

USER GUIDE

Welcome to WD Discovery

Important:

An active Internet connection with ports 80 and 443 available are required for software and firmware update notifications to occur

Western Digital does not provide instructions on how to modify the **DNS** settings for third party routers. Please consult the router's user manual or contact the router's manufacturer for support

If the router was supplied by an **Internet Service Provider (ISP)**, please contact them for support

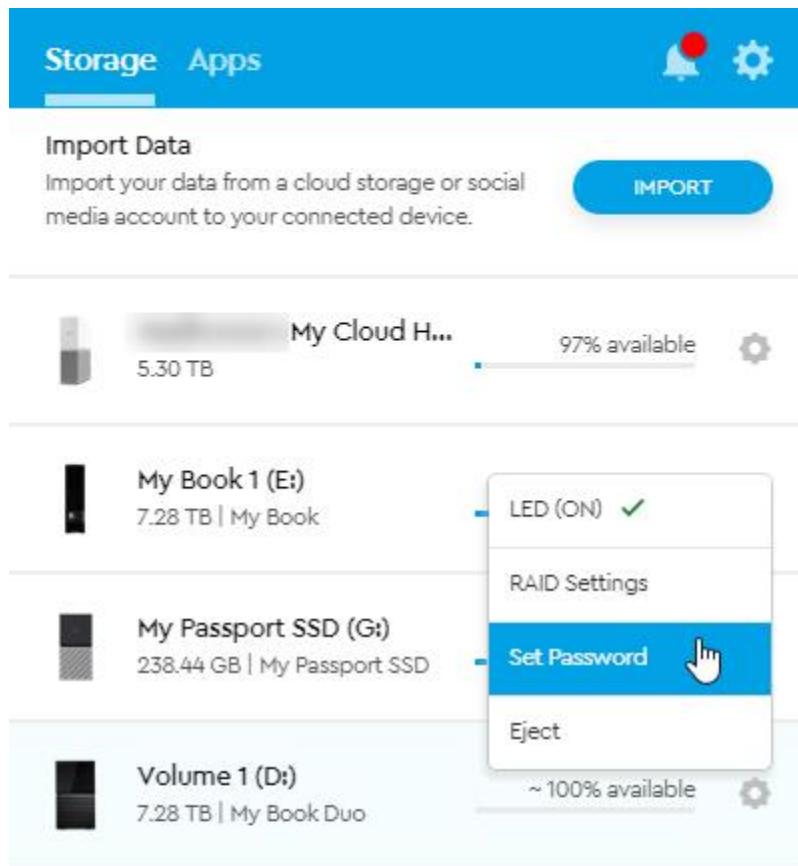

Welcome to WD Discovery

WD Discovery is a new application from WD that enables you to:

- Manage your connected WD devices like My Passport, My Book, and My Cloud Home drives
- Make complex things easy, like securing a drive with a password or managing drive settings
- Download, install and stay up-to-date with software offered by WD and WD partners
- Register your devices and receive important software updates
- Manage your My Cloud Home device

Features:

- It allows connected WD devices like WD My Passport and other supported drives to be managed under one application
- It simplifies complex tasks like securing the drive with a password or managing drive settings
- It allows for device registration in order to receive important software updates and notifications
- It displays device status such as capacity, free space available, drive security and so on
- Notifications about devices not yet registered with a link to a registration form within WD Discovery itself
- Notifications about software updates

- It allows for importation of data from a cloud storage (Dropbox, Google Drive, and OneDrive) or social media accounts (Facebook and Instagram) to a supported drive

Import Data

Import your data from a cloud storage or social media account to your connected device.

IMPORT

Dropbox

- A list of installed applications from WD that can be launched and updated from WD Discovery
- A list of additional applications available from WD and WD partners

- Preferences such as having WD Discovery automatically start on system startup
- Links to WD websites such as product documentation

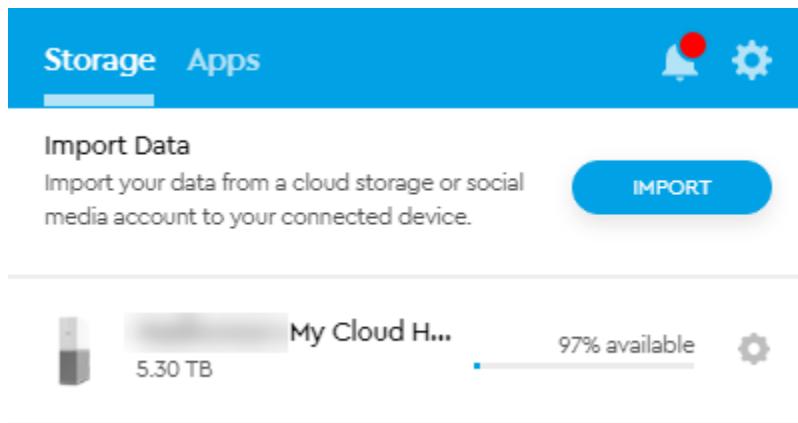

- A setting to keep WD Discovery pinned to the system menu or have it as a floating window
- Support for 18 languages

Discovery will restart for language changes to take effect.

- Comes with the My Cloud Home Desktop App preinstalled

How to Install and Launch on a Mac

WD Discovery is a light weight desktop application for Mac and Windows that provides a cloud based method of delivering software, updates and notifications for external USB drives. WD Discovery can be manually installed on computers that do not have an internet connection like any other software application

Important:

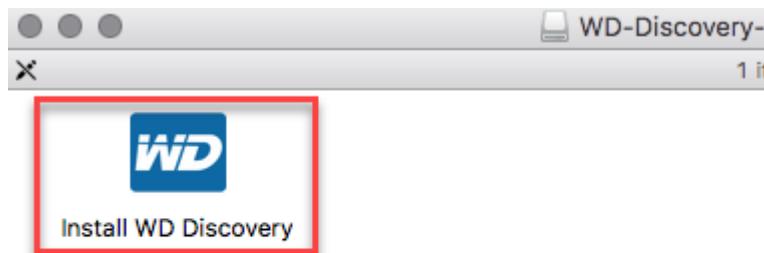

- An active internet connection with ports 80 and 443 available are required for software and firmware update notifications to occur
- WD Discovery will install or Update existing versions of WD Drive Utilities to the version included with WD Discovery
- Existing installations of WD Software supported by WD Discovery will prompt the user that a new version is available through the WD Discovery environment

Installing WD Discovery on a Mac

1. Go to the [WD Discovery Download Site](#) and download the software

Name	Date Modified
► Extras	Jan 31, 2017, 3:04 PM
► Readme.txt	Jan 31, 2017, 3:05 PM
► User Manual.url	Jan 31, 2017, 2:17 PM
► WD Discovery	Jan 26, 2017, 10:21 AM
WD Discovery for Mac.dmg	Jan 26, 2017, 10:24 AM
WD Discovery.exe	Jan 26, 2017, 10:21 AM

2. Once finished, run the software

3. Click on **Install Now**

Welcome to WD Discovery

Get the most out of your WD drive

PROTECT - Easily back up your precious data

MONITOR - Optimize and monitor the health of your drive

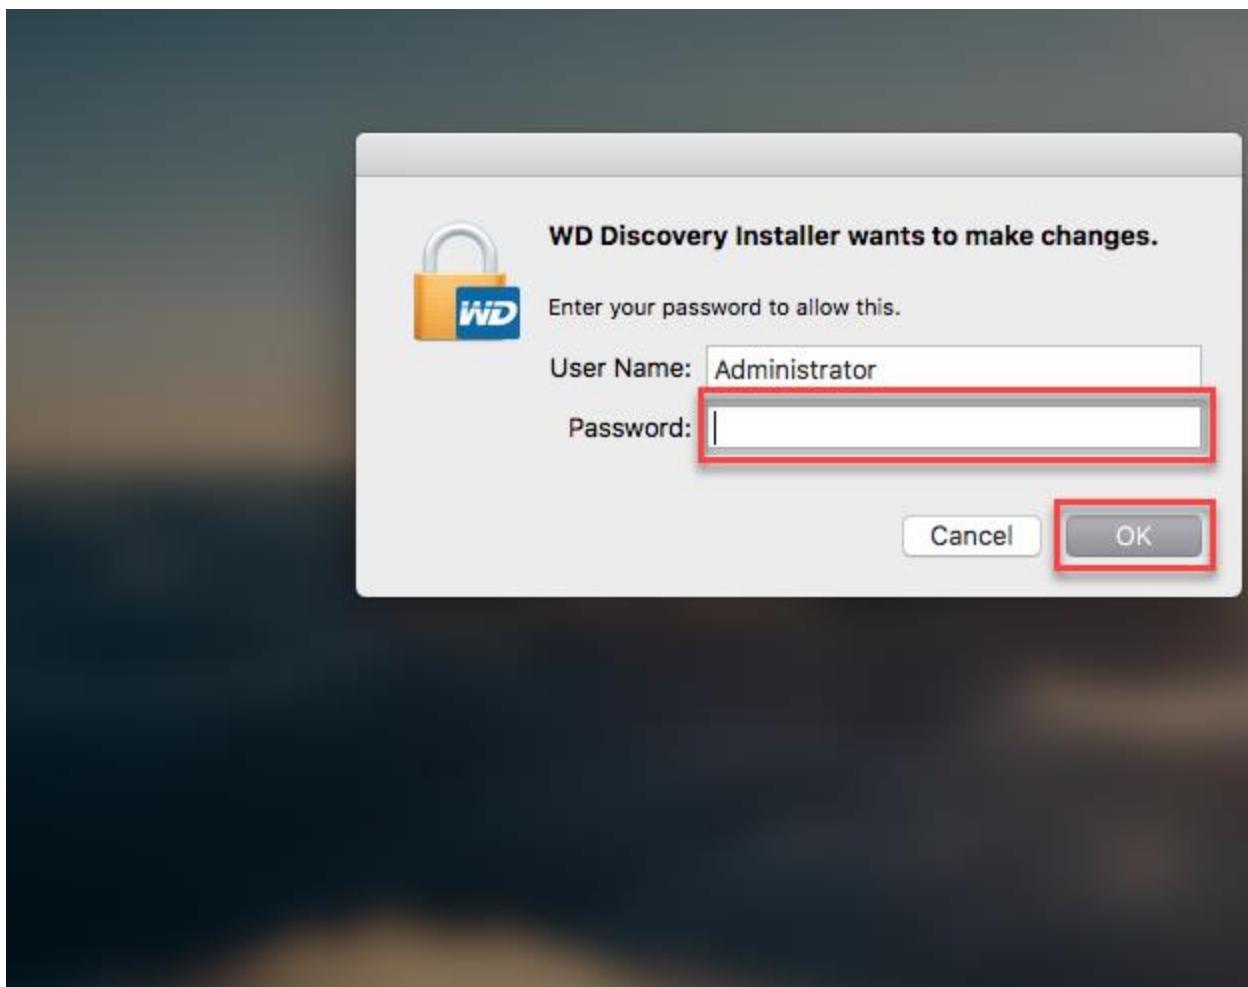

DISCOVER - Find new apps and services

Install Now

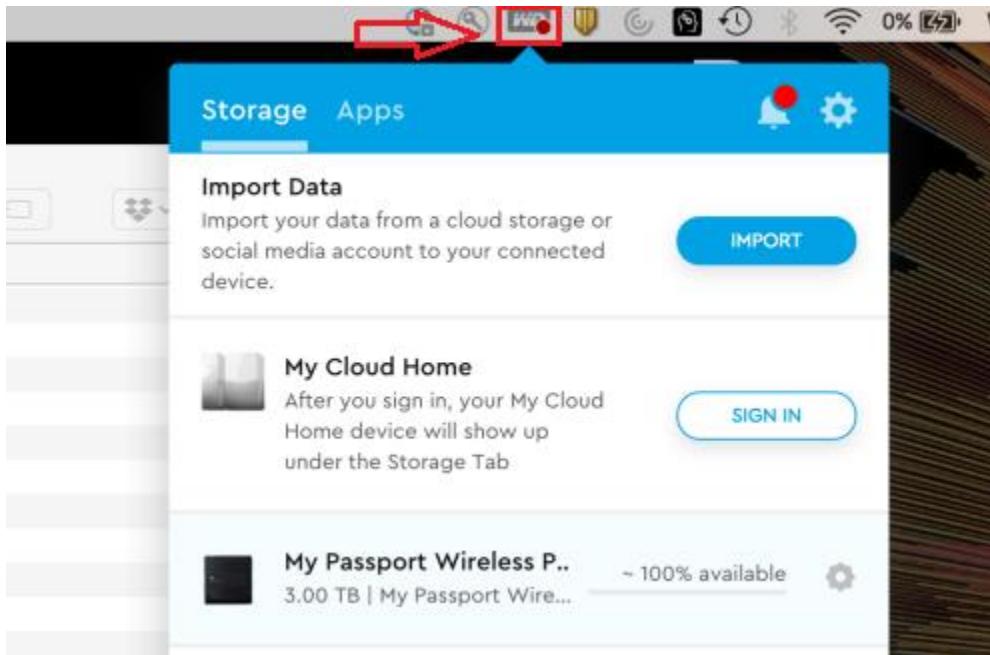

By clicking the Install Now button, you agree to the
[WD license agreement](#) and [privacy policy](#).

