Hybrid Active Noise-cancelling Bluetooth Headphones

User Manual / Bedienungsanleitung / 取扱説明書

Hybrid Active Noise Cancelling Headphones

1. Product Name: SuperEQ S1

2. Bluetooth Version: 5.0

3. Speaker Rated Input Power: 20mW

4. Speaker Maximum Input Power: 40mW

5. Speaker Diameter: Ø40 mm

6. Speaker Impedance: 32±15%Ω

7. Sensitivity: 98±3dB

8. Battery Capacity: 380mAh

9. Play Time: 40 Hrs (Bluetooth noise-cancelling mode)

10. Play Time: 45 Hrs (Bluetooth mode)

11. Play Time: 50 Hrs (wired noise-cancelling mode)

12. Input: DC 5.0V / 120mA

13. Charging Time: About 2 hours

14. Noise Reduction Depth: 28~33 dB

15. Bluetooth Range: ≥10m/33ft

16. Frequency Response: 20Hz~20KHz

ハイブリッドアクティブノイズキャンセリングヘッドフォン

1. 製品名: SuperEQ S1

2. Bluetoothバージョン: 5.0

3. スピーカー定格入力電力: 20mW

4. スピーカー最大入力電力: 40mW

5. スピーカー直径: Ø40mm

6. スピーカーインピーダンス: 32±15%Ω

7. 感度: 98±3dB

8. バッテリー容量380mAh

9. 使用時間: 40時間 (ANC + BT)

10. 使用時間: 45時間 (BTのみ)

11. 使用時間: 50時間 (ANCのみ)

12. 入力: DC 5.0V / 120mA

13. 充電時間: 約2時間

14. 騒音低減の深さ: 28~33 dB

15. Bluetooth範囲: 10メートル/ 33フィート

16. 周波数応答: 20Hz~20KHz

Hybride Active Noise Cancelling Kopfhörer

1. Produkt Name: SuperEQ S1

2. Bluetooth Version: 5.0

3. Eingangsleistung des Lautsprechers: 20 mW

4. Maximale Eingangsleistung des Lautsprechers: 40 mW

5. Lautsprecherdurchmesser: Ø40 mm

6. Lautsprecherimpedanz: 32 ±15%Ω

7. Empfindlichkeit: 98±3dB

8. Batteriekapazität: 380mAh

9. Nutzungszeit: 40 Stunden (ANC + BT)

10. Nutzungszeit: 45 Stunden (nur BT)

11. Nutzungszeit: 50 Stunden (nur ANC)

12. Eingang: DC 5.0V / 120mA

13. Ladezeit: ca. 2 Stunden

14. Rauschminderungstiefe: 28 ~ 33 dB

15. Bluetooth-Reichweite: 10 Meter / 33 Fuß

16. Frequenzgang: 20Hz ~ 20KHz

Product overview / Diagramm / 製品概要

Status indicator

Indication	LED status	Voice prompts
Power on	Stay on white for 2 seconds	Power on
Power off	Stay on red for 2 seconds	Power off
Standby	White light flashes for every 5 seconds	
Pairing	Flashes red and white alternately	Pairing
Battery low	Red light flashes for every 5 seconds	Battery level low
Charging	Stay on red when charging / Stay on white when fully charged	
Pairing timeout	The white and red indicator lights flash alternately and quickly. The headset will automatically turn off after 5 minutes	Power off

Tips: When the distance between the Headphone and phone is beyond effective range, Headphone disconnects with the phone. The headphone will power off automatically once no activity for 10 minutes.

ステータスインジケータ

電源オン	LED ステータス	ガイド音
電源オフ <td>白ランプが2秒点灯</td> <td>Power on</td>	白ランプが2秒点灯	Power on
スタンバイモード <td>白ランプが5秒点灯</td> <td>Power off</td>	白ランプが5秒点灯	Power off
ペアリング <td>赤と白ランプが交互に点滅</td> <td>Pairing</td>	赤と白ランプが交互に点滅	Pairing
バッテリー残量が少ない <td>赤と白ランプが交互に点滅</td> <td>Battery level low</td>	赤と白ランプが交互に点滅	Battery level low
充電中 <td>充電時の場合は白ランプが点灯します/充電完了の場合は白ランプが点灯します</td> <td></td>	充電時の場合は白ランプが点灯します/充電完了の場合は白ランプが点灯します	
ペアリングタイムアウト <td>白と赤のインジケータライトが交互点滅に点滅します。ヘッドホン は 5 分後に自動的にオフになります</td> <td>Power off</td>	白と赤のインジケータライトが交互点滅に点滅します。ヘッドホン は 5 分後に自動的にオフになります	Power off

