

TECHO

Installation Instructions

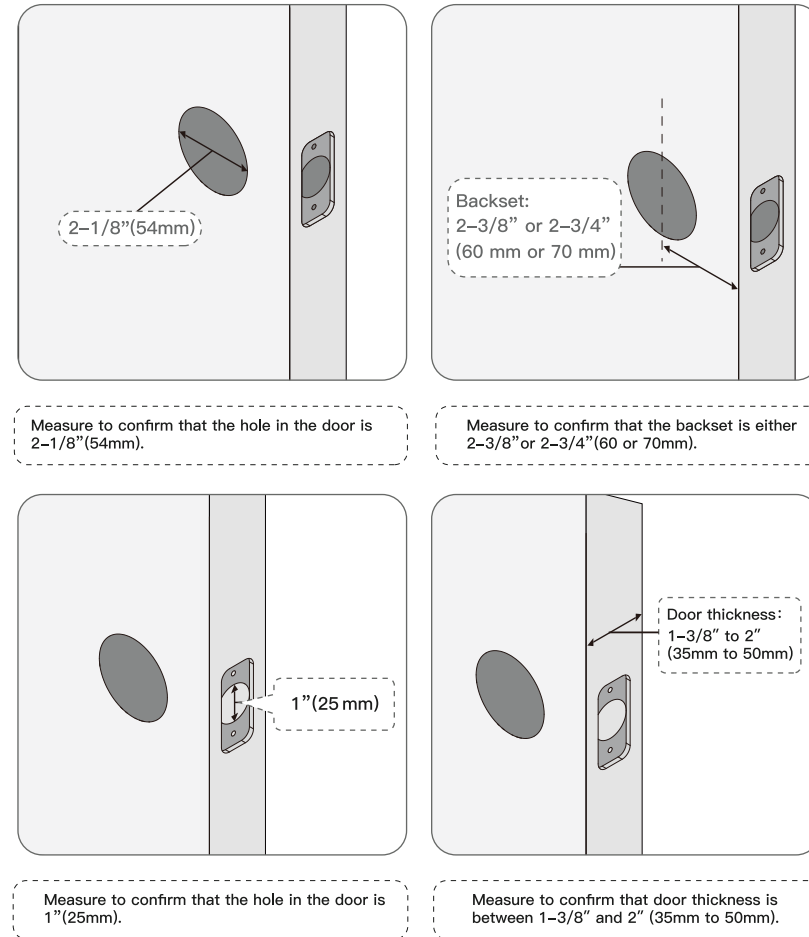

Parts List:

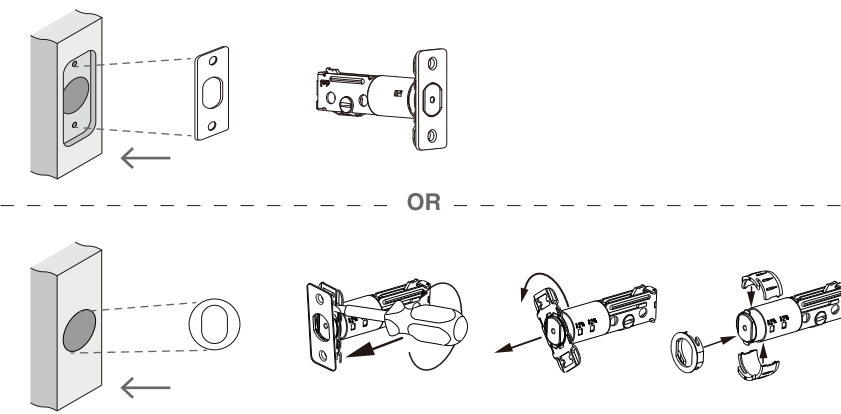

The details of part identification is shown on following page

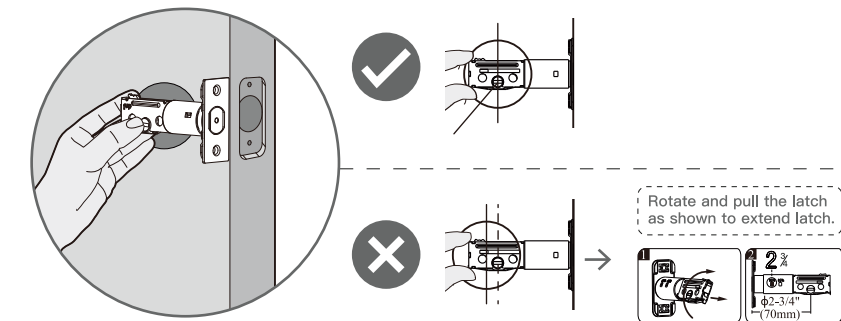

1. Prepare the door and check dimensions

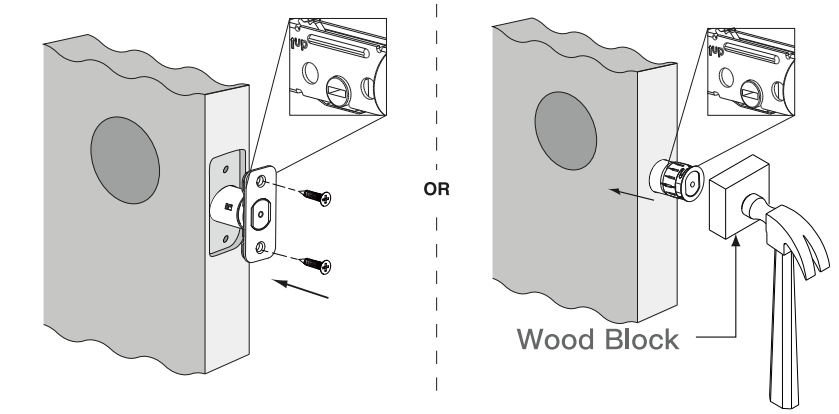

2. Choose faceplate

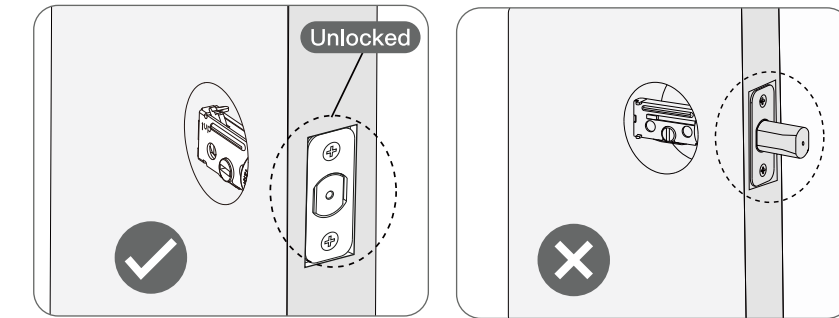

Is the slotted hole centered in the door hole?