[Participate in the Product Improvement Program](#) 

4. Enter the Mac user's **password** , click **OK** and wait for the installer to complete the installation

5. From Apple menu bar, click on the **WD** icon to open **WD Discovery**

How to Install and Launch on a Windows

WD Discovery is a light weight desktop application for Mac and Windows that provide a cloud based method of delivering software, updates and notifications for external USB drives. WD Discovery can be manually installed on computers that do not have an internet connection like any other software application

Important:

- An active internet connection with ports 80 and 443 available are required for software and firmware update notifications to occur
- WD Discovery will install or Update existing versions of WD Drive Utilities to the version included with WD Discovery
- Existing installations of WD Software supported by WD Discovery will prompt the user that a new version is available through the WD Discovery environment

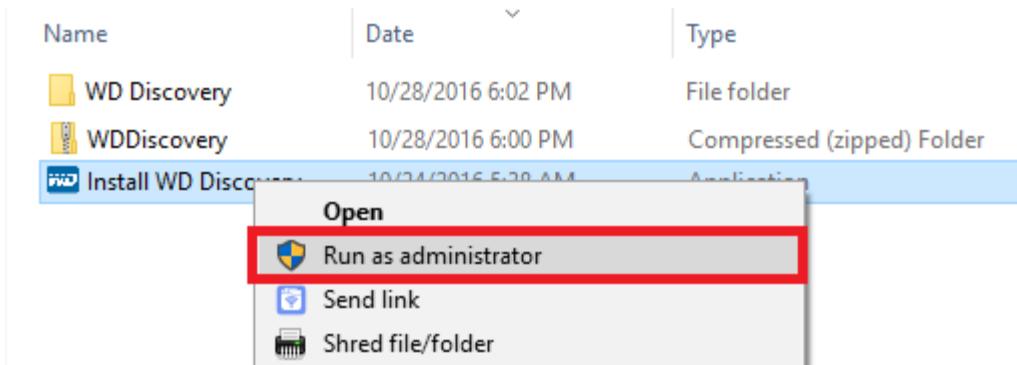

Installing WD Discovery on Windows

1. Go to the [WD Discovery Download Site](#) and download the software

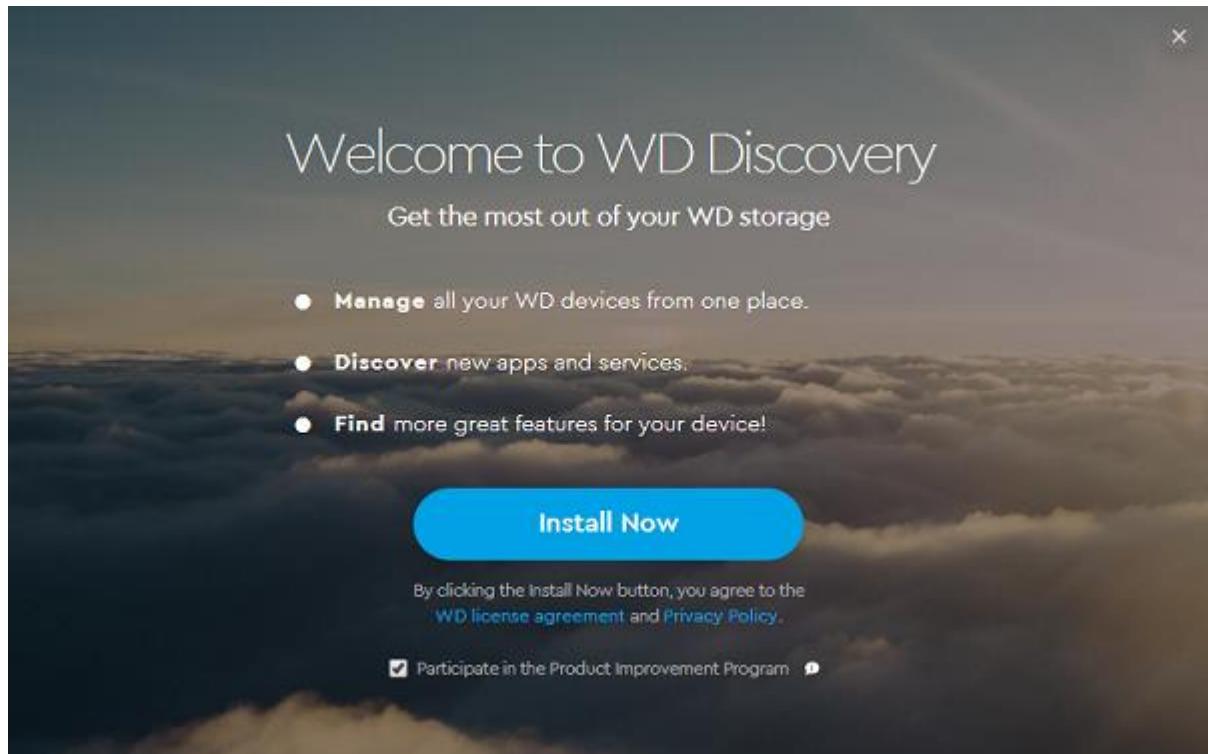

2. Right Click and extract the installer from the .zip file

Name	Date	Type
WD Discovery	10/28/2016 6:02 PM	File folder
WDDiscovery	10/28/2016 6:00 PM	Compressed (zipped) Folder
Install WD Discovery	10/24/2016 5:38 AM	Application

