

Please read the following before using your new AIICIOO Under Tank Heater.

**Instruction: Please read carefully**

- 1.Clean the surface of the terrarium
- 2.Peel adhesive paper off back of the heater
- 3.Stick the heater to the bottom/side of the tank
- 4.Press it hard until it sticks to the tank firmly
- 5.Stick the rubber feet to four bottom corners
- 6.Last plug heater in

**Warning: Risk of fire.**

- 1.Please peel the adhesive paper off the back of the heater during using and make the heat pad stay away from sawdust and other flammable objects.
- 2.Never mount the AIICIOO heater in a manner that would encapsulate heat. Always use the enclosed rubber feet to elevate your terrarium thus allowing the heat to escape.

**Placement of terrarium:**

Do not place on heat sensitive surfaces (i.e. antique furniture, plastic, etc...) Do not place the terrarium where it will receive direct sunlight. The AIICIOO under tank heater is for use on standard glass aquariums only. We cannot be responsible for custom or homemade cages and use of the AIICIOO under tank heat on such cages will not be covered by the warranty. Do not use the heat pad on anything other than glass terrariums: NO ACRYLIC cages, NO METAL cages, NO WOOD cages, NO PLASTIC cages, NO FOAM cages, NO FIBERGLASS cages, NO STONE cages.

**Hot Weather:**

ALWAYS unplug your AIICIOO heater if the inside of your house rises above 80°F (26.6°C). (Unless using a reptile thermostat to control the heater.)
