"PROTECTION" has always been our motto and guiding principle. We care for the environment. The product packaging has been made of recyclable, enviroment-friendly material. We urge you to recycle the packaging material or take it to the nearest recycling facility rather than dispose it off with the rest of your waste.
Your appliance had been designed to work for many years, however, should you wish to upgrade or replace your old product, remember to help protect the environment by disposing it off at your local e-waste disposal centre. Should you have queries, the nearest authorised service centre of Eureka Forbes will be able to guide you.
Allow us to become your environmental partner; together we can make the world a cleaner place.

User Manual
For your benefit and safety, please read this manual in detail.

ABOUT THIS USER MANUAL

Congratulations on the purchase of your Aeroguard Air Purifiers and welcome to the Eureka Forbes family. We encourage you to read this user manual carefully and save it for future reference.

INTRODUCING AEROGUARD MIST FROM EUREKA FORBES

We all know that the air outside can be very unhealthy and polluted, but most people do not realise that the indoor air quality (IAQ) of their homes can be even worse. There are various particulate matters polluting our homes that arise out of numerous sources such as industrial pollution, construction sites, combustion, pollen etc. Particles are also generated by all kinds of normal indoor activity ranging from cooking, walking across the carpet and from your pets. Even the electronic appliances and furnishings in your home pollute indoor air. Airborne allergens, mold-spores, bacteria and dust mite/insect faeces are also part of it.

This is nowhere near an exhaustive list of indoor particulate pollutants, but what is truly disturbing is that many of these particles will go deep within the lungs and trigger allergic and asthmatic reactions. With more of our time spent indoors, reducing these invisible substances from the air around us is important because they can impact our health.

Your living room is your personal family space. And only invited guests should be welcome. Not the millions of microbes and other pollutants that are present in the air indoors. Aeroguard MIST and it's multi-stage **ACTIVESHIELD**™ filtration system is the answer to keep a continuous flow of clean and pure air. It blends science and aesthetics, making it the perfect accessory to spruce up your living room.

It's powerful 6 stage **ACTIVESHIELD**™ Filtration system ensures that the air you breathe is not just absolutely pure but healthy too.

STATE-OF-THE-ART TECHNOLOGY

POWERFUL 6 STAGE ACTIVESHIELD™ FILTRATION SYSTEM

ACTIVE 10x PRE FILTER
Filters out large particles such as dust, dirt and pet dander.

ACTIVE CARBON FILTER
This high-absorption activated carbon filter effectively filters out bad odour, smoke and various toxic gases.

HONEYCOMB ACTIVE CARBON FILTER
This highly porous filter gives the carbon a larger surface area to chemically bind and absorb more impurities like Volatile Organic Compounds (VOCs) and other noxious gases that do not get captured in the earlier stages.

ACTIVEHEPA™ FILTER
The ActiveHEPA™ filter can remove airborne pollutants down to 0.3 microns in size with an efficiency of 99.9%. The significance is that the ActiveHEPA™ Filter operates on the nanoscale, dealing with the ultrafine particles which other air purifiers cannot remove. The ActiveHEPA™ Filter eliminates bacteria, pollen, mold, and combustion particles from automobiles and smoke through a nano-fibre structure.

ACTIVE OXIDATION™ CELL
The UV lamp eliminates microorganisms, sterilises the air stream and activates the photocatalysis process. This process then sterilises and deodorises the air by decomposing Volatile Organic Compounds (VOC's) and by killing bacteria and fungi. It's self-cleaning ability keeps the purification on, and is also safe and stable.