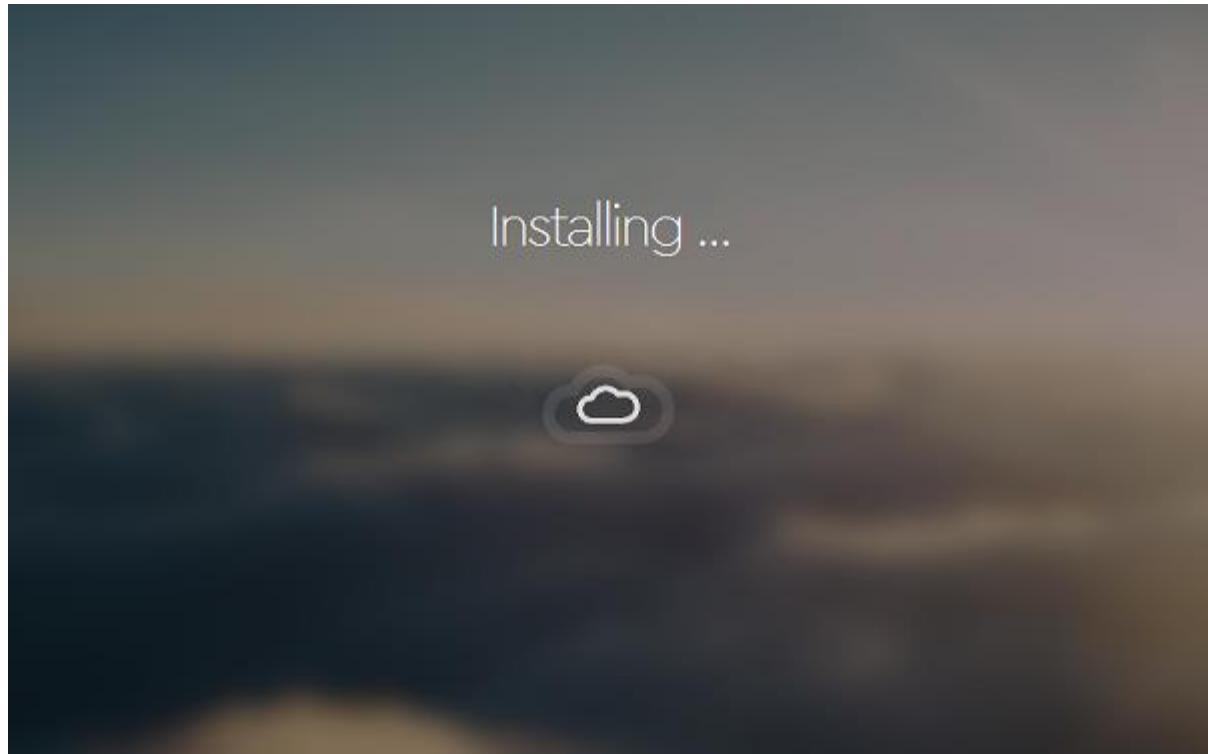

3. Right Click the Installer and select **Run as Administrator**. Select Yes when prompt

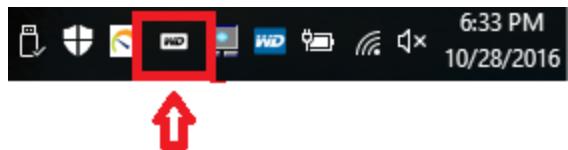

4. Click **Install Now**

5. Wait while WD Discovery is installing

6. Locate the WD icon in the lower right hand corner of the PC system tray

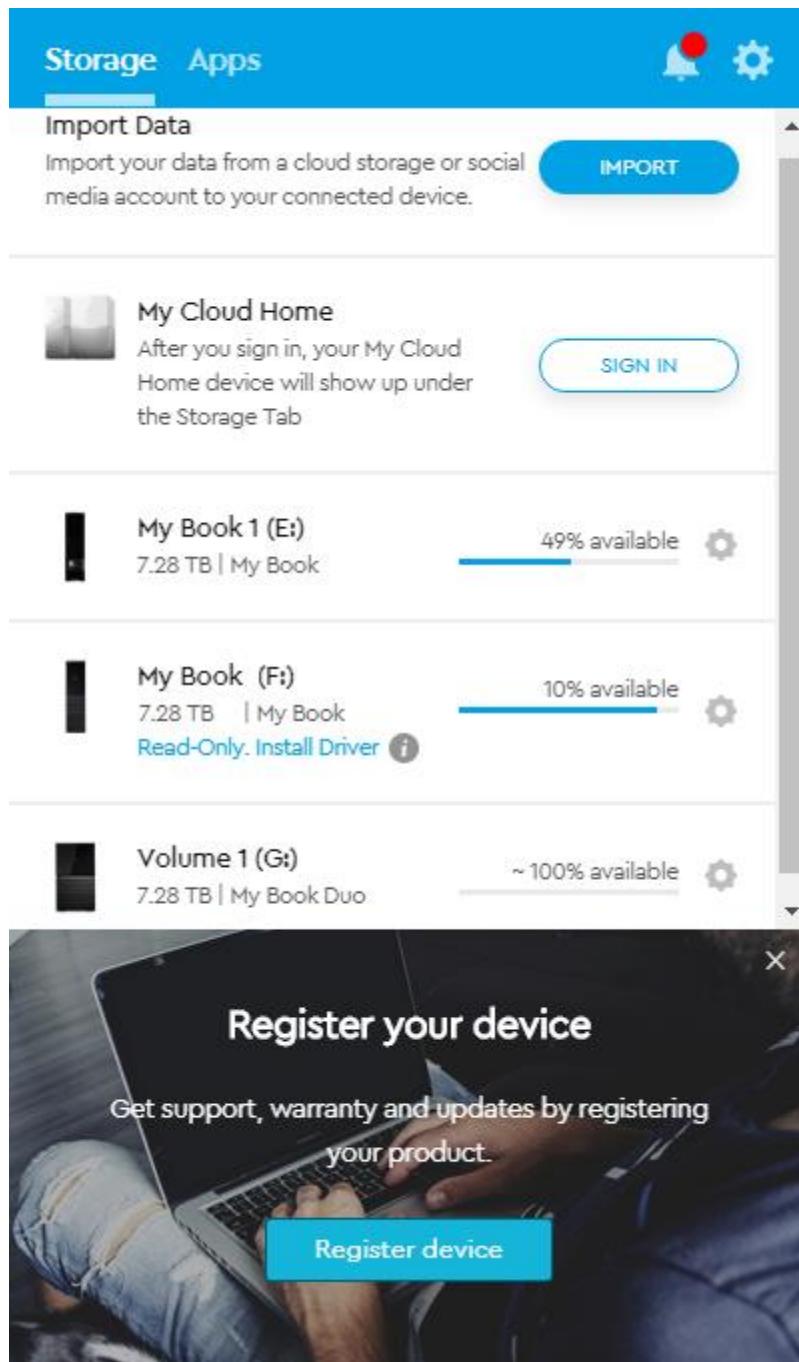

7. Click to launch WD Discovery

Note:

Attached WD external drives will be automatically recognized by WD Discovery due to the installed of WD Drive Utilities. If the WD drive is not seen, please refer to [Answer ID 14925: Windows or macOS Cannot Find My Drive](#)

- 8.

9.

10. System Restart

Important:

A reboot is required if previous versions of WD Backup, WD SmartWare, WD Drive Utilities or WD Security are already installed

If the computer is not rebooted, WD Discovery cannot Update WD software to the latest available version

System Restart

Prior to installation you must do a system restart.

[Restart Later](#)

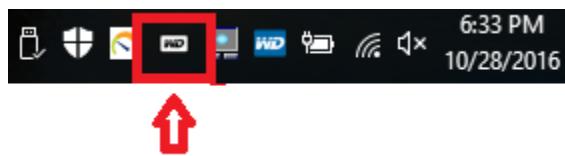

[Restart Now](#)

WD Discovery has been successfully installed on a Windows PC

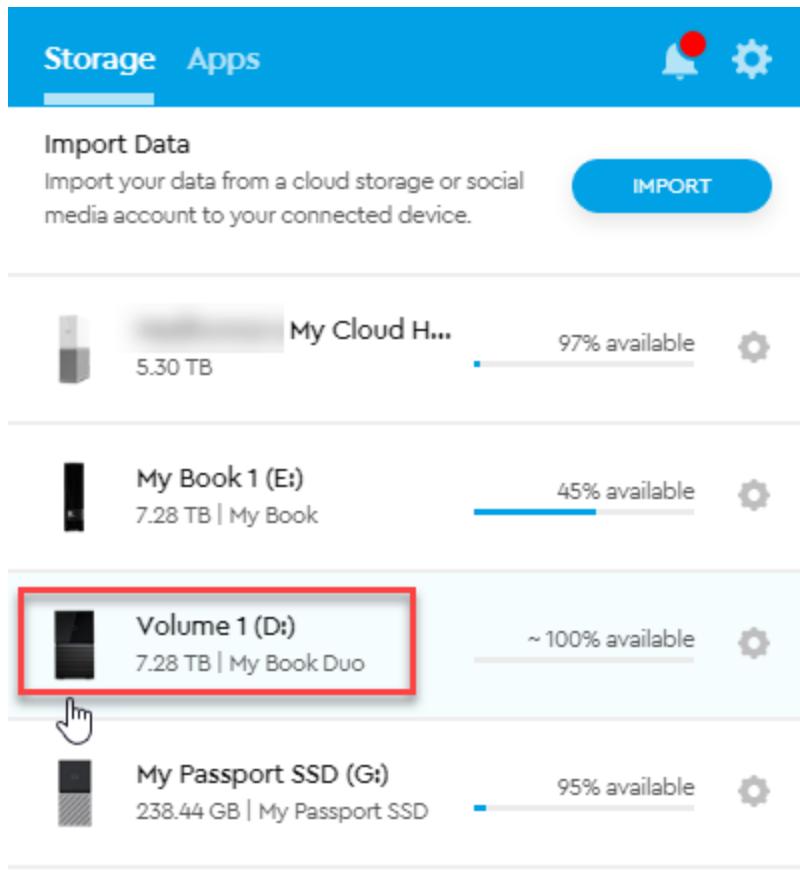

How to Access Files on the Device

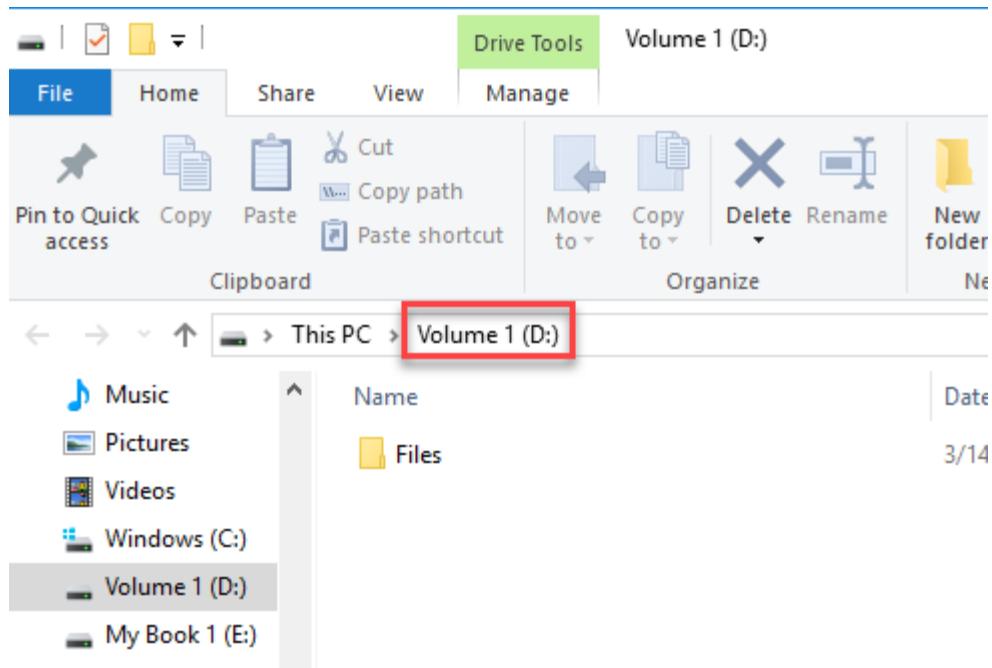

Access drive content in Windows

1. Locate the WD icon in the lower right hand corner of the PC system tray or select and start WD Discovery from the Start Menu
2. Click to launch WD Discovery

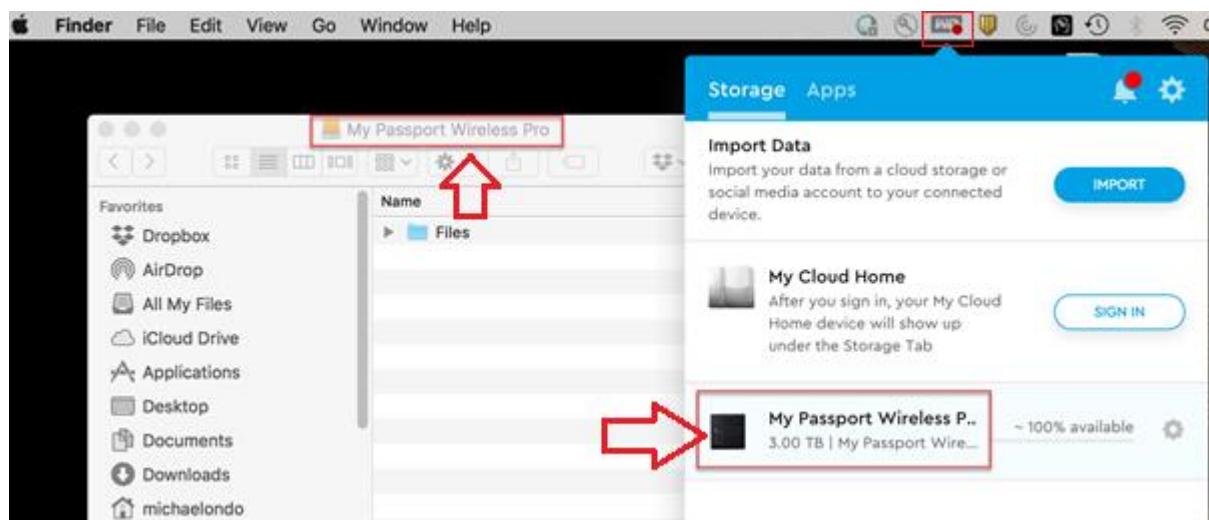

3. Click the drive to access the content

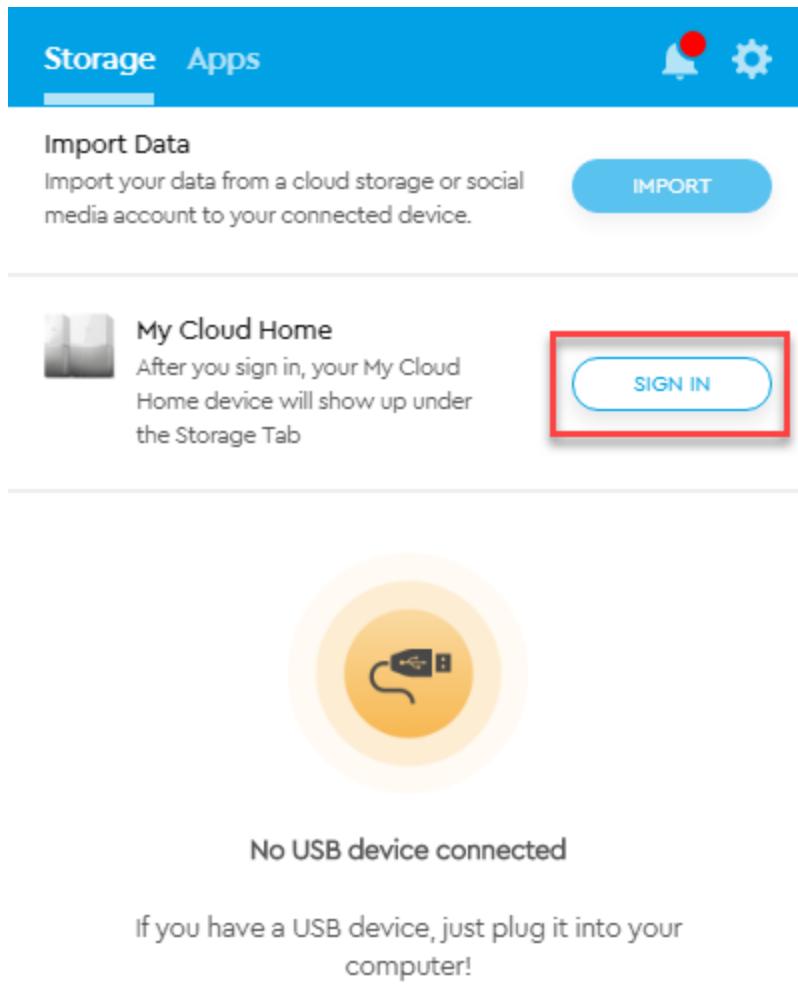

Access drive content on a Mac

1. Click the WD icon in the upper right hand corner of the Mac's menu bar and double click on the drive to access the content

The My Cloud Home Desktop App **comes preinstalled** with the WD Discovery software. **Basic instructions for setting up and accessing your My Cloud Home are as follows:**

1. If there are no other WD devices connected to the computer, the following page should be displayed under the **Storage** tab. Click **Sign In**

2. Enter your My Cloud Home credentials. If you do not have a My Cloud Home account, go to MyCloud.com and create one

Individual Drives (JBOD)

I understand, configuring the device will permanently
erase all the files on my device.

