

OPERATIONS MANUAL

USING THE PONG TITL STAND

Frequency Settings

Frequency is the rate at which table tennis balls shoot out of the Pong. The higher the frequency setting, the greater the number of balls that shoot out of the Pong. The frequency setting, the greater the number of balls that shoot out of the Pong. The frequency setting, the greater the number of balls that shoot out of the Pong.

Oscillation (Side-to-Side) Settings

Oscillation is the side-to-side movement of the balls as they travel through the Pong. The higher the oscillation setting, the more the balls will oscillate. The higher the oscillation setting, the more the balls will oscillate. The higher the oscillation setting, the more the balls will oscillate.

The Memory Function

The Pong V300 has the ability to save your settings. When you turn the Pong off, the settings will be saved. When you turn the Pong on, the settings will be restored. The settings will be restored. The settings will be restored. The settings will be restored.

Ipong Maintenance

- After each use of the Pong, we suggest you remove the power adapter.
- Clean the balls used in the Pong after several uses. Balls will collect dust on the sides and this might affect the function of the Pong.
- Wipe the Pong after several uses, and pad track into the box or a bag to avoid collecting dust.
- Clean the wheels of the Pong often! This is an important step in maintaining the product. Use the wheels a few times by turning the Pong on the surface of the wheel.
- Clean the motor of the Pong often! First, disassemble the Pong, then pull the agitator straight up lightly to increase the agitator. You will see dust that build around the motor. Carefully remove with a clean cloth.

QUICK START ASSEMBLY INSTRUCTIONS

1. Remove all contents from the box.
2. Attach the Agitator (B) to the top of the Core Engine (A) by aligning the plastic rod on the Core Engine (A) to the hole on the bottom of the Agitator (B) and pressing down until secure.
3. Align the tabs on the Bottom Assembly (D) to the slots at the bottom of the Core Engine (A). Insert and turn clockwise to lock.
4. Align the tabs on the Top Assembly (D) to the slots at the top of the Core Engine (A). Insert and turn clockwise to lock.
5. Before plugging into the electric outlet, insert the A/C Adapter (C) into the back of the Core Engine (A).

FAQ/Troubleshooting Tips

Having trouble with Topspin/Backspin settings?

Remember that when the topspin and backspin settings are set, the Pong will shoot out balls. Check the settings. Customization in the beginning of the user guide.

Ipong won't turn on!

Check to see that the A/C adapter is plugged in all the way.

Core engine not running?

Check to see that the A/C adapter is plugged in all the way.

Agitator not spinning?

Check to see that the A/C adapter is plugged in all the way.

Rubber wheel not spinning?

Check to see that the A/C adapter is plugged in all the way.

Back hitting the side of the projection hole?

Ipong robot work only with 40mm table tennis balls, and work best with plastic table tennis balls.

Balls falling out of projection hole, not shooting?

Be sure you are using the correct sized balls.

Balls not shooting at a consistent speed?

Check to see that the A/C adapter is plugged in all the way.

Ball not shooting off the end of the table?

Be sure you are using the correct sized balls.

Ball not shooting off the end of the table?

Be sure you are using the correct sized balls.

Operating Instructions

NOTE: Ipong should only be used with 40mm table tennis balls.

1. Place the assembled Pong V300 on the table, close to the back and along the middle line. Then, angle the Pong so that the ball is directed off to the right position on the table.
2. Before playing, make sure that the Pong is set up correctly. The Pong should be set up so that the ball is directed off to the right position on the table. The Pong should be set up so that the ball is directed off to the right position on the table.
3. Disperse table tennis balls into the top assembly. 60-100 table tennis balls is the recommended amount.
4. Press the power button (1) and play/pause button (2) immediately after. This gives you time to adjust each setting on the remote to your preferences. Then press the play/pause button to start playing. Review the instructions below on how to customize your settings.

Settings Customization

The Pong V300 uses an upper wheel and lower wheel to control ball spin, speed, and trajectory. When the upper wheel spins faster than the lower wheel, topspin is generated. When the lower wheel spins faster than the upper wheel, backspin is generated. When both wheels are spinning at the same speed, the ball is traveling across the table with no spin.

Note: Due to varying conditions (ball size, dust, humidity, altitude, etc.), the remote control settings provided for the Pong may not be exact. Adjust these settings to meet your desired need.

