For firmware upgrade, please follow the DPVR Assistant 4 steps

5.3 Replace the front and rear headsponge

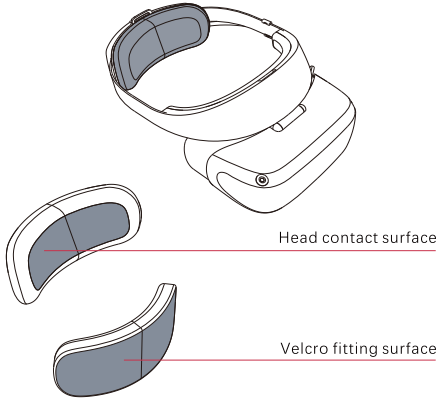

The front and rear headsponges need to be replaced if they are used for a long time.

1.Carefully peel the front (rear) sponge off;

2.Install the new sponge in the right place, and then gently press it on.

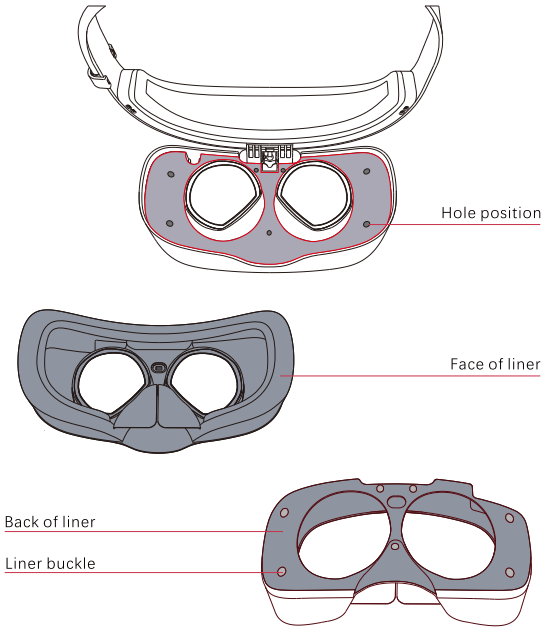

(Front headsponges)

(rear headsponges)

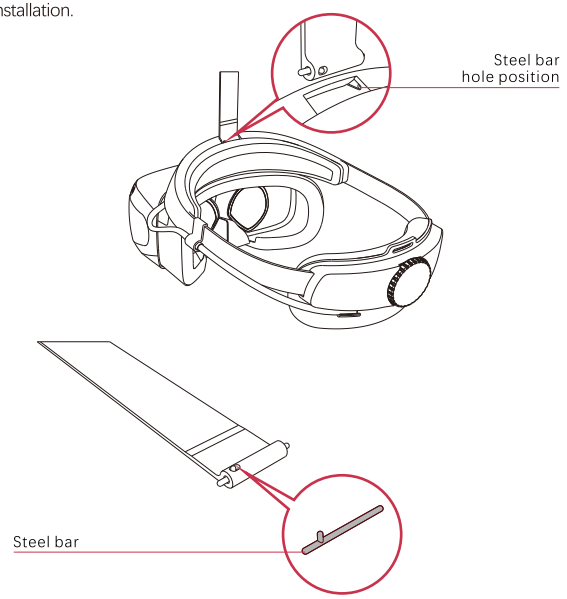

5.4 Replce face liner

Please replace face liner after used for a long time.
1.Carefully peel the liner from the red line area on the headset;
2.Align the liner with the red line area, and align the buckle on the back of the liner with the hole in the red line area, and then press it tightly.

5.5 Replace the top headband

Please replace the top headband if it is used for a long time.
1.Pull the front steel bar of the headband gently to remove the headband and remove the steel bar from the headband;
2.Put the steel bar into the new headband, align one end with the hole position of the headset, and move the other end to complete the headband installation.

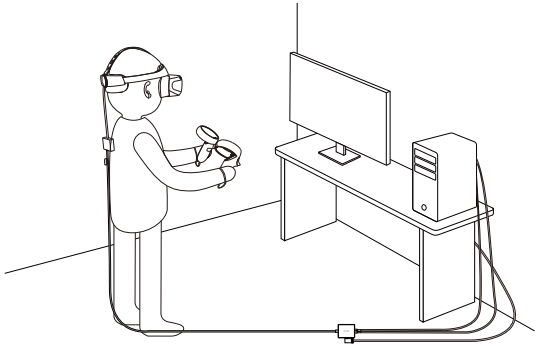

6.Environment and information security

6.1 Environment

-Use headset in indoor normal temperature environment, away from heat sources and strong electromagnetic radiation sources;
-It is recommended to experience standing and keep the surrounding open environment to avoid personal injury and damage caused by touching environmental objects;
-When the headset not in use, please pack it well.

Warning: Please avoid sunlight or other strong light directly illuminate lens, otherwise the display will be damaged.

6.2 Information safety

Please read the safety information before use the headset to ensure safe and correct

Follow the warnings provided below to prevent fire or explosion

-Please do not let the headset get hit or demaged;
-Please choose official accessories;
-Do not touch the device with wet hands. In addition, please do not use headset in wet environment, swimming and other relavent activities.

Follow the warnings provided below to prevent fire or explosion

-Do not use headset in an extremely hot or cold place. DPVR recommend you to use the headset temperature between 0 ℃ to 40 ℃;
-Keep the headset dry. Do not use it outdoors in thunderstorm weather etc;
-To prevent possible hearing damage when using headphones, do not use high volume for a long time;