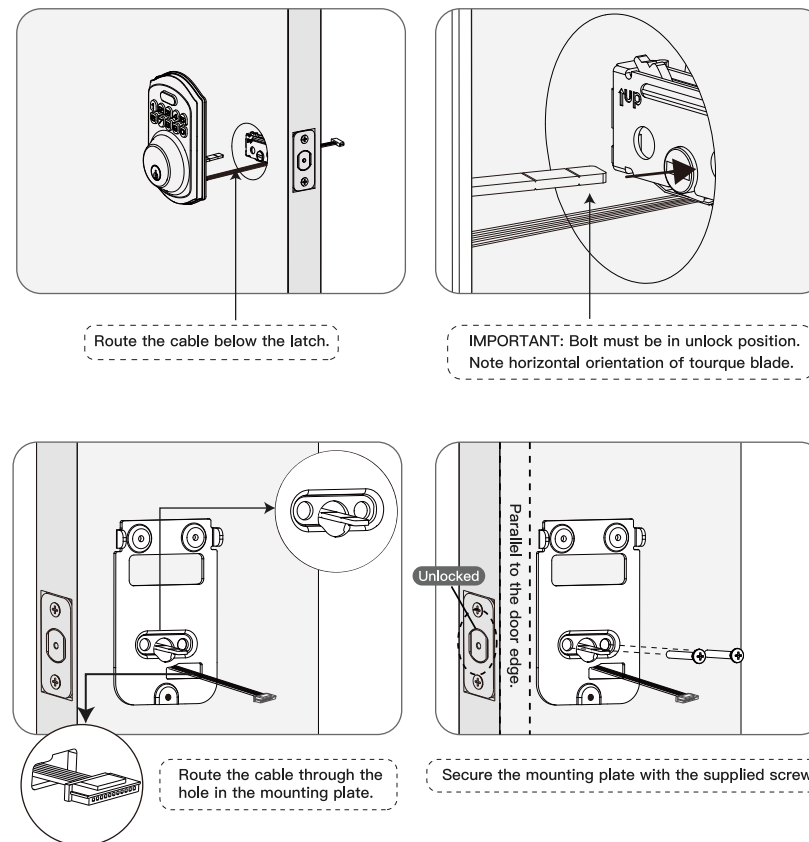

3. Install latch and deadbolt

IMPORTANT: Keep the latch in unlocked position before installation.

