

For Long Hair Breeds

It is very important to **KEEP YOUR PETS HAIR OUT OF THE WAY** – it may be best to put a stocking or sock over the paw, foot and leg of the pet and isolate the nail. Push the nail through an opening at the tip of the sock to trim the nails.

SAFETY TIPS!

Before trimming your pets nails

You should **secure your pet before nail trimming**. It may be helpful to have another person help you restrain and comfort your pet. The operator should have both hands available for trimming the pet's nails.

Rub their paws with your hands and allow them to get used to the touch.

Introduce the gentle paws™ nail trimmer to your pet with it in the OFF position.

Acclimate your pet to the gentle paws™ nail trimmer with it ON while giving praise and treats.

After a few rounds of introduction, your pet should be on its way to a **safe and healthy groom**.

Remember – you are in charge. The more assertive you are the more comfortable your pet will become.

Be patient with your pet. Do not use gentle paws™ nail trimmer until your pet is completely comfortable.
