Operation

Selecting the language

Click ![English] button and choose the language.

Game Profile Management

Game profiles let you organize all your custom settings. You can save up to five profiles.
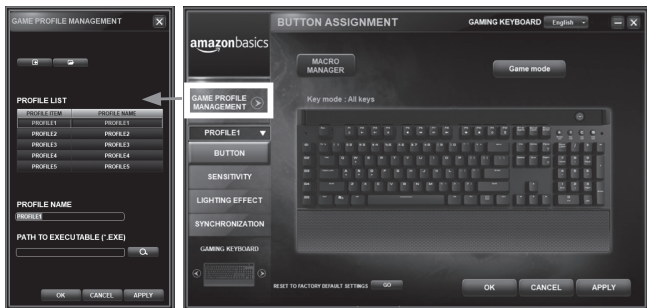

Renaming a game profile

- Select a profile and type in the new name in the text field under **PROFILE NAME.**
- Click **APPLY** and then [ ].
- Choose a file name and location and click **Save.**

Loading an existing game profile

- Click [ ] and browse an existing game profile.
- Click **Open** to confirm.

Linking a game profile to a game/program

- Enter the *.exe file of the game/program in the **PATH TO EXECUTABLE (*.EXE)** field.
- The product detects the relevant profile automatically after the game/program has been opened.

Buttons

Mode key

Press the mode key (D) to toggle between the 5 game profiles.

G1-G5 keys

Press one of the G keys (A) to assign a macro to it (see Macro Manager section).

Sensitivity

Sensitivity settings allow to customize the speed and precision of the product.
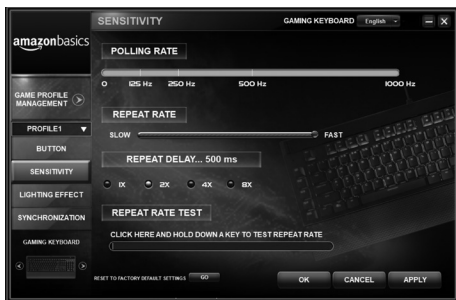

Polling rate

- Polling rate setting configures the number of times the computer prompts the product for information.
- The possible settings are 125 Hz/8 ms, 250 Hz/4 ms, 500 Hz/2 ms, 1000 Hz/1 ms.
- After choosing the setting click **APPLY** to confirm.

| ⚠ **NOTICE** | Some USB hubs may decrease the product's polling frequency. If you experience decreased performance, plug the product directly into the USB port of your computer. |

Repeat rate

- Repeat rate setting configures the repetition speed of a pressed key.
- Move the slider from **SLOW** to **FAST** to adjust the setting.
- After choosing the setting click **APPLY** to confirm.

Repeat delay

- Repeat delay setting configures the pause between pressing the key and when it starts repeating.
- The possible settings are 1x (250 ms), 2x (500 ms), 4x (750 ms), 8x (1000 ms)
- After choosing the setting click **APPLY** to confirm.

Repeat rate test

Hold down a random key continuously into the blank bar to test the speed of repeat rate and repeat delay.

Lighting Effect

Disposal

The Waste Electrical and Electronic Equipment (WEEE) Directive aims to minimize the impact of electrical and electronic goods on the environment, by increasing re-use and recycling and by reducing the amount of WEEE going to landfill. The symbol on this product or its packaging signifies that this product must be disposed separately from ordinary household wastes at its end of life. Be aware that this is your responsibility to dispose of electronic equipment at recycling centers in order to conserve natural resources. Each country should have its collection centers for electrical and electronic equipment recycling. For information about your recycling drop off area, please contact your related electrical and electronic equipment waste management authority, your local city office, or your house hold waste disposal service.

FCC Compliance Statement

1. This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
   (1) this device may not cause harmful interference, and
   (2) this device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Interference Statement: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Canada IC Notice

• This Class B digital apparatus complies with Canadian CAN ICES-3(B) / NMB-3(B) standard.
