| 100% Organic bamboo made, It will not only eliminate the unnecessary clutter on your nightstand but also offer a natural element into your room and give an extra addition of texture.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Built-in upgraded smart chips for safe charging.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Non-slip silicone pads on the bottom offers full-round protection for your devices.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| How to Set the Time?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <p><b>Single press the "time setting button" to enter time setting mode, the setting order will be hour -&gt; minute setting. Hold the time "time setting button" to turn on or off the sleep mode and directly enter the time setting mode.</b></p> <ol style="list-style-type: none"> <li>1. Single press the "Hour Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of hours is 12.</li> <li>2. Single press the "Minute Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of minute is 60.</li> <li>3. In time setting mode, the alarm clock symbol will not be displayed, and the "Hour And Minute" will keep displaying for a long time. But If you turn on the sleep mode, the sleep symbol will be on and vice versa.</li> <li>4. If sleep mode is turned on and not in time setting mode or alarm setting mode, the screen will off after 30 seconds and only keep the sleep symbol on.</li> <li>5. In sleep off screen state, single press any button will turn on the screen. But the screen will be re-off after 30 seconds if there is no operation.</li> </ol>                                                        |
| How to Set the Alarm Clock?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <p><b>Single press "Alarm Clock Setting Button" to enter or exit the alarm clock mode. Long press to turn on or off the alarm clock function.</b></p> <ol style="list-style-type: none"> <li>1. Single press the "Hour Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of hours is 12.</li> <li>2. Single press the "Minute Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of minute is 60.</li> <li>3. In alarm clock mode, the "hour and minute" start to flash synchronously for modification, and the alarm clock symbol will be displayed. But the alarm clock symbol remains on if the alarm clock is on. The alarm clock symbol and alarm time flashes together if the alarm clock is off.</li> <li>4. When the alarm clock is turned on and an alarm is on, it will ring for 3 minutes( ring for 28 seconds and stop for 2 seconds, repeating 6 times for 180 seconds). Then stop for 9 minutes, ring for another 3 minutes and automatically end. You can press any key to stop the alarm.</li> </ol> <p>In the Time Setting Mode and Alarm Clock Setting Mode, wait for 8 seconds to confirm the current setting.</p> |

| How to Set the Light?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Special holder for Samsung watch charger, and watch charger is included!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 100% Organic bamboo made, It will not only eliminate the unnecessary clutter on your nightstand but also offer a natural element into your room and give an extra addition of texture.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Built-in upgraded smart chips for safe charging.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Non-slip silicone pads on the bottom and top offer full-round protection for your devices.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| How to Set the Time?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <p><b>Single press the "time setting button" to enter time setting mode, the setting order will be hour -&gt; minute setting. Hold the time "time setting button" to turn on or off the sleep mode and directly enter the time setting mode.</b></p> <ol style="list-style-type: none"> <li>1. Single press the "Hour Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of hours is 12.</li> <li>2. Single press the "Minute Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of minute is 60.</li> <li>3. In time setting mode, the alarm clock symbol will not be displayed, and the "Hour And Minute" will keep displaying for a long time. But If you turn on the sleep mode, the sleep symbol will be on and vice versa.</li> <li>4. If sleep mode is turned on and not in time setting mode or alarm setting mode, the screen will off after 30 seconds and only keep the sleep symbol on.</li> <li>5. In sleep off screen state, single press any button will turn on the screen. But the screen will be re-off after 30 seconds if there is no operation.</li> </ol>                                                        |
| How to Set the Alarm Clock?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <p><b>Single press "Alarm Clock Setting Button" to enter or exit the alarm clock mode. Long press to turn on or off the alarm clock function.</b></p> <ol style="list-style-type: none"> <li>1. Single press the "Hour Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of hours is 12.</li> <li>2. Single press the "Minute Adjust Button", then add 1 to the digital. If you keep pressing and holding it, it will quickly add, and it will restart from 0 if it exceeds the corresponding value. The maximum number of minute is 60.</li> <li>3. In alarm clock mode, the "hour and minute" start to flash synchronously for modification, and the alarm clock symbol will be displayed. But the alarm clock symbol remains on if the alarm clock is on. The alarm clock symbol and alarm time flashes together if the alarm clock is off.</li> <li>4. When the alarm clock is turned on and an alarm is on, it will ring for 3 minutes( ring for 28 seconds and stop for 2 seconds, repeating 6 times for 180 seconds). Then stop for 9 minutes, ring for another 3 minutes and automatically end. You can press any key to stop the alarm.</li> </ol> <p>In the Time Setting Mode and Alarm Clock Setting Mode, wait for 8 seconds to confirm the current setting.</p> |

| How to Set the Light?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
