PREVIEW – ADV SKIN 12 SET

PREVIEW - TECHNOLOGY

QUICK LINK : This innovative sternum strap construction allows you to adjust and connect your pack quickly, even on the move. The elastic strap also allows easy breathing during intense activity.

SENSIFIT : Construction with a stretchy mesh fabric which adapts to your body morphology, with small adjusting systems offering support and an irreproachable stability. The bag doesn’t move and doesn’t restrict breathing allowing your chest to expand freely.

For the ADV SKIN 8 SET W, the SENSIFIT technology has been adapted specifically to fit comfortably around a women's curved chest, narrow shoulders and shorter torso length. Double stretch construction straps, shaped like cups, conform to the chest. Proper fit eliminates bounce while enabling comfortable breathing.

SIZING

1. Measure your torso: Take your measurement around the widest part of your chest area, keeping the measuring tape horizontal to measure it well.
2. Then check for your size on below table and pick your backpack.

When you try the vest, be sure that there is an 8-centimeters gap between both parts of the vest after you’ve squeezed the strings. If in any doubt, select the size that corresponds to your running top sizing as ADV SKIN Series vests have been designed to follow Salomon apparel sizing charts.

WOMEN

ORDER SIZE	CHEST (CM)	CHEST (INCH)
XXS	76-81,5	23-32
XS	81-86,5	32-34
S	86-90,5	34-35,5
M	90-96,5	35,5-37,5
L	96-102,5	37,5-40

MEN

ORDER SIZE	CHEST (CM)	CHEST (INCH)
XS	81,5-89	32-35
S	88,5-96	34,5-38

SPECIFIC FEATURE

1. Main compartment compressor

ADJUSTMENTS

FASTEN YOUR PACK

1. To fasten the ADV SKIN, use the Quick Link System (elastic strings connecting the sternum straps).

2. Pull the strings from the tabs on left of sternum (1) straps to open & place them back in the tabs to close.

3. To secure the vest, pull the 2-way hook (2) in the middle of sternum strap (right side). You can also adjust each string independently to tighten top or bottom of Quick Link System. To release pressure, just press the 2-way hook.

COMPRESS THE MAIN COMPARTMENT

The ADV SKIN 12 allows you to compress the main compartment depending on load to prevent bouncing and maximize comfort during your run.

1. The elastic string on either side of the backpack (1) can adjust to the load in your pack's main compartment by just pulling the tab (2) inside the side mesh stash pocket.

2. To release, remove your pack and press the 2-way hooks on either sides of the backpack whilst pulling the strings to loosen.

ADJUSTMENTS

PERSONALIZE THE ADJUSTMENTS

The Quick Link system on the ADV SKIN series has been created to assure mobility, comfort, and adaptability to every runner's body and personal preferences. The versatility of the backpack is shown as well as the possible arrangement of the twin link system in the chest area, it can be changed from right to left for left handed people and different sizes using the straps located in the middle.

To unhook the attachments from the straps follow the next steps:

1. Move from left to right the piece to remove the strap from it once it's out, place where you want it and do the same movement to place it.

2. A numerous number of combinations are possible, it is up to you to play with it.

WARNING: some pieces might be hard to remove, be sure to put the backpack flat on a table and take time to do this procedure.

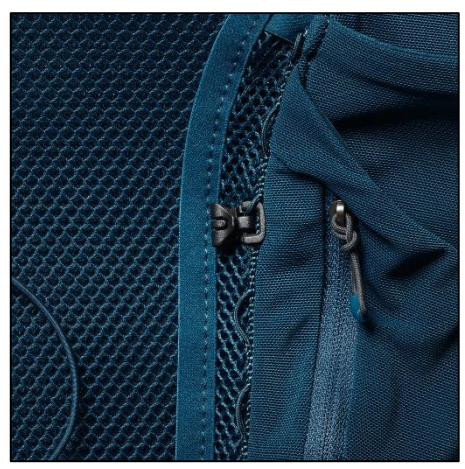

Quick Link System – End

ADV SKIN 5 SET / ADV SKIN 12 SET

Salomon reinvented the way we hydrate. You can effortlessly drink as soon as you feel thirsty to stay energized and perform better.

1. Each backpack comes with two flasks of 500ml each, place them in the pockets located on the chest area.

2. Secure them with the elastic strap located near the pocket to avoid any movement by wrapping the elastic around the flask's valve.

3. To drink, place your mouth on the valve and bite whilst pressing the flask to release water and adjust flow.

The SOFT FLASKS 500ml/17oz included with your ADV SKIN 5 SET and ADV SKIN 12 SET are compatible with the XA FILTER CAP 42 (*sold separately*).

HYDRATION

ADV SKIN 8 SET W

The Women's ADV Skin 8 SET has been specially designed around the female morphology with flasks placed below the breast to relieve pressure and maximize comfort with straws to easily and quickly access hydration on-the-go.

1. Place the flasks in the pockets located just below the chest area and make sure to flip the flask around to follow the pocket's shape.

2. Secure the straws through the tabs located above the flasks along the shoulder straps to reduce any movement from the straw whilst running. Find the set-up that is most comfortable to you and adjust the straw's length if necessary by removing the valve and cutting to preferred length, then, placing the valve back.