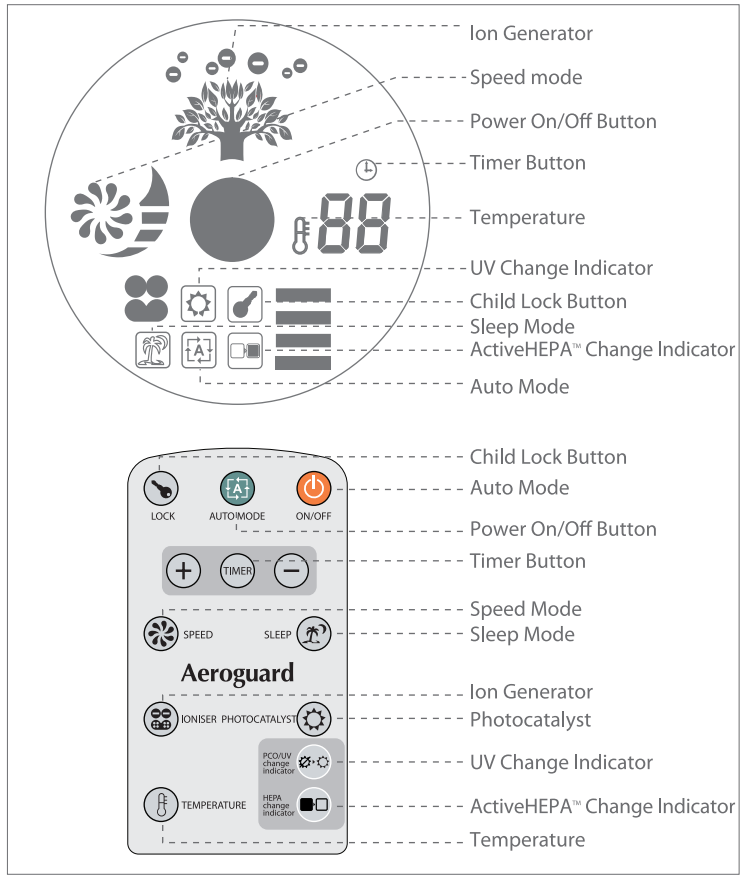

ANION GENERATOR:
Negative ions produced by Aeroguard MIST bind themselves with airborne pollutants and remove them from the air thereby creating a fresher, cleaner and healthier environment.

TROUBLESHOOTING

The following may not be faults, so before sending for maintenance please check and confirm below.

PROBLEM	POSSIBLE SOLUTION
The air purifier does not operate. LED's do not light up	Make sure the power cord is plugged into the power outlet. Check whether the lock function is on. Press the lock function button on the remote control to unlock features
The airflow that comes out of the air outlet is significantly weaker than before. Smoke and odour are not removed	Please check whether the plastic bag of the filter is removed. Make sure nothing is in front or at the back of the air purifier. Check the filter and replace if necessary
Unit emits odour	The air could have been contaminated at the time when the unit was last unplugged. Let the unit run for some time. The filter could be contaminated with some VOC's or gases during the last use. If not due for replacement, continue to run the unit in a ventilated room
Unit emits strange sound and vibrates	Check if the air purifier is placed on a levelled surface. Check for foreign objects obstructing the fan

KNOW YOUR MIST

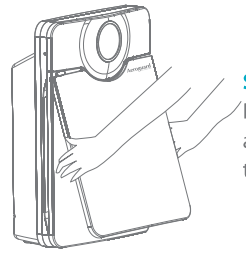

TECHNICAL SPECIFICATIONS

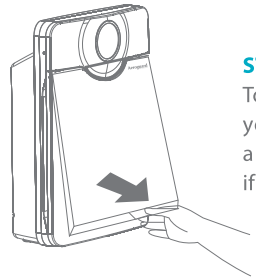

Voltage	220-240V / 50Hz
Power Consumption	56W
Noise	58dB
Net Weight	4.8kg
Dimensions (WxDxH) in cm	35 x 16 x 48
Air Flow	205m^3/h
Applicable Area	24m^2

CHANGING THE FILTERS

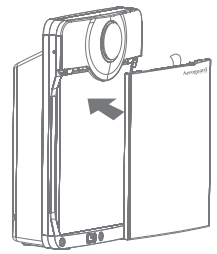

To change the composite filter, please follow the instructions below:

STEP 1
Place your fingers in the recesses of the side panels and gently pull the top part of the front panel towards you.

STEP 2
To remove the composite filter, pull the filter towards yourself by placing your hands on the bottom left and right hand side of the filter. Replace the filter if necessary.

STEP 3
Put the composite filter back into the appliance.
Note: Make sure that the side with the tag is pointing towards you

MAINTENANCE NOTES:
Press the ActiveHEPA™ Timer Reset Button (the indicator will revert to normal and the timer is reset for count again). Always unplug the unit when changing the filter.

OPERATING THE MIST

POWER ON/OFF BUTTON
Press and hold the on/off button for 2 seconds to switch on the appliance.

AUTO MODE
When Aeroguard MIST is switched on, the built-in air quality sensor automatically measures the ambient air quality. The LED indication will be as shown below:

Colour	Red	Orange	Yellow	Green
Air Quality	Bad	Fair	Good	Safe

When the auto mode is activated, Aeroguard MIST selects the most appropriate fan speed for the measured air quality. With this, the lights of the appliance also goes out.