Configuring...

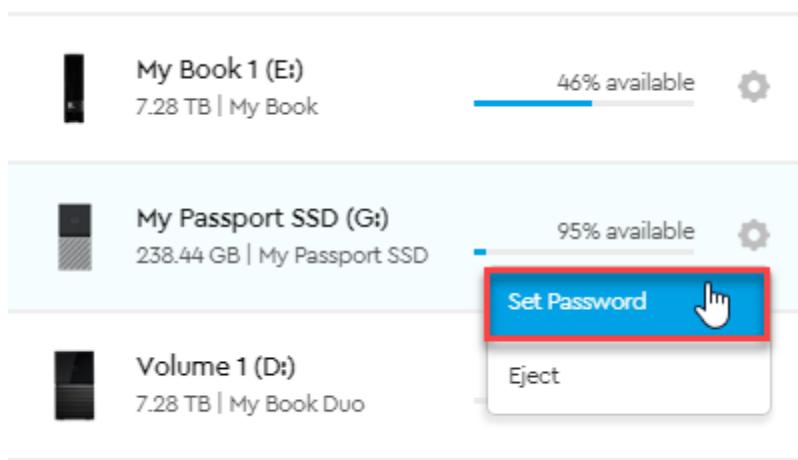

Do not unplug your device as it may be damaged.

4. Check RAID Settings to confirm current configuration

How to Set a Password and Unlock a Supported WD Drive

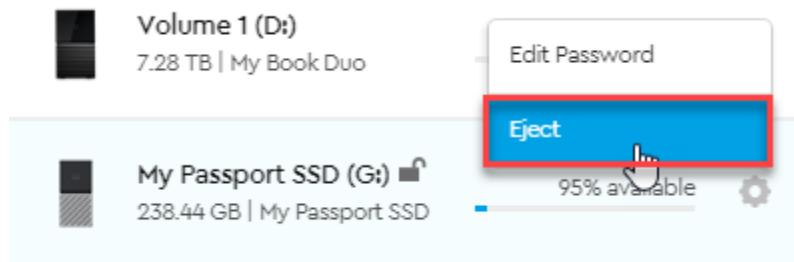

1. Click on **Settings** icon and choose **Set Password**

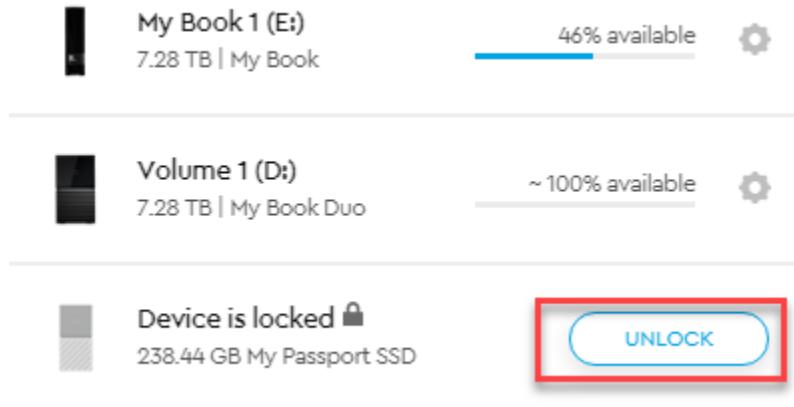

2. Type the **Password** , **Verify Password** , Password Hint (optional), and Click **Set Password**

3. **Eject** the drive and disconnect and reconnect the cable

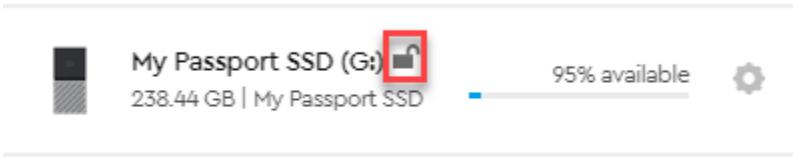

4. Click on **Unlock**

5. Type the **Password** and click **Unlock Device**

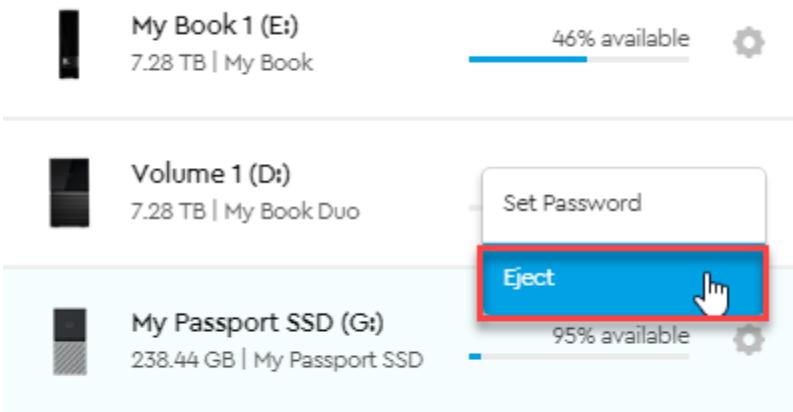

6. The drive is now unlocked

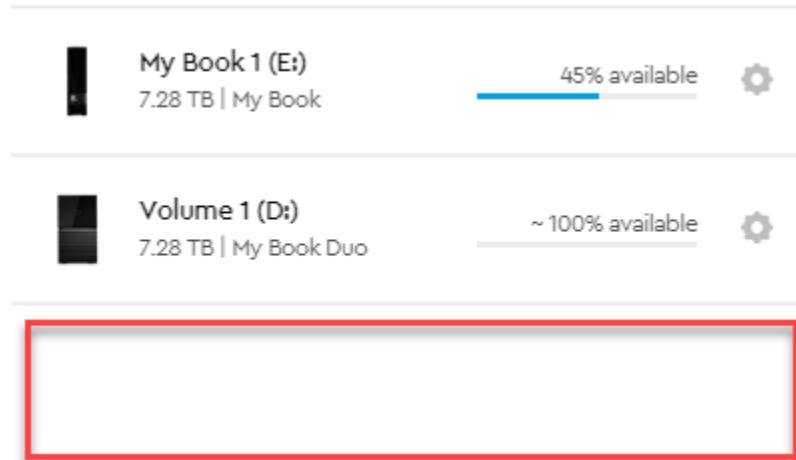

How to Eject and Turn LED On or Off

How to Eject

1. Click on **Settings** icon and choose **Eject**

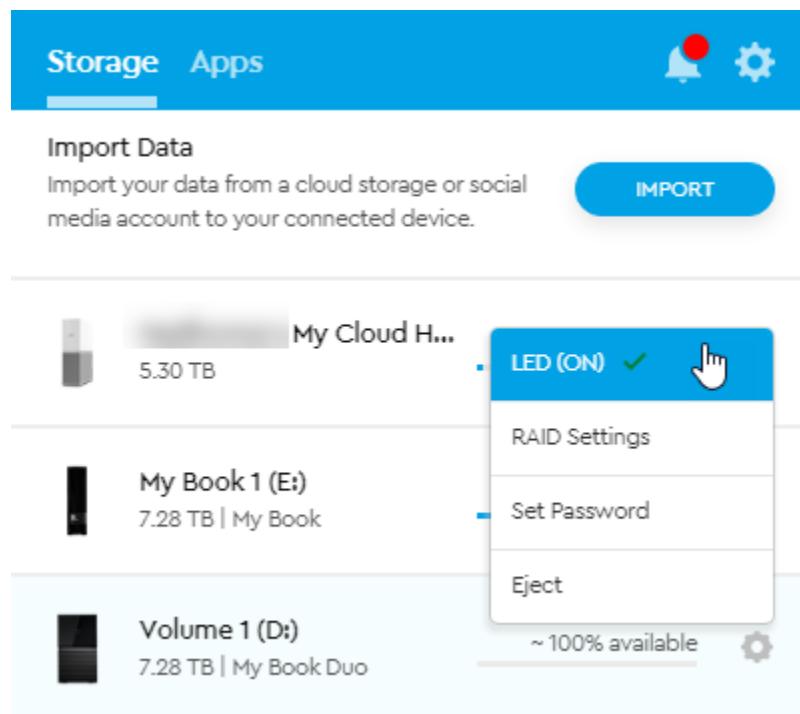

2. Disconnect the drive once it disappears from Discovery window

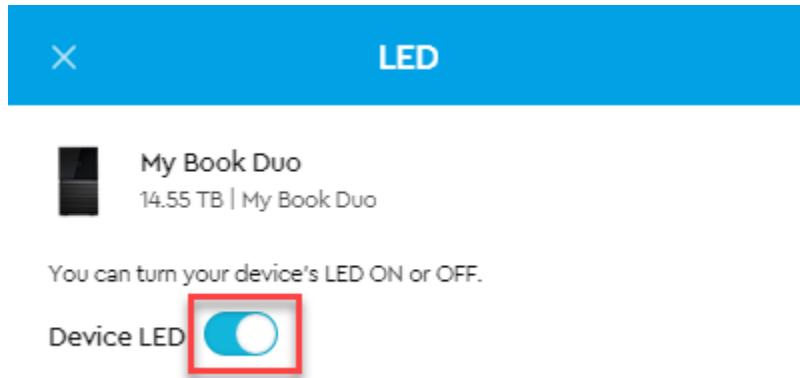

How to Turn LED On or Off

1. Click on **Settings** icon and choose **LED**

2. Set the LED switch to **ON** or **OFF**

How to Install WD Apps

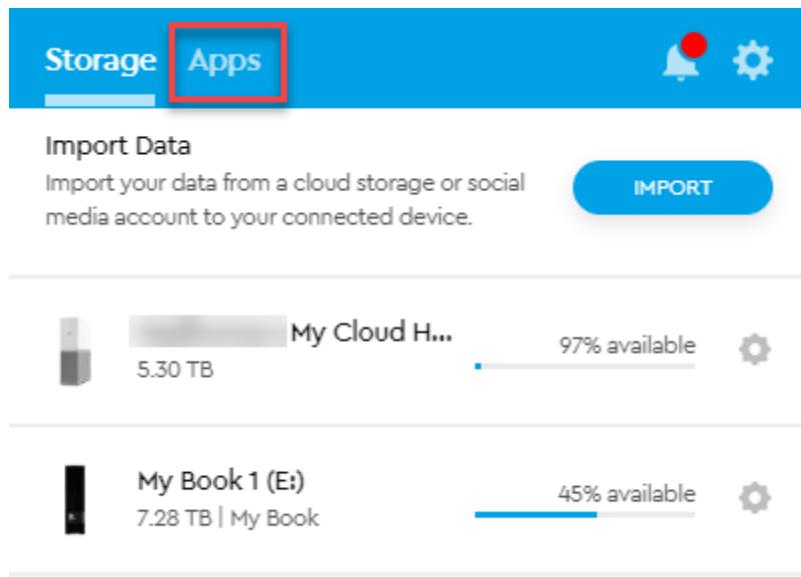

Important:

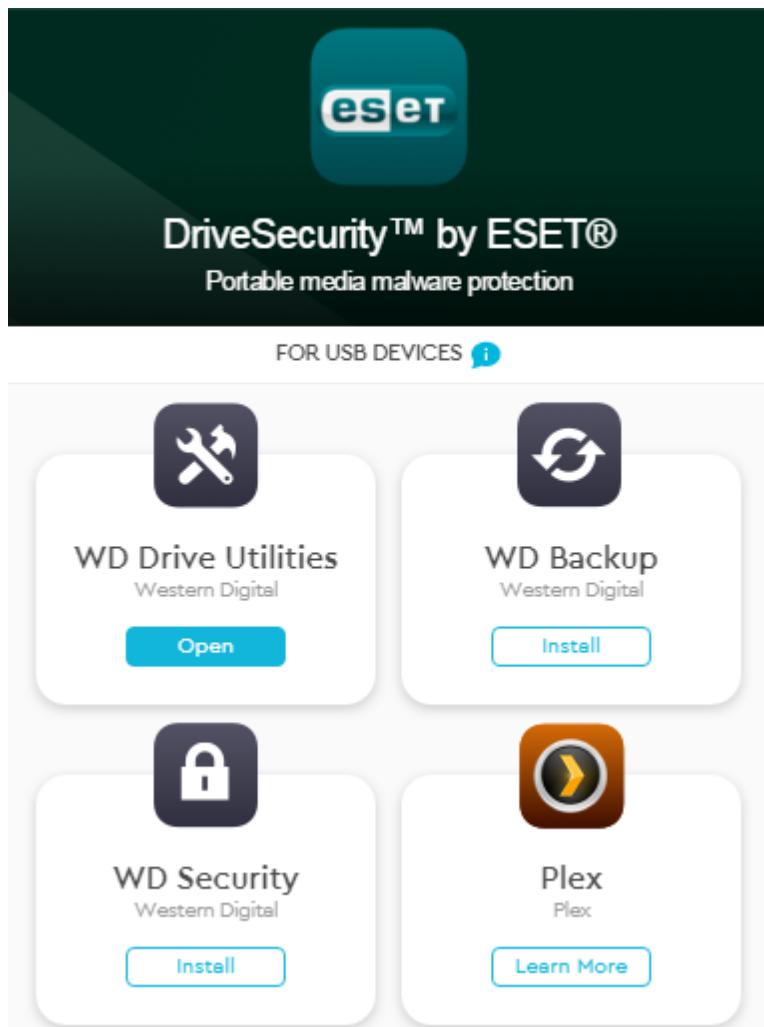

- Existing installations of WD Software supported by WD Discovery will prompt the user that a new version is available through the WD Discovery environment
- An active internet connection and ports 80 and 443 are required to install apps using WD Discovery

WD App Installation

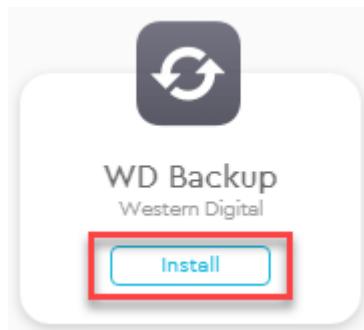

1. Open the WD Discovery and go to **Apps**

2. **WD Apps** are displayed at the top under the app banner. Scroll down to view 3rd party apps.

3. Click **Install** under the **WD App** that you wish to install on your computer

4. The **WD App** is downloaded and installed automatically by **WD Discovery**

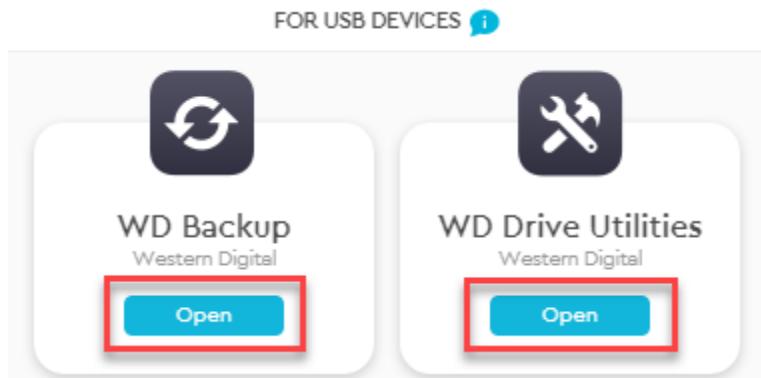

5. Click **Yes** when prompted to install the app
6. After the app installation has completed, the newly installed app is available and can be opened.

Note: App launch speed can depend of the state of the computer. Wait a few seconds to allow the App to start when there are many applications and or program open and in use

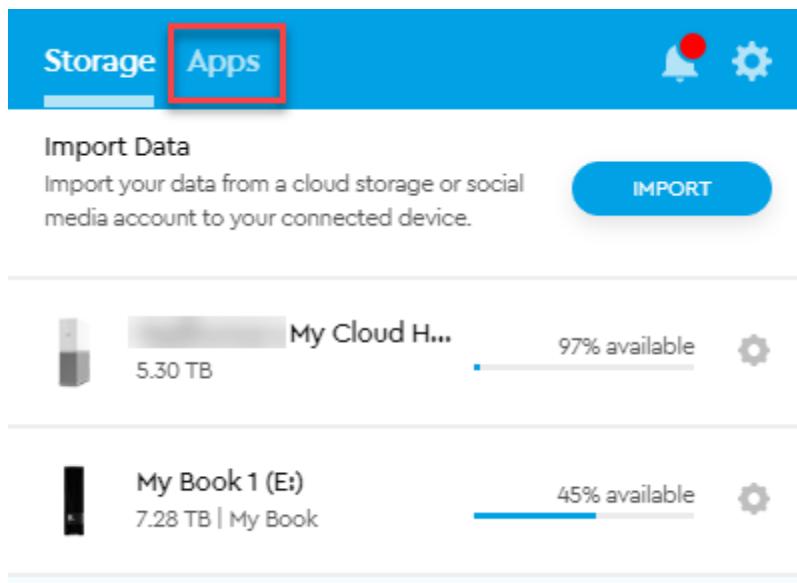

7. click **Open** to launch an installed app

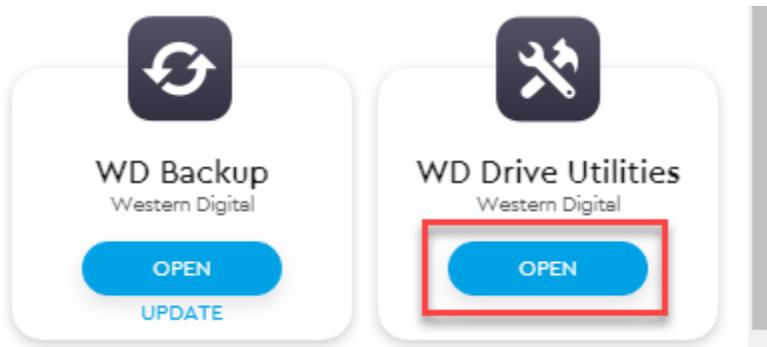

8. Repeat the steps above to install other **AVAILABLE APPS**

How to Open WD Apps

1. Open WD Discovery and go to the **Apps** tab

2. Click **Open** to launch an installed WD App

Note: App launch speed can depend of the state of the computer. Wait a few seconds to allow the App to start when there are many applications and or program open and in use

[How To Import Content from Cloud Storage or Social Media Account with WD Discovery](#)
Answer ID 18050

Before using the Cloud and Social media apps within WD Discovery, please create a Cloud or Social media account through the vendors web portal.

- [Click Here](#) to create a Dropbox account
- [Click Here](#) to create a Google Drive account
- [Click here](#) to create a OneDrive account
- [Click here](#) to create a Facebook account
- [Click here](#) to create a Instagram account
- [Click here](#) to create a Amazon Drive account

How to Import Social Media or Cloud Storage Data

Topic	Instructions
Dropbox	Click here for Instructions
Google Drive	Click here for Instructions
OneDrive	Click here for Instructions

Facebook	<u>Click here for Instructions</u>
Instagram	<u>Click here for Instructions</u>
Amazon Drive	<u>Click here for Instructions</u>

Access Token Expiry Times

An ***Import failed*** message can occur when importing large amounts of data and the access token expires.

- The access token expiry times are set and controlled by the Cloud and Social Media application provider.
- These settings cannot be controlled or changed by the end user or WD Technical Support.

Solution for Access Token Expiry Time

- Start a new Import if the process failed due to the access token expiring.
- The new import will only download files that were not previously imported.

The table below can be used to estimate import time limits by application

App Name	Access Token Expire Time	Access Token Refresh Amounts
DropBox	N/A	N/A
Google Drive	1 hour	50 Times
One Drive	1 hour	3 days
Facebook	60 days	N/A
Instagram	sometime in the future	undefined
Box	1 Hour	N/A

Important:

It should take 1 hour to sync down 1 GB of content.

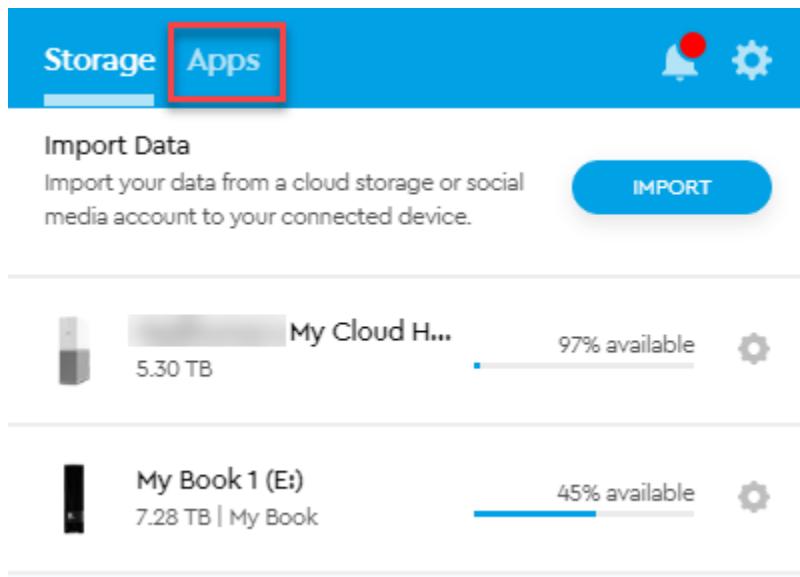

How to Update WD Apps

Important:

- Existing installations of WD Software supported by WD Discovery will prompt the user that a new version is available through the WD Discovery environment
- An active internet connection and ports 80 and 443 are required to install apps using WD Discovery

1. Open WD Discovery and go to **Apps** tab to view the WD Apps that have an updated version available

2. Apps that have an update will have an **Update** button under the **Open** button.

3. Click **Update**

- The WD App is downloaded and installed automatically by WD Discovery

4. Click **Open** to launch the WD App

Note: App launch speed can depend of the state of the computer. Wait a few seconds to allow the App to start when there are many applications and or program open and in use

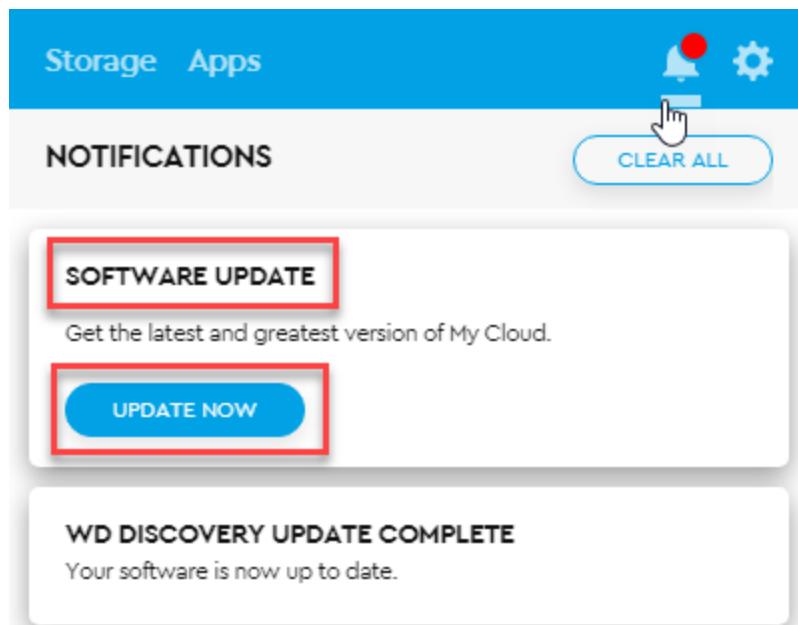

5. Repeat the steps above to **Update** other apps

How to Update WD Discovery

WD Discovery can be manually installed on computers that do not have an internet connection like any other software application

Update with internet connection

1. Updates for WD Discovery and My Cloud Home Desktop App will appear in the notification window. Click **UPDATE NOW** to start the update process.

