| ② 1* 12" Ring Light | ⑤ 1* USB Cable |
| ③ 1* Phone Holder | ⑥ 1* User Manual |

Bluetooth Remote Shutter

Owner's Manual

Step 1: Pairing

- A. Turn on the remote using the power switch on the side.
The blue LED indicator will start flashing.
- B. Enable Bluetooth on your phone and select "UBeesize" from the list of available devices.
The blue LED indicator will stop flashing once the connection is successful.

Step 2: Taking Photos

Open your phone's camera app.

Press the button on the remote that corresponds to your phone's operating system (**iOS for iPhone, Android for Android devices**) to take photos.

Note: If the camera does not respond, your phone may not support this function with the default camera app.

In this case, please download the free app "Camera 360" and use it with the remote.

Step 3: Recording Videos

Switch your phone's camera to Video mode.

Press the button on the remote to start recording.

Press it again to stop recording.

Note for Samsung Phones

1. Open **Camera Settings**, scroll down, tap "Volume keys function", and select "**Record video**".

2. Open the native camera app.

Press the **iOS button** (not the Android button) on the remote to start recording.

Troubleshooting (Optional but Recommended)

- Make sure the remote is powered on and the LED indicator is flashing during pairing.
- Ensure Bluetooth is enabled on your phone.
- If the remote does not appear in the Bluetooth list, turn Bluetooth off and on again, then retry.
- If the camera does not respond, try using a third-party camera app such as Camera 360.

Support

For setup help, usage tips, and warranty support, please scan the QR code at the end of this manual. Press it again to stop recording.