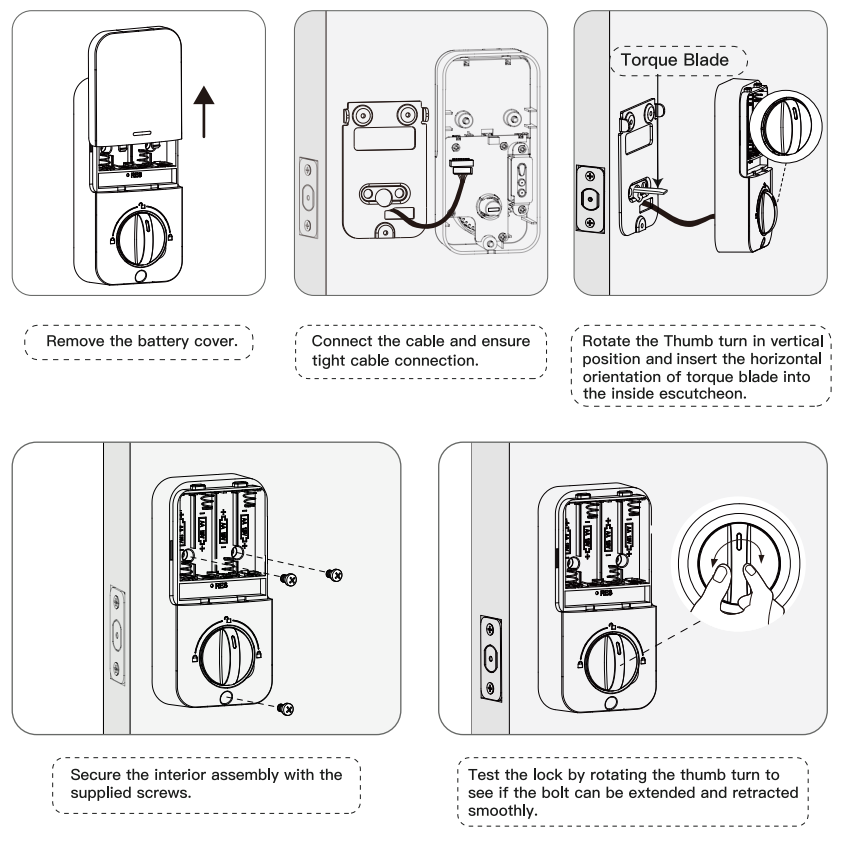

4. Install exterior assembly

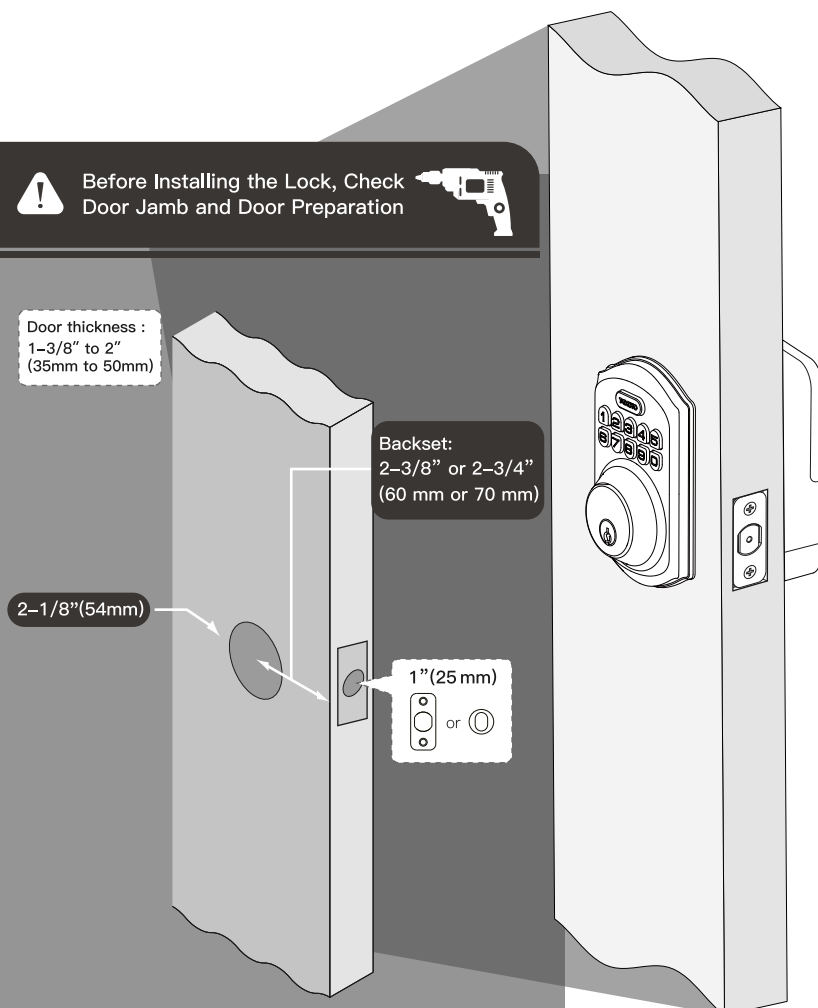

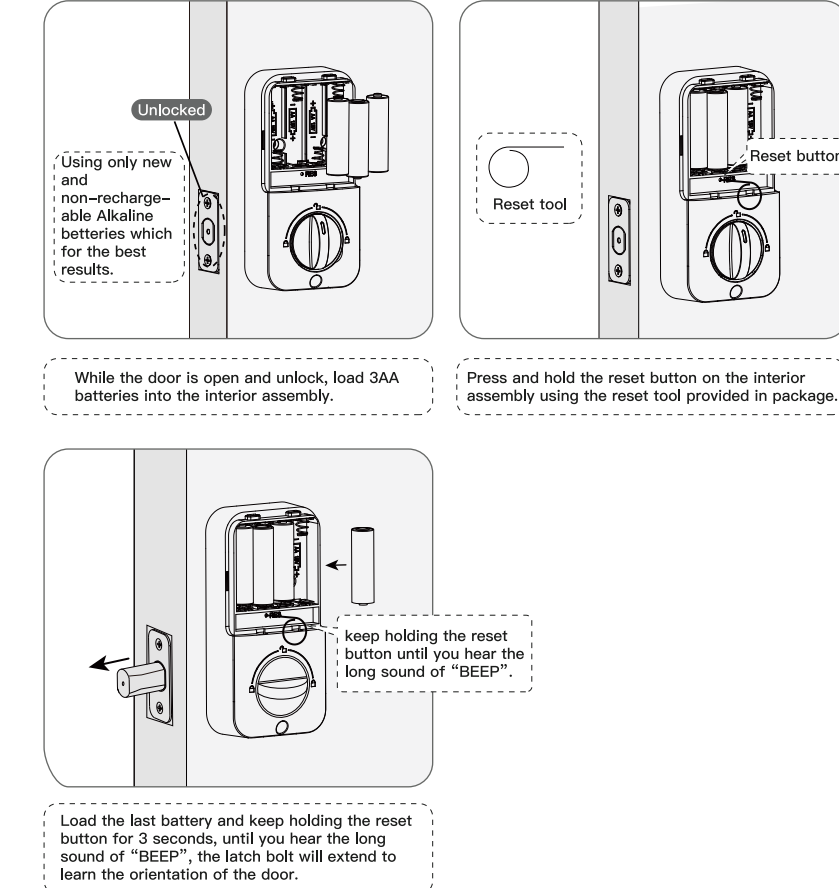

5. Install interior assembly

Do not load batteries until lock is completely installed.

6. Detect left/right hand door installation

IMPORTANT: This step is required and crucial for the lock after installation!