Settings Overview

Start with the Pong in pause mode (1). Using the plus button (2) and minus button (3) adjust each setting accordingly. For example: Frequency, "1" and Oscillation, "0". (See below for Topspin and Backspin settings.) Then press play/pause button to start (4).

Beginner topspin: This setup will create a slow topspin ball which is ideal for beginning players. First set the robot "12" toward from the back edge of the table. Then set Topspin, "2" and Backspin, "1".

Topspin Settings: First set the Pong at back edge of table. Then set Topspin, "11" and Backspin, "1". For a stronger topspin, increase the Topspin setting from 11 to 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30. If balls are going off the table, decrease the Topspin setting accordingly.

Backspin Settings: First set the Pong at back edge of table. Then set Topspin, "0" and Backspin, "6". For a stronger backspin, and increased distance, change the settings from 0 to 0.7 or 0.8. If balls are going off the table, decrease the Backspin setting accordingly.

BEDIENUNGSANLEITUNG

1. Nehmen Sie die Teile aus der Box.
2. Setzen Sie den Drehräder mit dem Loch auf der Plastikstab auf der Oberseite des Motors und drehen Sie sie zum Einstellen.
3. Setzen Sie den Motor mit den Löchern auf das Unterrohr und drehen ihn bis zum Einrasten.
4. Setzen Sie den Motor mit den Löchern auf das Oberrohr und drehen ihn bis zum Einrasten.
5. Schließen Sie den Netzstecker hinten am Motor an und verbinden Sie ihn mit der Steckdose.

Bedienungsanleitung

1. **HINWEIS:** Pong sollte nur mit dem Pong-Bälle benutzt werden.
2. Stellen Sie sicher, dass sich keine Bälle im Motor befinden, wenn Sie den Pong in Betrieb nehmen.
3. Drehen Sie das Drehräder so, dass sich die Ausrichtung nicht über dem Ballenplatz befindet.
4. Legen Sie die Bälle in das Oberröhrl. Die empfohlene Menge beträgt 60-100 Stück.
5. Drücken Sie die Ein/Aus-Taste und drücken Sie die Play/Pause-Taste. Die ersten Zehn der richtigen Einstellungen an der Fernbedienung auf Ihre Wünsche einzustellen. Danach drücken Sie die weichen Play/Pause-Taste, um zu beginnen. Beachten Sie für Ihre individuellen Einstellungen untere Hinweise.

Individuelle Einstellungen

Der Pong benutzt ein oberes und unteres Rad, um Backspin, Gegenwind und Aufwurf zu kontrollieren. Wenn sich das obere Rad schneller dreht als das untere Rad, wird Topspin erzeugt. Wenn das untere Rad schneller dreht als das obere Rad, wird Backspin erzeugt. Wenn beide Räder mit der gleichen Geschwindigkeit drehen wird die Bälle ohne Spin ausgerufen.

Überblick Einstellungen

Starten Sie den Pong im Pausenmodus. (1) Benutzen Sie die Plus (+) und Minus (-) Taste um die Einstellungen entsprechend zu ändern. Um Beispiel: Frequenz, "1" und Oscillation, "0". (Siehe unten für Topspin und Backspin-Einstellungen.) Dann drücken Sie die Play/Pause-Taste, um zu beginnen. Beachten Sie für Ihre individuellen Einstellungen untere Hinweise.

Anfänger-Topspin: Diese Einstellung erzeugt einen langsamen Topspin-Ball, der ideal für Anfänger ist.

Setzen Sie den Pong etwa 30cm vor der hinteren Tischkante auf. Dann nehmen Sie die Einstellungen Topspin, "2" und Backspin, "1" vor.

Topspin-Einstellungen: Stellen Sie den Pong zuerst an eine höhere Tischkante, stellen Sie dann die Einstellungen von 31 auf 41, 51, 61, 71 oder 81. Stellen die Bälle über den Tisch hinweg, verringern Sie die Topspin-Einstellung entsprechend.

Backspin-Einstellungen: Stellen Sie den Pong zuerst an eine höhere Tischkante, stellen Sie dann die Einstellungen von 06 auf 07 oder 08. Stellen die Bälle über den Tisch hinweg, verringern Sie die Backspin-Einstellung entsprechend.

