How to start the five organs to judge the makeup brush?

Four words:Look, Smell, Question, Touch.

Look: first directly visual check brush flexibility and compliance, if defects can be nakedly found, no considering it.

Smell: gently smell brush, good one cannot smell odour of paint or glue, even a light smell of leather if made of animal hair.

Q: tell your demands to the dresser or professional makeup guide.

Touch: sweep times the brush back and forth on your hand back, or gently separate the hair, then you can find a good one without hair drop. Press the brush head to test how soft it may be.

Made of a variety of high quality hair, the brush is very light and easy to carry.

How to clean makeup brush well?

Steps to wash makeup brush

First, add a small amount of shampoo or makeup remover in warm water and mix it with water at about 3:7. Stir the makeup brush gently in the liquid and rinse it clean.

Second, after washing, apply hair conditioner to the makeup brush, knead evenly and wash with clean water.

Third, roll up the washed brush with a towel to dry the moisture, then open the towel and tidy up the brush again, let the brush soft and smooth, and then dry it in a cool place. When drying, do not put the brush vertically, to avoid the hair from spread or deformed due to gravity, nor put it in the sun exposure.

Fourth, after drying it, gently rub the hair with hand, and then flick it with fingers to restore the hair to a fluffy state. Such, all the cleaning steps are completed.
