>Charging</b>	Red light 
<b>Fully Charged</b>	Off 
<b>No network</b>	Blue light flashes 
<b>Wifi connected</b>	Blue (when it wakes up) 
<b>Sleep</b>	Off

# Quick start

## Power-on

Press and hold the power button until you hear the prompt, and the indicator light flashes blue slowly.

## Reset

Press and hold the reset button for about 3 seconds, the green indicator light flashes, and the camera finish reset when the blue light is on.

## Step-1 >>>

## Download the APP

Scan the QR code to download the APP.  
Or search for "O-KAM" to download through the app store  
(Google play/ APP Store).

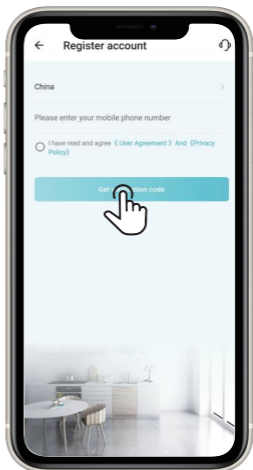

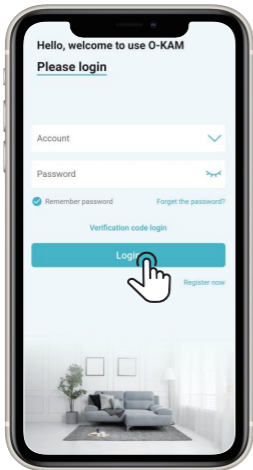

O-KAM

# Step-2 >>> APP account registration

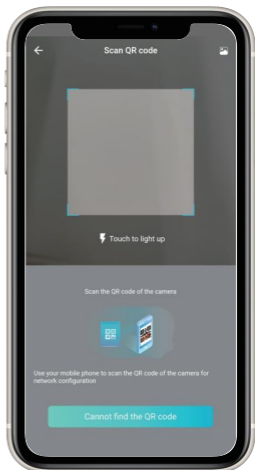

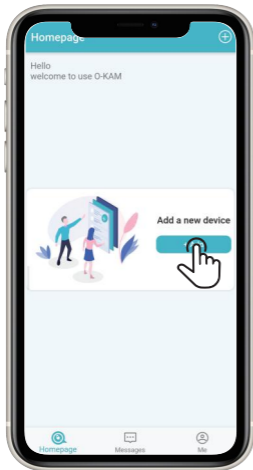

## ① Click "Register now" at the login interface

- Select the address
- Enter your phone number
- Get the verification code.

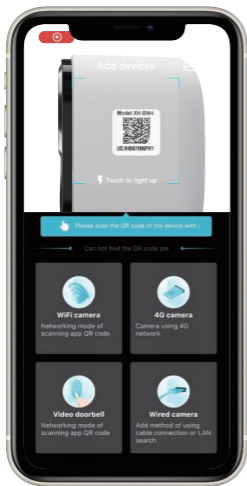

## ② After entering the verification code you need to set the password and click Finish.

- ① Log in and click "Add" button found at the "Home" interface or click the "  " in the upper right corner.

- ② At the QR code scanning interface, scan the QR code on the camera.

3

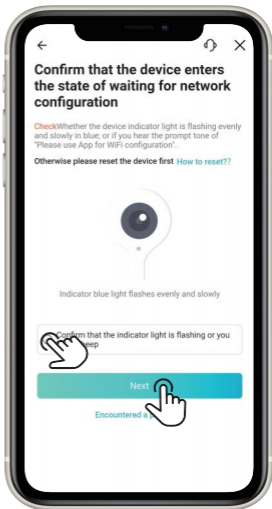

Switch the camera "On".  
 (No need for "Long press")  
 Click "Next" when the indicator  
 light flashes in blue slowly.

4

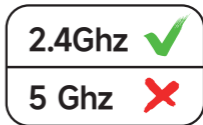

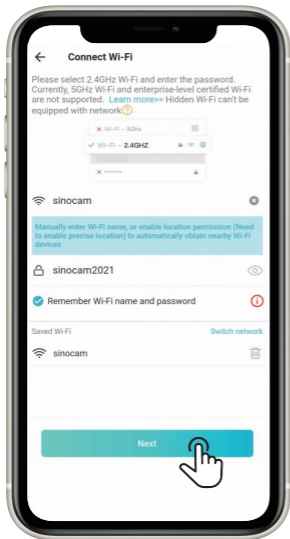

Confirm that the camera is  
 ready for WiFi configuration  
 when the indicator light  
 flashes in blue slowly. And  
 click "Next"

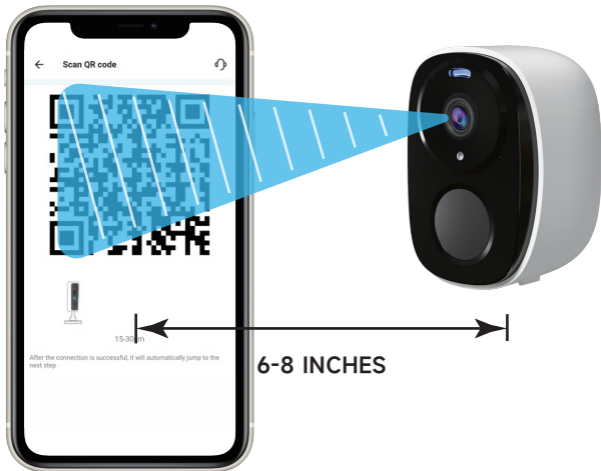

Enable the location service of your phone, and allow the O-KAM APP to access the location. Confirm the WiFi and enter the password.