JOOLA Tischtennis GmbH & Co. KG
Wiesenstr. 13 • 76833 Siebeldingen
49 (0) 6345 - 9547-0 • www.joola.de

Frequenz-Einstellungen

Frequenz regelt die Ballwurf-Geschwindigkeit. Je höher die Frequenz, desto mehr Bälle werden pro Minute ausgespart. "1" ist die niedrigste Frequenz, "8" die höchste.

Oscillation (Seite-zu-Seite) Einstellungen

Oscillations-Einstellungen werden benutzt, um Bälle auf verschiedene Bereiche des Tisches zu lenken. Je höher die Oscillation, desto schneller wendet der Pong die Seite-zu-Seite-Bewegung. "1" ist die langsamste Bewegung, 8 die schnellste Oscillation.

Memory-Funktion

Der Pong hat die Möglichkeit eine bevorzugte Einstellung zu speichern. Wenn Sie den Pong in den Pausenmodus versetzen, werden die Einstellungen gespeichert. Wenn Sie den Pong wieder einschalten, werden die Einstellungen wiederhergestellt. Um die Einstellungen zu ändern, drücken Sie die Play/Pause-Taste.

Instandhaltung

- Nach jeder Nutzung des Pongs empfehlen wir den Netzstecker zu entfernen.
- Reinigung: Bälle werden ständig von der Pong ausgespart. Bitte reinigen Sie die Bälle nach mehrfacher Benutzung.
- Entlasten Sie die Oberfläche des BUD-Drums nach einer Benutzung, lagern Sie ihn im Karton (oder einer Tasche) um Verstaubung zu vermeiden.
- Reinigen Sie die Räder des Pongs. Dies ist ein wichtiger Schritt zur Erhaltung der Funktionstauglichkeit. Benutzen Sie ein sauberes Tuch mit Wasser oder Alkohol.
- Reinigen Sie die Oberfläche der Räder. Sie benötigen ein sauberes Tuch und einen kleinen Pinsel.

Benutzung des TITL STAND

Der Pong TITL STAND ist ein motorisierter Pong, der die Bälle auf der Tischplatte aufbewahrt und sie auf den Tisch schickt. Der Pong ist mit einem Motor und einem Agitator ausgestattet. Der Pong ist mit einem Motor und einem Agitator ausgestattet. Der Pong ist mit einem Motor und einem Agitator ausgestattet.

FAQ / Störungsbeseibung

Problem mit Topspin / Backspin (Balkenfliegen)?
Wenn Sie dazu, dass bei jeder Einstellung des Topspin oder Backspin die Schläger nicht richtig funktionieren, so ist die wahrscheinlichste Ursache ein falsches Anschlag der Armbindung.
Pong spielen nicht überlagern Sie den richtigen Anschlag des Schlägers.

Hauptmotor läuft nicht
Überprüfen Sie den richtigen Anschluss des Hauptmotors. Wenn Sie den richtigen Anschluss des Hauptmotors gefunden haben, überprüfen Sie den Draht der Drähte. Sie den Netzstecker nehmen Sie den Draht ab und überprüfen Sie ebenfalls den Anschluss. Prüfen Sie, ob die Drähte richtig angeschlossen sind. Wenn Sie den Netzstecker und den Draht richtig angeschlossen haben, überprüfen Sie den Draht der Drähte.

Die Drähte des Motors sind richtig angeschlossen, aber der Motor funktioniert nicht

INSTRUKTIONEN DE MONTAGE DE MICRO RAPIDO

- Retire todos los contenidos de la caja
- Una el agitador (B) a la parte superior del motor de núcleo (A) mediante la alineación de la barra de plástico en el motor de núcleo (A) en el orificio en la parte inferior del agitador (B) presionando hacia abajo hasta que se quede segura.
- Alinee las pestañas de la parte inferior de montaje (D) a las ranuras en la parte inferior del núcleo del motor (A). Inserte y gire hacia la derecha para fijarlo.
- Alinee las pestañas del conjunto superior (D) a las ranuras en la parte superior del núcleo del motor (A). Inserte y gire hacia la derecha para bloquear.
- Antes de conectar a la toma eléctrica, inserte el adaptador CA (C) en la parte posterior del núcleo (A).

Instrucciones de empleo

NOTA: El Pong se debe utilizar solamente con bolas de tenis de mesa de 40 mm.