Today

A new version [1.9.6598.18388](#) of WD Backup is available.
Click [here](#) to update.

10:29 AM

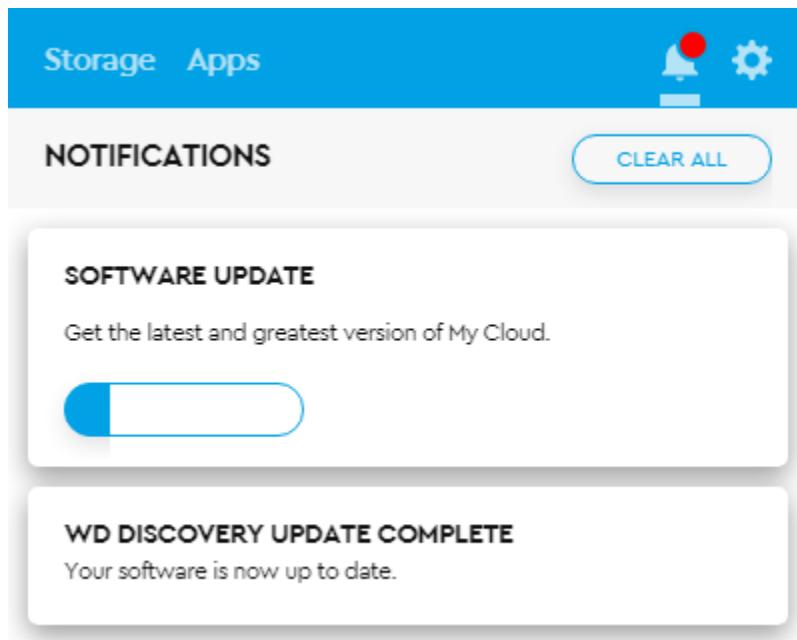

2 days ago

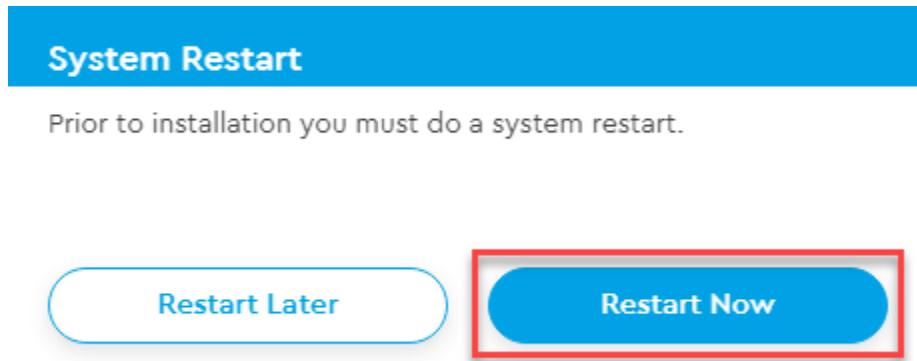

A new firmware [1025](#) is available for your My Passport for Mac device. Click [here](#) to update.

3/12/2018 5:55 PM

2. WD Discovery will update and restart automatically

3. A reboot may be required before or after an update to WD Discovery to complete the process. Select **Restart Now** at the prompt after the update process

Update without internet connection

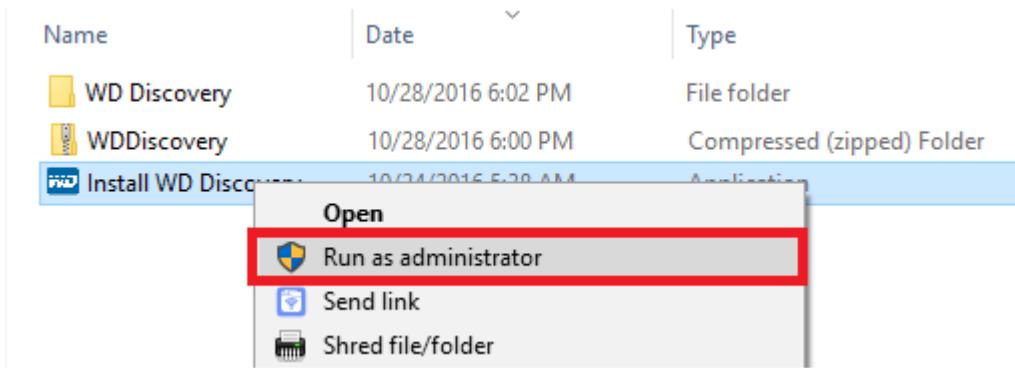

WD Discovery can be updated by downloading the most recent release

1. Download WD Discovery from our website or from the drive which includes the application

2. Right Click and extract the installer from the .zip file

Name	Date	Type
WD Discovery	10/28/2016 6:02 PM	File folder
WDDDiscovery	10/28/2016 6:00 PM	Compressed (zipped) Folder
Install WD Discovery	10/24/2016 5:38 AM	Application

3. Right Click the Installer and select **Run as Administrator**. Select Yes when prompted

The following message will appear if the newer version of WD Discovery is already installed.

Click **Close** to exit

Note:

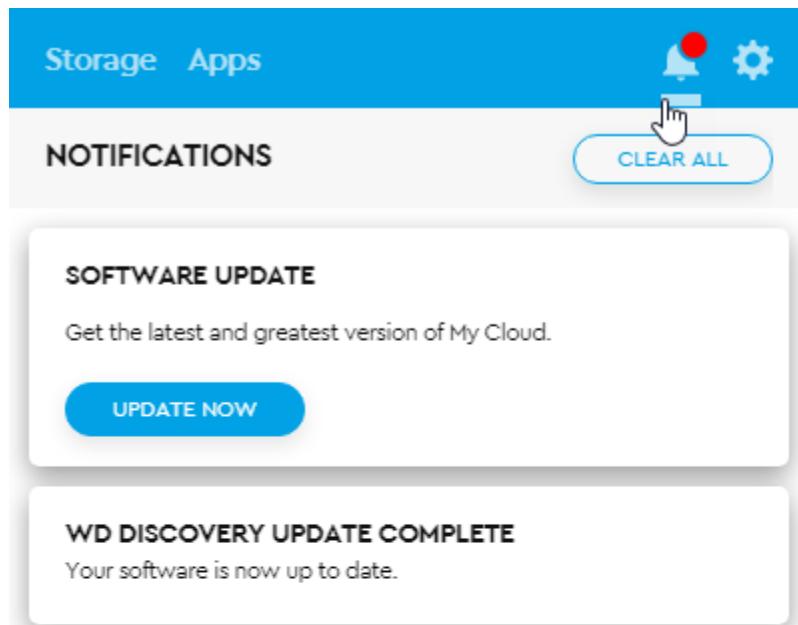

How to Update Device Firmware

Western Digital recommends that best practice is to keep a ***backup*** of your important data before updating the device firmware. Maintaining a valid backup protects against: **computer virus, data corruption, hardware issues, or environmental hazards**

Important: Always remember that "backup" means that you have your data stored in at least two (2) locations. Moving data from your system drive to an external hard drive is not a backup, unless there is already a duplicate of the file on a different drive

1. Open WD Discovery and check under **NOTIFICATIONS** to see if there is a new firmware available
2. If there is an update available, click on **here** to launch WD Firmware Updater

Today

A new version [1.9.6598.18388](#) of WD Backup is available.
Click [here](#) to update.

10:29 AM

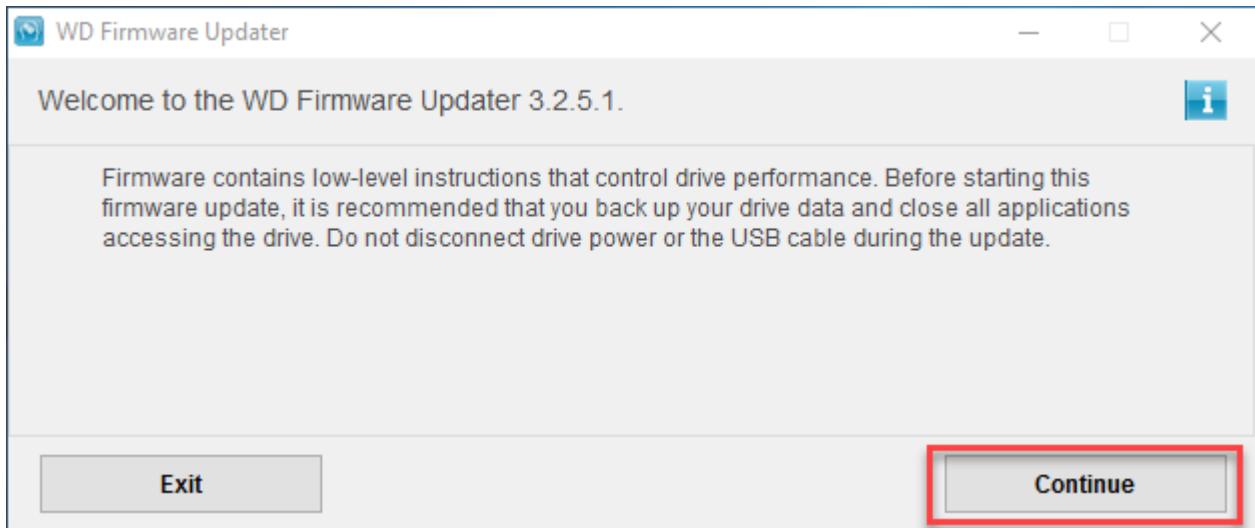

2 days ago

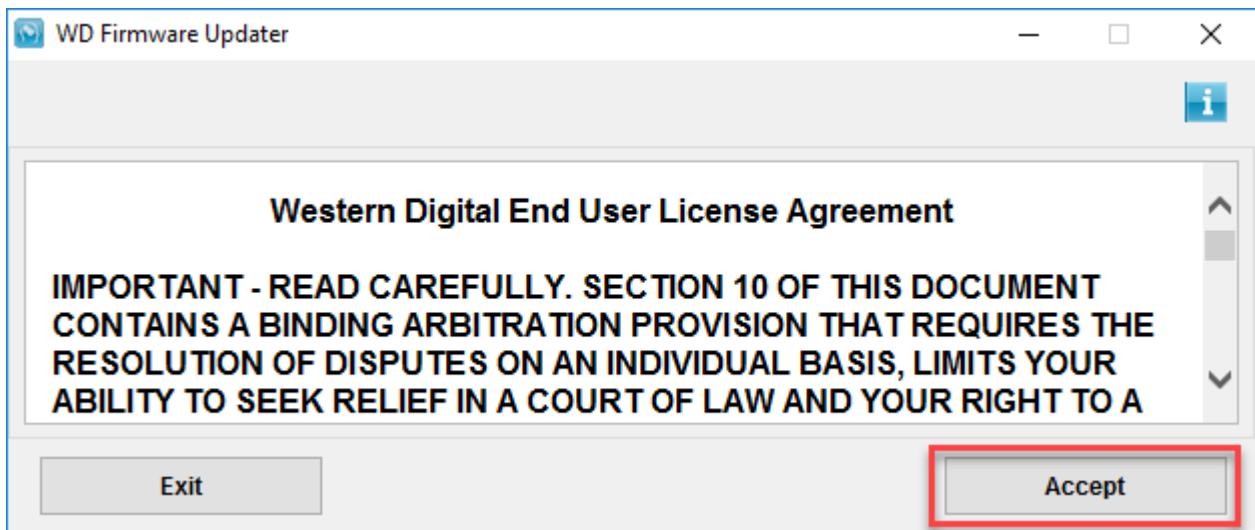

A new firmware [1025](#) is available for your My Passport for Mac device. Click [here](#) to update.