SPEED CONTROL (SILENT, LOW, MEDIUM, HIGH)
If you do not use the auto mode, you can select the desired fan speed yourself.

Note:
Select HIGH if you need an extra strong airflow when the air in the room is very dirty.

SLEEP MODE
When you use Aeroguard MIST in silent mode, it operates very quietly and the fan speed & noise levels are reduced.

1/3/5/8 HOUR'S EASY-TO-SET TIMER
You can operate Aeroguard MIST for a set number of hours and it automatically switches off when set time has elapsed.

OPERATING THE MIST

ION GENERATOR
Depending on personal preferences the ioniser function can be turned On and Off.

PCO
The UV function can be set ON/OFF.

TEMPERATURE
Room Temperature sensor.

LOCK
Prevents unintended changes in the settings.

UV CHANGE INDICATOR
Indicates that UV lamp needs to be replaced.

ActiveHEPA™ CHANGE INDICATOR
The ActiveHEPA™ Filter Replacement Indicator on the Display Panel blinks to indicate replacement of ActiveHEPA™ Filter is required. Under normal operation condition, the ActiveHEPA™ Filter has a lifespan of 2,000 hours. Reset the time after replacement.

MAINTENANCE

THE OUTER CARE:

Basic care for your Aeroguard MIST.

- Be sure to unplug the power cord before cleaning the unit and never handle the power plug with wet hands
- Use a soft, damp cloth when cleaning and if possible use microfiber cloth
- Never clean with gasoline, chemical solvents or corrosive materials as they may damage the surface

The inner care:

It's all about filters.

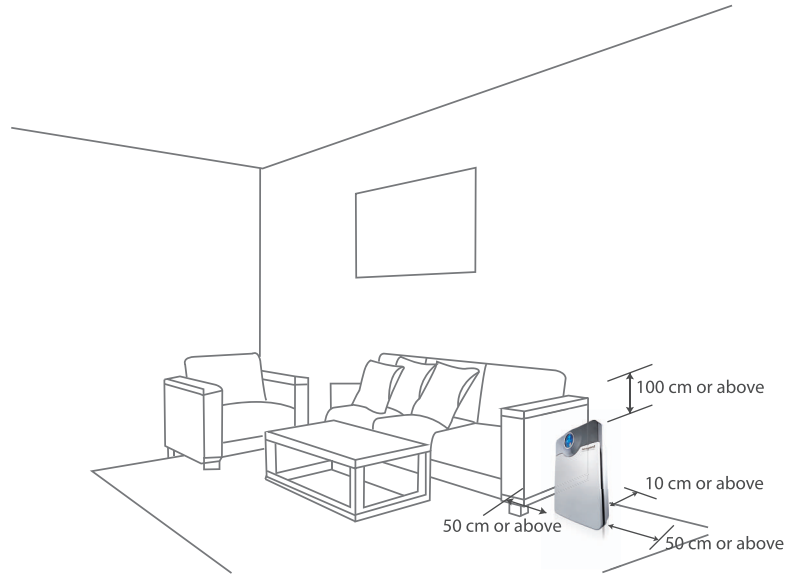

Composite Filter

- The Composite Filter consists of different filters (Active 10x Pre Filter, Active Carbon Filter, Honeycomb Active Carbon Filter and ActiveHEPA™ Filter). This filter should be replaced in every 1 to 3 years depending on the operating environment. The ActiveHEPA™ Filter replacement indicator will blink at 2,000 hours as a reminder to replace the filter. This filter cannot be washed.

INSTALLING THE MIST

Before plugging in the Aeroguard MIST, please open the front cover of the machine and remove the plastic covering of the filter. To avoid electric shock and fire hazards, plug the Aeroguard MIST directly into an appropriate electrical outlet (Use only 220-240 Voltage outlet).

Place the Aeroguard MIST at a certain level that is dry and allows stability. Ensure there is sufficient space around the unit that allows air to circulate freely in, out and around the unit (please see the picture below).

If possible, place Aeroguard MIST at the opposite end of the air conditioner to create a better air circulation pattern. This would capture and filter fine airborne pollutants in an effective manner.

Do not place the unit:

- Directly on or against soft furnishings (such as bedding or curtains)
- Near sources of heat
- Near electronically sensitive devices
- Near or in wet areas (such as bathrooms) and make sure Aeroguard Air Purifier does not come in contact with water

For best results, run your Aeroguard Air Purifier 24 hours a day, 7 days a week. Continuous operation means you get a continuous supply of clean and filtered air circulating throughout the room.