- Coloque el ensamblado Pong V300 sobre la mesa, cerca de la parte de atrás y a lo largo de la línea media. Seguidamente gire el orificio de proyección a la posición deseada a la izquierda o a la derecha de la mesa.
- Antes de encender el Pong, asegúrese de que en haya bolas en el interior del núcleo del motor. Gire el agitador manualmente para que la rueda redonda en la agitada no esté alineado con el orificio de entrada de pelotas. Esto reducirá la posibilidad de agotarla ametró.
- Cargue las bolas de tenis de mesa en el conjunto de la parte superior: 60-100 bolas en la parte superior y 10-20 bolas en la parte inferior.
- Encienda el Pong. Después de unos minutos, el Pong debería funcionar inmediatamente después de encenderlo. En este momento puede ajustar la configuración a su gusto. Luego puede el botón play/pausa una vez más para ajustar a jugar. Revise las instrucciones a continuación sobre la personalización de los ajustes.

Personalización de ajustes

El Pong V300 utiliza dos ruedas, una superior y otra inferior, para regular el giro, el velocidad, y la trayectoria de la bola. Cuando la rueda superior gira más rápidamente que la rueda inferior, se genera backspin. Cuando ambas ruedas están girando a la misma velocidad, la bola se desliza sobre la mesa sin giro.

Nota: Debido a las condiciones variables (tamaño de bola, peso, humedad, altura, etc.), las propiedades precisas de la pelota pueden variar entre sesiones. Ajuste estos valores para satisfacer sus necesidades.

NOTICE D'UTILISATION

- Sortez toutes les pièces de la boîte.
- Posez le plateau rotatif en alignant le trou avec la tige plastique située sur le haut du moteur et appuyez jusqu'à verrouillage.
- Remettez le jeu en alignant les trous du bas avec les tiges de la partie basse et tournez jusqu'à verrouillage.
- Alignez les tiges de la partie haute avec les trous sur le haut du moteur.
- Insérez et tournez jusqu'à verrouillage.
- Raccordez le fil de l'électrique au dos du moteur avant de le relier à une prise.

Notice d'utilisation

- Installez le Pong sur une table de tennis de 2,44 m de large et 2,74 m de long.
- Avant de démarrer le Pong, assurez-vous qu'il y a des balles dans le moteur. Tournez manuellement le plateau rotatif pour que le trou du plateau ne soit pas aligné avec l'orifice d'entrée des balles.
- Alignez les tiges de la partie haute avec les trous sur le haut du moteur.
- Insérez et tournez jusqu'à verrouillage.
- Raccordez le fil de l'électrique au dos du moteur avant de le relier à une prise.

Info: en raison des conditions d'utilisation (dampage, taille des balles, poussière, humidité, altitude, etc.), les propriétés exactes du Pong peuvent varier entre sessions. Ajustez ces réglages pour obtenir le résultat souhaité.

Vue d'ensemble de réglages:
Commencez avec le robot Pong dans le mode de pause. Utilisez les boutons de signe plus (+) et de signe moins (-) pour ajuster les réglages en conséquence. Par exemple: Fréquence: "1" et Oscillation: "0".

Balle filée de débiteur: Cette configuration crée une balle filée lente qui est idéale pour les joueurs débutants. Mettez d'abord le bouton 12 po vers l'intérieur de l'anneau bord de la balle. Alors mettez le bouton 22 et la balle coupée: "1".

Régages de balle filée: Pour régler d'abord le robot Pong à l'anneau bord de la balle, alors mettez la balle filée: "3" et la balle coupée: "1". Pour une balle filée plus rapide et à distance accrue, modifiez les réglages de la balle filée: "3" à "4", "5", "6", "7", "8", "9", "10", "11", "12", "13", "14", "15", "16", "17", "18", "19", "20", "21", "22", "23", "24", "25", "26", "27", "28", "29", "30", "31", "32", "33", "34", "35", "36", "37", "38", "39", "40", "41", "42", "43", "44", "45", "46", "47", "48", "49", "50", "51", "52", "53", "54", "55", "56", "57", "58", "59", "60", "61", "62", "63", "64", "65", "66", "67", "68", "69", "70", "71", "72", "73", "74", "75", "76", "77", "78", "79", "80", "81", "82", "83", "84", "85", "86",