3/12/2018 5:55 PM

3. Click **Continue**

4. Read the Western Digital End User License Agreement and click on **Accept**

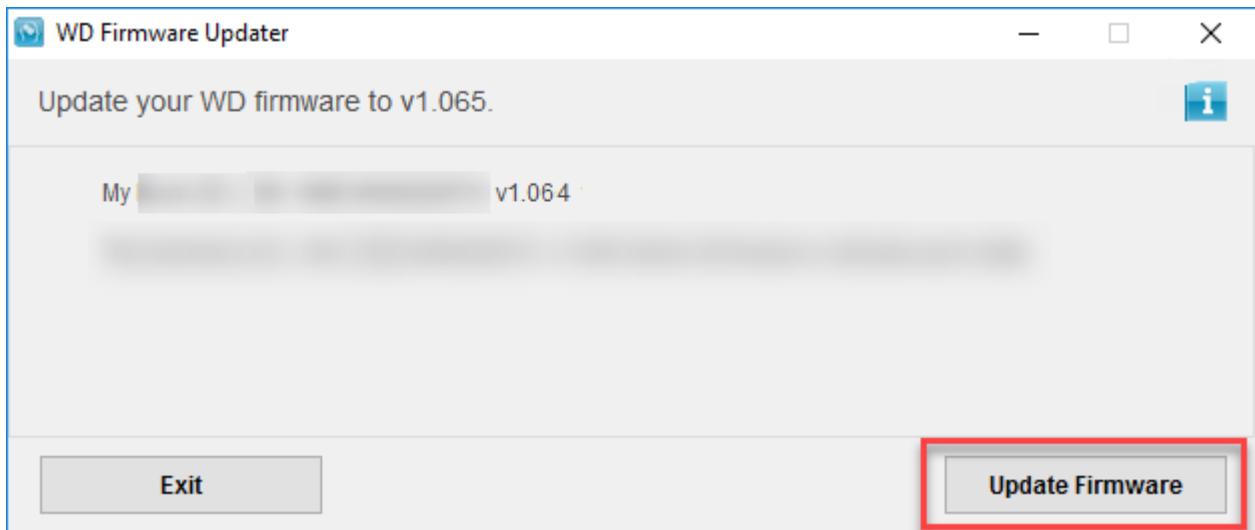

- 5.

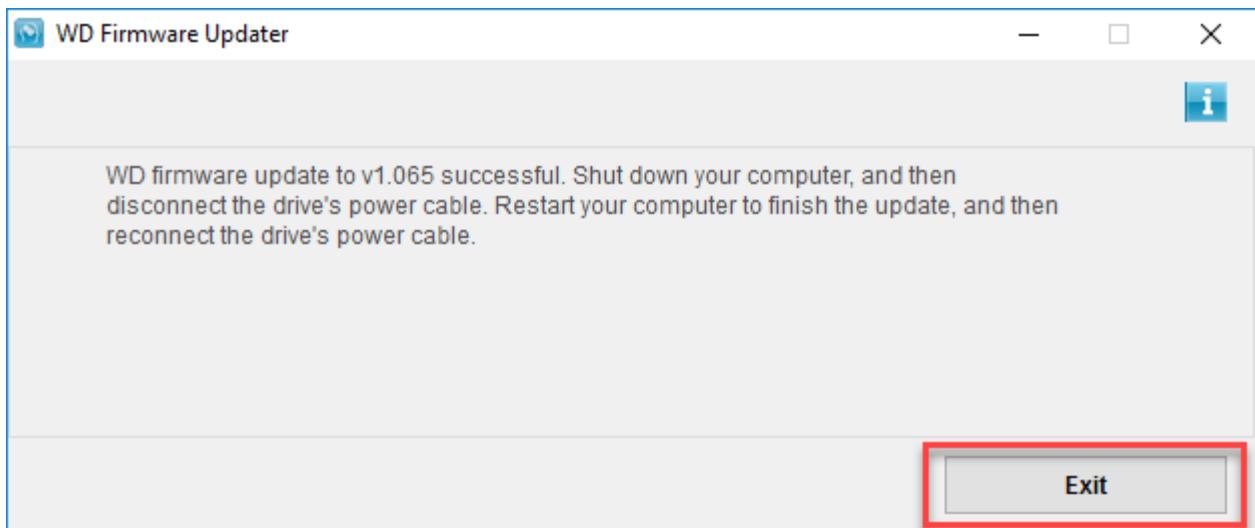

Important: **Disconnect** all other attached USB drives prior to updating the firmware

- 6.

7. Click on **Update Firmware**

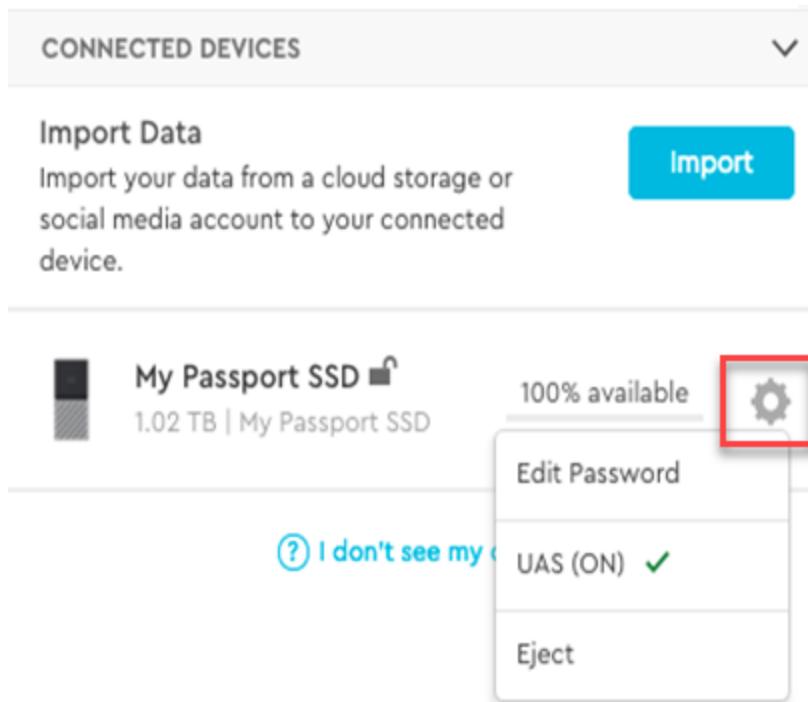

8. Click **Exit** once the firmware has been successfully updated

How to Turn on UAS (USB Attached SCSI) on My Passport SSD

USB Attached SCSI (UAS or UASP) is a protocol that uses SCSI commands over USB. If macOS version is 10.8 or above and Windows version 8 or above, setting UAS to on will provide faster transfer speeds. UAS is currently supported on My Passport SSD (Firmware 1.007).

1. Click the **Settings** icon next to My Passport SSD

2. Set the UAS Status to **ON**

If your system has OSX 10.8 or above, setting UAS ON would provide faster transfer speed.

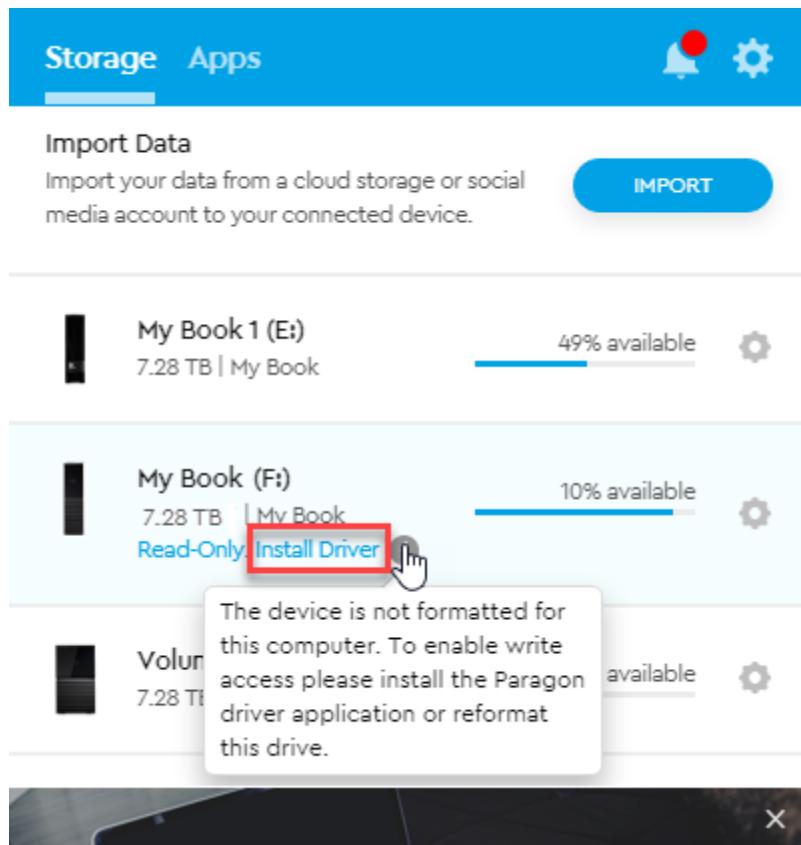

How to Install Paragon Driver on Windows and macOS

Paragon driver is an application that allows for full read-write access to drives formatted NTFS (read-only on macOS) and HFS+ (no read / write on Windows) on Windows and macOS without having to reformat the drive to exFAT.

Supported Drives:

- My Passport (New Model)
- My Book (New Model)

1. Click on **Install Driver**

2. Click **Install**

Paragon NTFS
Paragon Software Group

Install

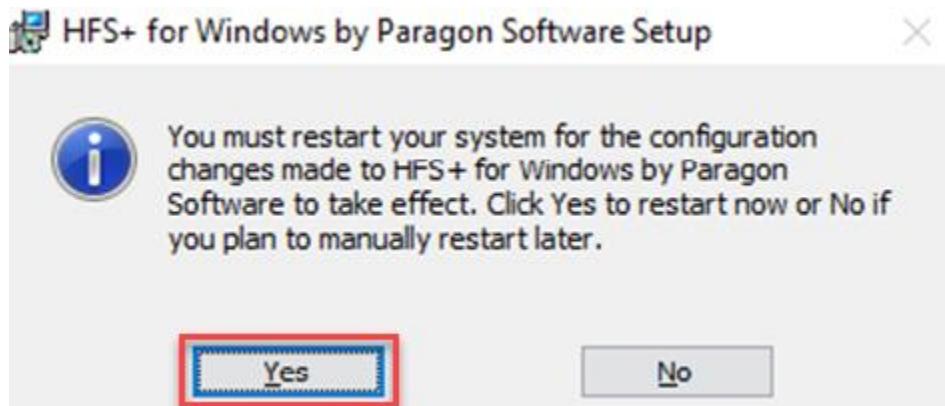

Description

Full read-write access granted! Write, edit, copy, move, delete files on NTFS volumes from your Mac! Fast, seamless, easy to use. Mount, unmount, verify, format, or set any of your Windows NTFS volumes as a startup drive.

