Common Issues

Q: The controller cannot connect to the receiver or Bluetooth device.

A: Select "Pair" in the on-screen menu, it will display "Pairing," then reopen the phone's Bluetooth or insert the wireless receiver into the device's USB port and keep the controller close to the receiver.

Q: The controller is connected to the device via the wireless receiver, but the buttons are unresponsive.

A: Avoid placing the receiver too far away, ensure there are no obstructions between the receiver and the controller, and minimize electromagnetic interference from nearby electronic devices.

Q: Upgrading the controller firmware.

A: Install Flydigi Game Center on your phone or Flydigi Space Station on your computer, and follow the software instructions to upgrade the firmware.

Q: Setting the standby time.

A: If not used for an extended period, the controller will automatically enter standby mode. Press the HOME button briefly to resume operation. The standby time can be adjusted in the Flydigi Space Station settings.
