

Voice Assistant Setup Guide

CREATE A SMART AND COMFORTABLE LIVING SPACE

Scan the QR code to watch the setup video.

Before Setting Up

1. **See manual:** check if the device you purchased supports 2.4 GHz only, or both 2.4 GHz and 5 GHz Wi-Fi.

Confirm Wi-Fi Support

2. Download the GHome App and update it to version 5.7.0 or later.

5.7.0 or later 

Ensure your phone runs iOS 11+ or Android 6.0+ for a smooth connection.

3. Add your devices to GHome App according to the manual.

Add devices 

Connecting GHome Devices to Alexa

1. Please download the Amazon Alexa App and logged in before connecting.

Amazon Alexa

2. You can set up using either the GHome App or the Amazon Alexa App. See the instructions below.

GHome

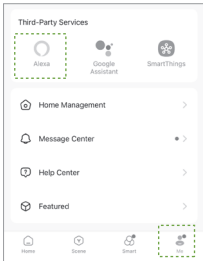

or

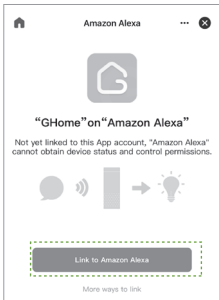

Amazon Alexa

Method 1: Link via GHome App

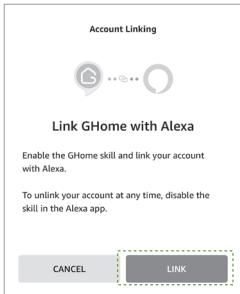

1. Open the GHome App, go to the **"Me"** page, then tap the **"Alexa"** icon.

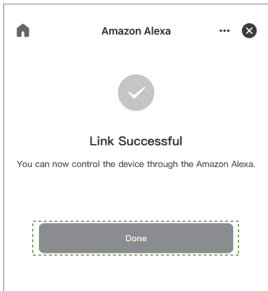

2. Tap **"Link to Amazon Alexa"**.

3. GHome App will redirect you to Alexa, then tap **"LINK"**.

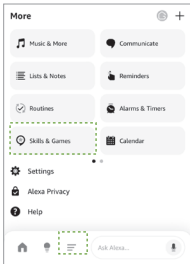

4. Link successfully.

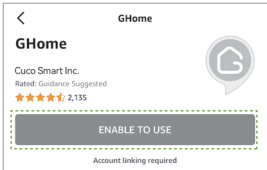

Method 2: Link via Alexa App

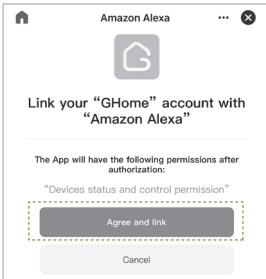

1. Open Amazon Alexa App, tap **"Skills & Games"** on the **"More"** page.

2. Search for **"GHome"**, then tap **"ENABLE TO USE"**.

3. If the GHome App is installed, Alexa will redirect you to it; then tap **"Agree and link"**.

If the GHome App is not installed, download it and create an account, then complete the required information.

Operate Devices via Alexa Voice Control

1. Ensure the GHome App is linked to the Amazon Alexa App.
2. Go to the "💡" page, and tap your device.

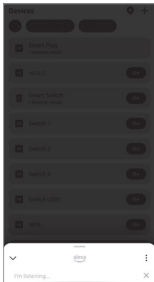

3. Operate the device.

Note: WP3/5 is used as an example.

4. Voice Control: Tap the "🎤" in the Alexa App to activate the voice assistant.

Examples of Voice Commands:

"Alexa, turn on [the living room light]."

Note:

1. The device name can be changed via the Amazon Alexa App.
2. To use voice control with the speaker, make sure it is connected to the Amazon Alexa App.

Connecting GHome Devices to Google Assistant

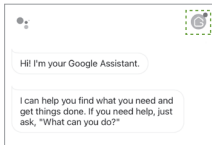

1. Download the Google Assistant App and login in.

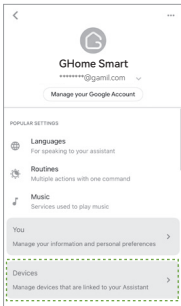

Assistant

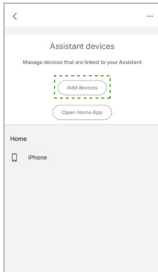

2. Tap your profile icon.

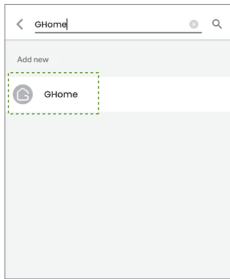

3. Tap **"Devices"**.

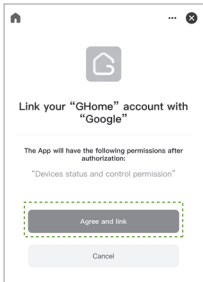

4. Tap **"Add devices"**, then tap **"Link a smart home device"**.

5. Search for **"GHome"** and tap it.

6. If the GHome App is installed, Google Assistant will redirect you to it; then tap **"Agree and link"**.

If the GHome App is not installed, download it and create an account, then complete the required information.

7. Do not take any action when "GHome is linked" appears. Google Assistant will then guide you to assign rooms for your devices.

e.g.

Operate Devices via Google Assistant & Google Home

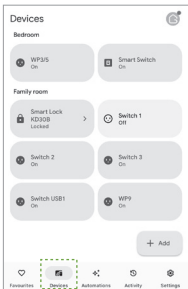

1. After devices are assigned to rooms, you can control them via Google Assistant voice commands.

e.g.

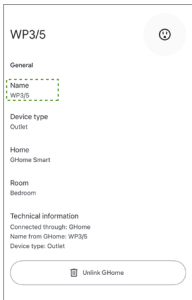

Note: WP3/5 is used as an example.

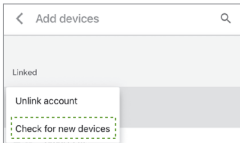

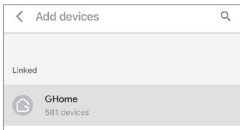

2. At the same time, you can view these devices on the **"Devices"** page in **Google Home App**.

3. Devices name can be changed in Google Home App.

4. When adding new devices in the GHome App, tap **"Check for new devices"** during the search step (page 19).