IMPORTANT SAFETY INSTRUCTIONS

PLEASE READ THROUGH THESE SAFETY INSTRUCTIONS CAREFULLY BEFORE USING THE PRODUCT.

TO AVOID ELECTRIC SHOCK AND/OR FIRE HAZARD:
(DANGER ZONE)

- Never handle the plug or the air purifier with wet hands
- Do not let water or any other flammable liquid or detergent enter the appliance
- Do not clean the appliance with water or any other flammable liquid or detergent
- Never use an extension cord as it may cause a short circuit or destroy the unit or may even cause personal injury
- Keep the cord away from heated surfaces and never use it with a damaged cord or a plug
- Do not operate the air purifier near a stove or heater or any flammable gases such as oxygen, natural gas or propane

TO PROTECT YOURSELF AND THE PRODUCT:
(WARNING ZONE)

- It is advisable to use the product indoors only and plug in the right power source as described on the label
- Turn off all the controls before unplugging and always disconnect the cord from electrical outlet before servicing the air purifier
- Do not pull or carry the product by the cord and do not use cord as a handle

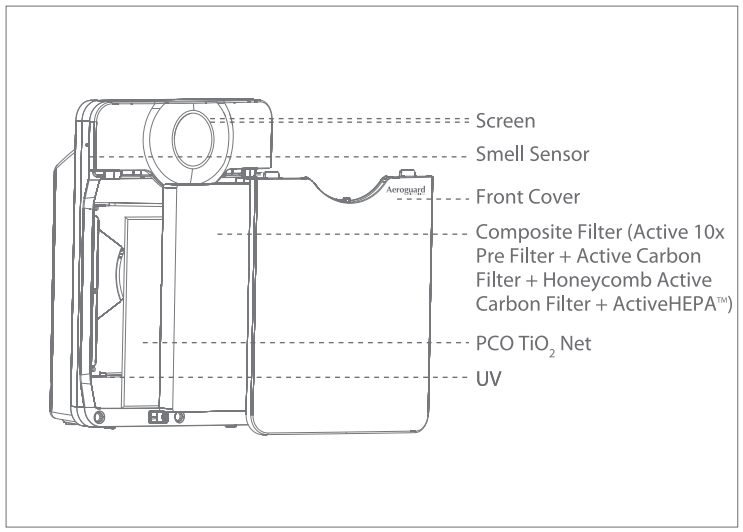

FOR BETTER PRODUCT MAINTENANCE:
(PRECAUTION ZONE)

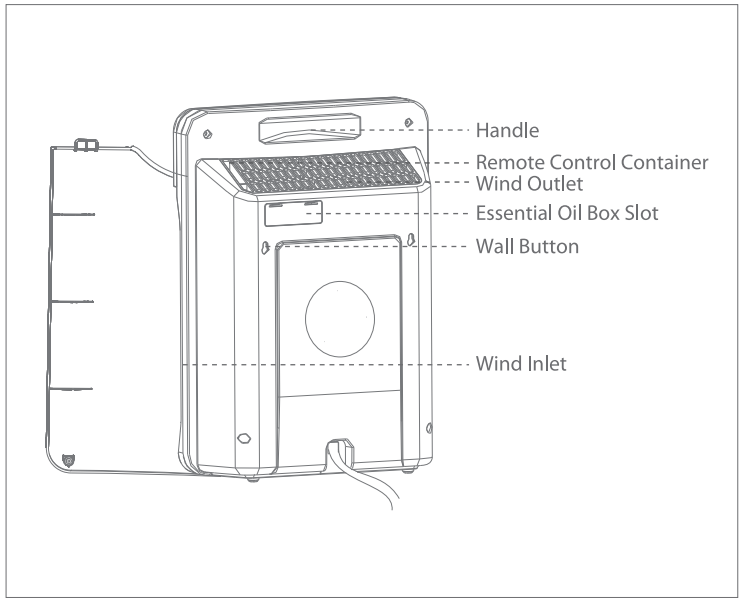

- Never pull the cord around sharp edges, corners or close door on the cord
- Keep the air purifier out of reach of children or invalids to prevent unwanted injuries
- Do not operate the air purifier near a shower, bathtub or in the place where steam may be present
- Always grasp and pull the plug, and not the cord to unplug
- Never tamper cover openings with any object

REMEMBER
If the supply cord is damaged, it must be replaced by the service agent or similar qualified person to avoid hazardous accidents.