3. To drink, place your mouth on the valve and bite whilst pressing the flask to release water **and adjust flow.**

POLE CARRIER

POLES CARRYING SYSTEM

Every athlete has his/her own way to carry their poles. The ADV Skin has been constructed to adapt to every way possible thanks to its movable elasticated straps which offer up to 7 different set-ups:
Show how you can tie it and remove it.

1. Place the strap in one of the many tabs

2. Close it and attach the hook to the adapted tab

POLES POSITION

COMPATIBLE ACCESSORIES

CUSTOM QUIVER

The ADV SKIN is compatible with a poles quiver (*sold separately*) which allows storing of the poles on-the-go without stopping for those looking to save time and wanting extra stability.

1. Attach the top of the quiver to the two tabs located at the top of the shoulder strap, below the reflective stripe (left or right), or just above the bladder pocket.

2. Attach the bottom of the quiver diagonally across the back of the pack with the tabs located at the bottom of the backpack on either side.

3. Put your poles in the quiver.

4. Adjust the bottom of the quiver by passing the tanka (black cord lock stopper on red elastic string) through the tabs, press the tanka and pull the red elastic string.

5. When needed, just undo the tanka and pull you walking sticks out.

COMPATIBLE ACCESSORIES

BLADDER

The ADV SKIN vests feature a water reservoir compartment sleeve in the back pocket of the backpack *(reservoir not included but sold separately).* The reservoir and tube routing have been especially designed to shorten the distance the water travels to optimize hydration therefore travelling from the bottom of the pack up through the shoulder straps.

1. Introduce the water reservoir in the back of the vest in the large mesh pocket, make sure the top of reservoir fits the hole that is located at the bottom of the mesh pocket.

2. Attach the tube to the safety strap placed near the soft flask on your right shoulder straps, to avoid bouncing and any discomfort.

3. Follow the routing of the tube to the bottom right of the pack where you will find a small opening, introduce the tube through it to guide it to the reservoir pocket.

4. There is a small opening next to the back pocket for access to the reservoir pocket so you can connect the tube to the reservoir's tap.

UPKEEP

ADJUST THE BLADDER TUBE SIZE

If your bladder tube is too long, you can adjust the size by following these steps :

1. Remove the silicone valve.
2. Make a little cut below the grey piece.
3. Remove the grey piece.
4. Measure the tube to where you find more suitable to hydrate.
5. Cut it and place all the pieces back in place.

CLEAN YOUR BLADDER

As simple as it gets - reverse by placing your hand in the reservoir (make sure it's empty!), grab the bottom, and pull it back through the top opening. It's just like turning a sock inside-out. The molded opening can also be flipped after the reservoir body has been reversed. Then, throw it in the dishwasher or rinse with mild soap and water. Make sure to let the reservoir dry out completely while reversed.

CLEAN YOUR SOFT FLASKS

All of our SOFT FLASKS are top-shelf dishwasher safe so they are very simple to keep clean. If you are fueling with energy gels or mixing your own nutrition mix, we recommend using a bottle brush or Bottle Bright to clean out any residue.

UPKEEP

WASH YOUR PACK

- Do not tumble dry. To dry the bag, we'll advice a soft spin drying = max 600 turns per minute. Natural drying = Avoid the drum drying
- Do not bleach
- Do not dry clean
- Do not Iron
- Hand wash cold (30°C)

We'll advice a regular cleaning for this bag to regularly remove the sweat from the running sessions. (Sweat = bacteria = oxidization = odors = rings = bleaching accelerator) Preferably hand washing with detergent.

Although not recommended, machine washing is permitted on delicate program (30°C) with soft spin cycle (max 600 turns per minute) while closing the straps beforehand and avoiding fabric softeners and rinsing with clear water. To dry the bag, we recommend natural drying and no tumble drying.

Sweat is an oxidization source on the zip sliders. You can protect the metal parts from the zips while rubbing them softly with a cotton swab moistened with vegetable oil (olive oil for instance) and while sliding the zippers 2 or 3 times. Do not put too much oil not to stain the bag!

WARRANTY

Salomon bags (including parts such as buckles, straps, etc) are guaranteed for 2 years from purchase date and only applicable against defects discovered withing the Warranty Period and extends only to the original purchaser of the product. Click here for full warranty details and conditions.

Salomon hydration accessories manufactured by HydraPak are guaranteed for life. To submit a warranty claim for a Salomon by HydraPak product, click here.

FREQUENTLY ASKED QUESTIONS

Is the survival blanket included?

No, it’s not included but we have left the specific mesh pocket at the top of the main back compartment for quick access.

Are extra attachments available within the pack?

There are 2 extra attachments directly in the back pocket. You’ll be able to adapt the adjustment the way you want since the Quick Link System offers flexibility and adaptability.

My elastic string broke. Where can I get another one?

It’s available directly on our website (Salomon.com) under the name QUICK LINK SYSTEM.

Are the 2L bladders compatible with the ADV SKIN series?

https://www.salomon.com/en-uk/contact.html

No, they aren’t compatible. The water reservoir is only compatible with 1.5L bladders.
