(Included)

WARNING - UV LEDS

DO NOT SHOOT EYES DIRECTLY

NOTE: Confirm whether the batteries with polarity are installed correctly; And confirm whether the battery holder is placed in the correct position (Please follow the arrows on the battery tube)

Tips:

- The flashlight works best in complete darkness
- For daytime use, turn off all interior lights, pull down the curtains/blinds, and then operate the light from the flashlight closer to the surface
- We recommend using UV eye protecting as a safety

Pay attention to use battery:

- Do not heat or throw battery into a fire, water.
- Do not pierce battery with a sharp object such as a needle.
- Do not use a battery with serious scar or deformation.
- Stop using the battery if abnormal heat, odor, discoloration, deformation or abnormal condition is detected.

If liquid leaking from the battery gets into your eyes, do not rub your eyes. Wash them well with clean water and go to see a doctor immediately.

When not using battery for an extended period, remove it from the equipment and store in a place with low humidity and low temperature.

The battery can be used within the following temperature ranges. Do not exceed these ranges.

Charge temperature range: 0°C to 45°C

Discharge temperature range: -20°C to 60°C