ご注意: ヘッドホンと電話の間の距離が有効範囲を超えると、ヘッドホンは電話との接続を切断します。10分間アクティブでなくなると、ヘッドフォンの電源が自動的にオフになります。

Statusanzeige

Anweisung	LED-Status	Sprachansagen
Ein	Leuchtet 2 Sekunden lang weiß	Power on
Aus	Leuchtet 2 Sekunden lang rot	Power off
Bereithalten	Blinkt alle 5 Sekunden weiß	
Koppeln	Blinkt zwischen rot und weiß	Pairing
Batterie niedrig	Alle fünf Sekunden blinkt einmal rotes Licht	Battery level low
Aufladen	Bleibt rot während des Ladevorgangs/bleibt weiß nach dem vollständigen Aufladen	
Koppeln Time-Out	Die weißen und roten Anzeigelampen blinken abwechselnd und schnell. Das Headset schaltet sich nach 5 Minuten automatisch aus.	Power off

Charge The Headphones / Aufladen / ヘッドホンを充電する方法

Pair another phone

Multipoint technology enables you to pair another phone and take a call from either.

To pair with another mobile phone, follow the steps for "Pair one phone". After pairing successfully, restart the earphone to connect to 2 paired mobile phone automatically.

Calling switch

When the first phone call rings, press the multifunction button once to answer the call, if the seconds call rings at this moment, you can answer the second phone by double-click multifunction button, and on hold the first phone call.

Warning

The in-flight adaptor lets you enjoy balanced sound from the in-flight entertainment system while travelling in a plane.

The in-flight adaptor is NOT MEANT to charge your device. Plugging the in-flight adaptor into a AC Power Socket to charge the headphones will cause severe damage to the device.

Q&A

Q: Why can't my headphones be used after charging/can't be turned on after using them for a period of time?

A: 1. Please eliminate the problem of insufficient power of the headphone. If the charging current is unstable, it will have an impact on the charging module, which may cause it to enter the protection mode after charging (it cannot be turned on).
2. Please use the 3.5mm audio cable in the headphone accessory to plug into the headphone 3.5mm jack to complete the factory reset. Then you can use the headphone again.
3. If your problem cannot be solved, we hope that you can get in touch with our official customer service email.

Q: What kind of charging plug should I use?

A: In order to avoid fire or burn the charging IC during charging, we have set up over-voltage protection for the headset. If you use a charger that exceeds 5V, the headset will automatically enter the overvoltage protection condition, thereby stopping charging. It is recommended to use the original 5V charging plug.

Q: What is Ambient Sound Mode?

A: Using unique ambient sound technology, bionic hearing allows you to hear your surroundings. Music is lowered and speech is amplified through mics in these soundproof headphones so you can easily communicate with without removing your ANC headphones.

Q: Why do I feel that the sound of the surrounding environment is clearer after hearing the headphone?

A: Because you may have turned on ambient mode. Its functional principle is using unique ambient sound technology, bionic hearing allows you to hear your surroundings. Music is lowered and speech is amplified through mics in these soundproof headphones so you can easily communicate with others.

Q&A

Q: Why is the signal of the headphones intermittent?

A: 1. The 10-meter effective distance of a Bluetooth headphone is a Bluetooth distance in an unobstructed environment. For example, when the headphone signal is used indoors, it will be weakened by passing through a wall.
2. If in areas with high traffic such as airports, train stations, subways, bus stations, shopping malls, and areas with dense signal sources such as signal lights and monitors, Bluetooth headphones are prone to signal instability.

Q: Why can't my headphone enter pairing mode?

A: After turning on the headphone, you need to press and hold the shutdown button for 5-6 seconds. When you see the signal lights flashing alternately and quickly, it means that the headphone has entered pairing mode. If you press the shutdown button for a too short time, you cannot enter the pairing mode.

Q: When using active noise reduction headphones, the exterior feels very noisy/noise reduction effect is not obvious?

A: Active noise cancelling headphones mainly eliminate low-frequency noise rather than high-frequency noise. Because low-frequency noise has the characteristics of slow transmission speed, the chip of the active noise reduction headset has sufficient response time to offset the opposite band of low-frequency noise. The high-frequency noise has the characteristics of fast transmission and attenuation. When the noise is generated, due to its faster transmission speed, the chip of the active noise cancelling headset does not have enough response time to capture and process it.