KNOW YOUR MIST

For better understanding of your product, let's take a step-by-step look.

WARRANTY

Aeroguard Air Purifiers come with a warranty for devices with faulty design, workmanship and materials, for a period of 12 months from the date of the invoice, intended for or available to customers who bring in appliances to the seller or a repair store for repair or servicing, subject to the following conditions:

1. The customer will notify the Company properly about any defects noticed and give the Company or its authorised dealer sufficient opportunity to inspect, test and remedy them, for which the customer will deposit the goods, if necessary, with the company's office/service centre along with the original invoice, in the city where they are sold.
2. Inspection and test report of the Company's office/ service centre will be treated as final and binding under the warranty for determining defects, repairs/ alterations required or carried out, or certifying working of the goods thereafter.
3. The Company or its authorised dealer will be entitled to retain any defective parts replaced under the warranty.
4. The Company's liability under the warranty will be limited only to defects which occur under the conditions of normal operation and under proper use. It excludes defects occurring because of abuse, faulty care or maintenance, repair/alterations to goods or parts by others, use on electrical supply for which the goods are not designed or to damage caused by lighting or other electrical disturbances.
5. Components subject to wear, such as Composite Filter(s)*, are not covered by this warranty.
6. The customer will have no claim under this warranty in respect of any personal injury, damage to property or consequential damages, or for utilization of the goods not in accordance with user manual.

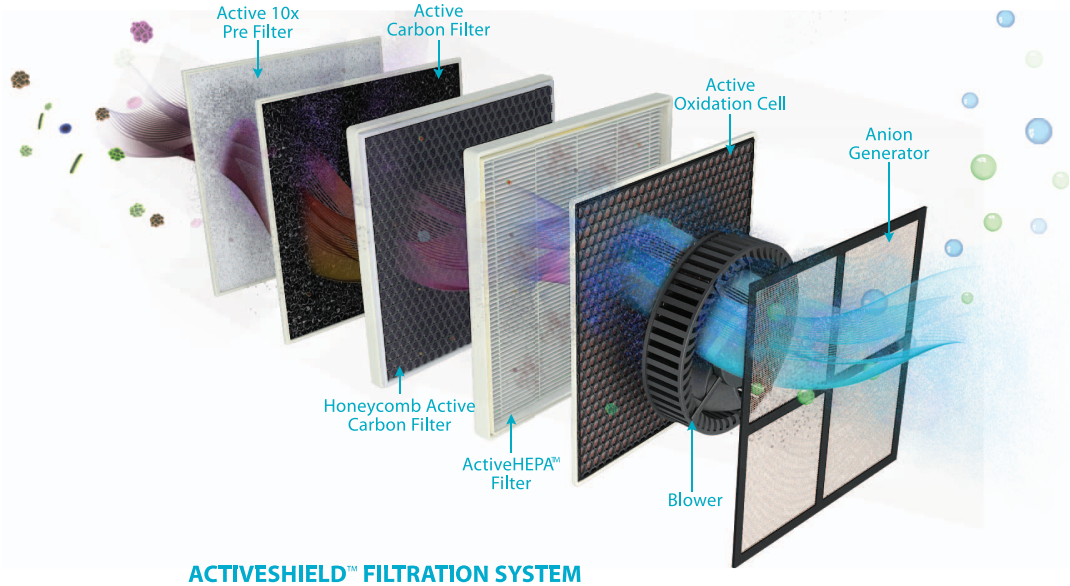

NOTE: The undernoted expressions should have the following meanings:
The goods shall mean goods described in the purchase agreement.
The Customer shall mean the original purchaser under the purchase agreement.
The Company shall mean 'EUREKA FORBES LIMITED.'

NB:
For registration of the warranty, please fill up the details in the warranty card and mail the same to Eureka Forbes Limited.

POST WARRANTY
The customer may be offered a yearly Service Contract at the prevailing Company rates and terms.
In case the Customer does not wish to enter the Service Contract, he has the option of calling our Service Centre and having his Aeroguard MIST serviced on an actual basis i.e. by paying for labour cost and spares needed to attend to that Service/ Complaint call at the prevailing Company rates. Such services will be rendered by the Company in towns/places where the Company has its Services Centres.
Eureka Forbes Limited reserves the right to offer an Annual Maintenance Contract/ ensure availability of spares only upto 5 years from the date of invoice.