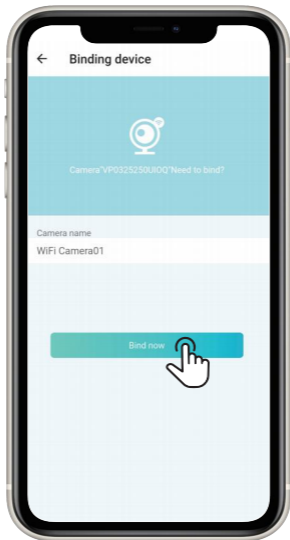

\* Make sure the Wi-Fi is 2.4Ghz. WiFi password case sensitive.

The APP will automatically generate a QR code. Point the camera lens at the QR code and keep it at a distance of 6-8 inches. You'll hear a beep and voice prompt when it's scanned successfully.

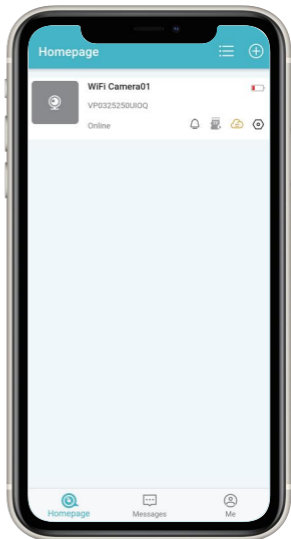

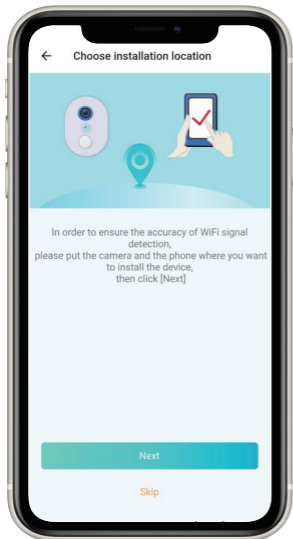

When the device is connected to the WiFi, name the camera and click "Bind Now".

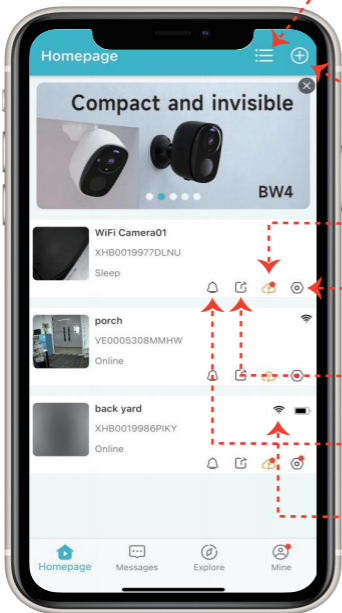

Please take the camera and phone to the location where you're going to install the camera, and then click "Next" to test the signal strength.

Make sure there is strong WiFi signal strength at the location.

# Step-5 >>> APP function introduction

## ① Home introduction.

Multi-device view

Add device

Cloud service

System settings

Share camera

Do not disturb mode

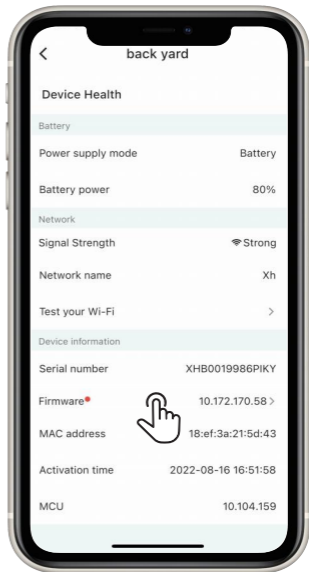

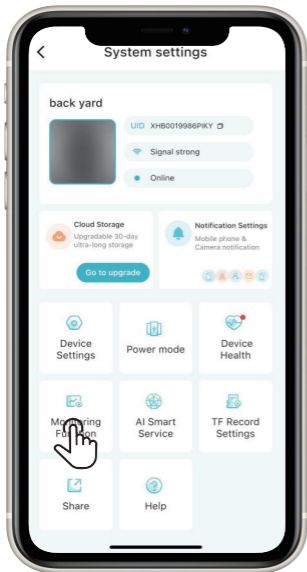

WiFi display

# Step-6 >>>

# Monitoring settings

Enter system settings "🏠"-monitoring function  
Tap on the "Device Health"- "Firmware" to update (Suggested)

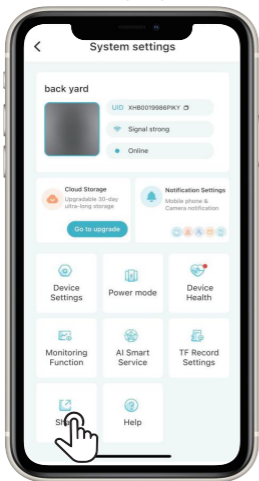

# Step-7 >>>

# Share the device

Enter the system settings "  "- Share

Sharing method: Share the QR code to a user. The other user adds the camera by scanning the QR code; The QR code is valid for 30 minutes, and one QR code can only be shared with one user. Generate more QR codes for more members. Maximum of 4 people can live view.