Information

Company	Paragon Software Group
App Version	15.0.35

3. Restart the system

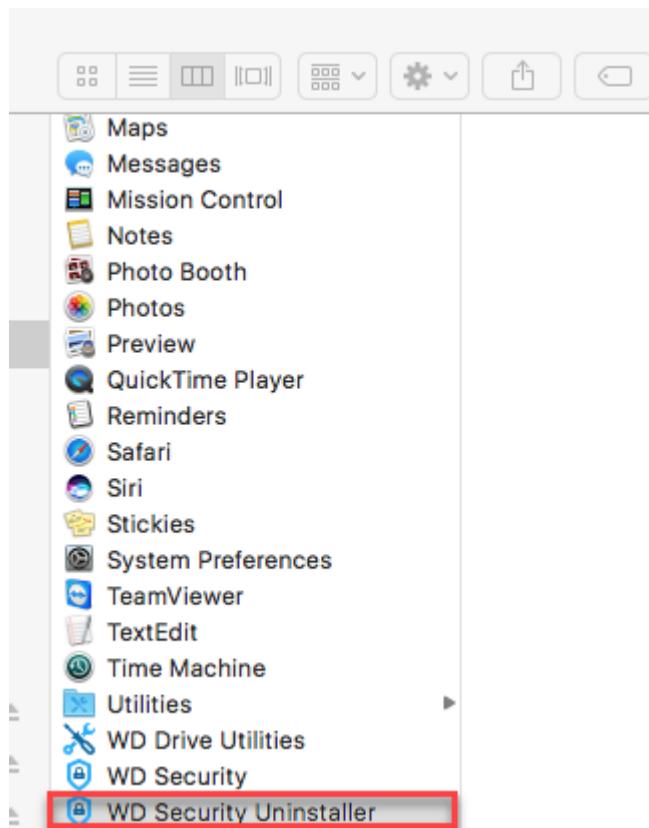

How to Uninstall WD Apps

Mac

1. From Apple menu bar, click on **Go** and open **Applications**

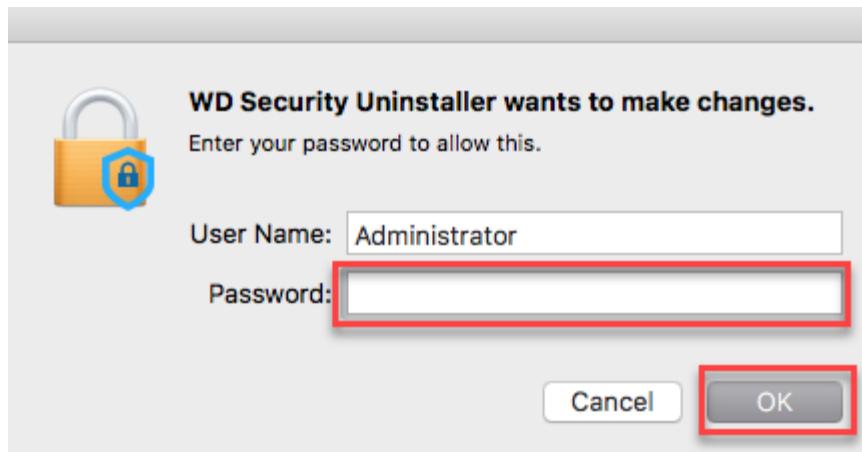

2. Go to the **WD App Uninstaller** (WD Security Uninstaller, etc.) and run the uninstaller

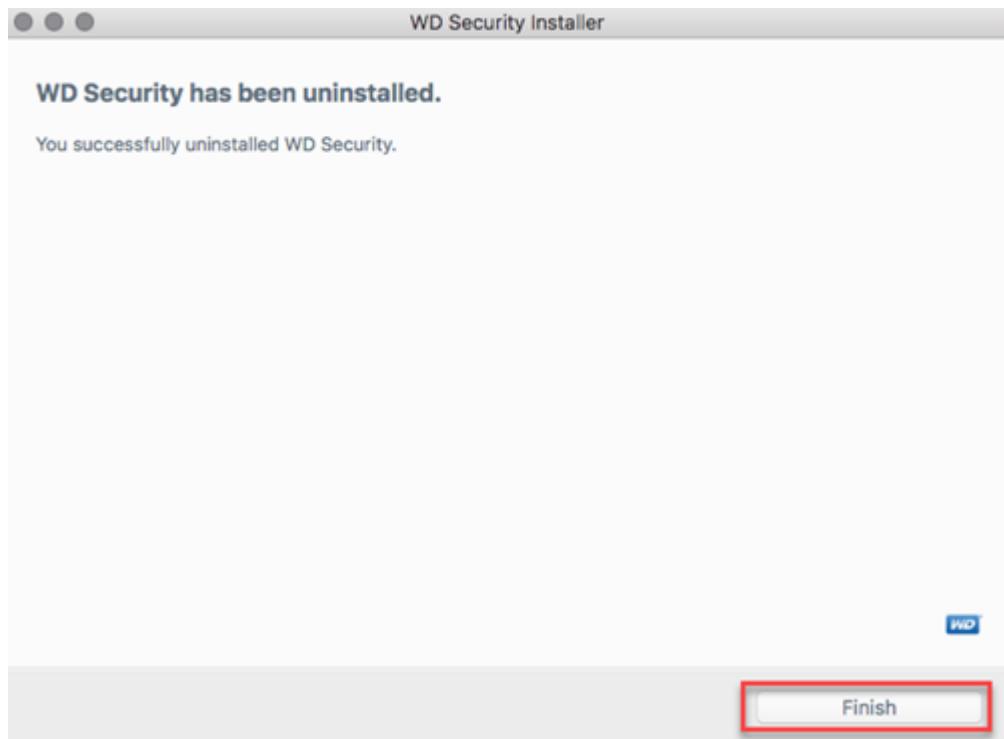

3. Check the box and click **Unistall**

4. Enter the Mac user's **password** and click **OK** and wait for the uninstaller to complete

5. Click **Finish** once the app has been successfully uninstalled

PC:

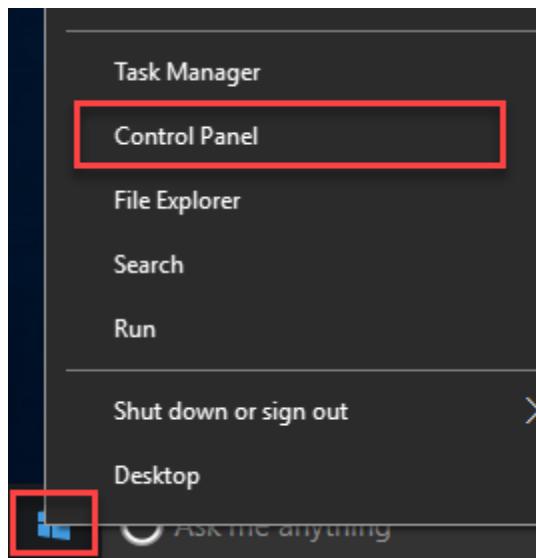

Important:

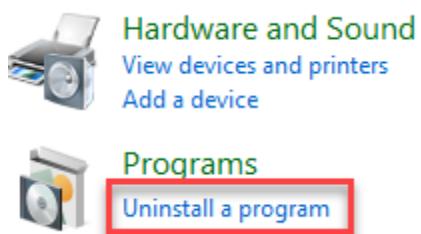

Steps and screenshots may vary based on the version of Windows being used

For more information on how to access the Control Panel please refer to the [Microsoft Article 13764](#)

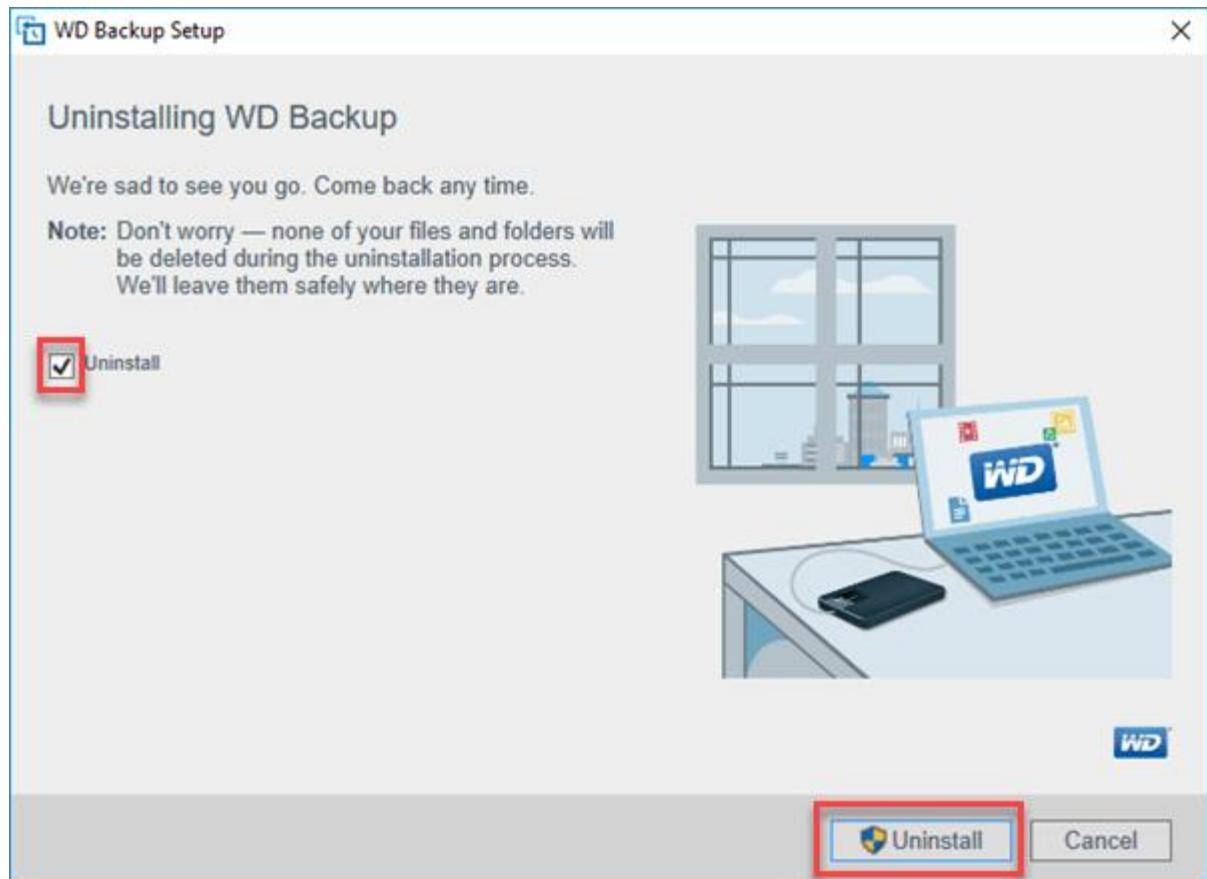

1. **Right** click on Windows **Start** button and go to **Control Panel**

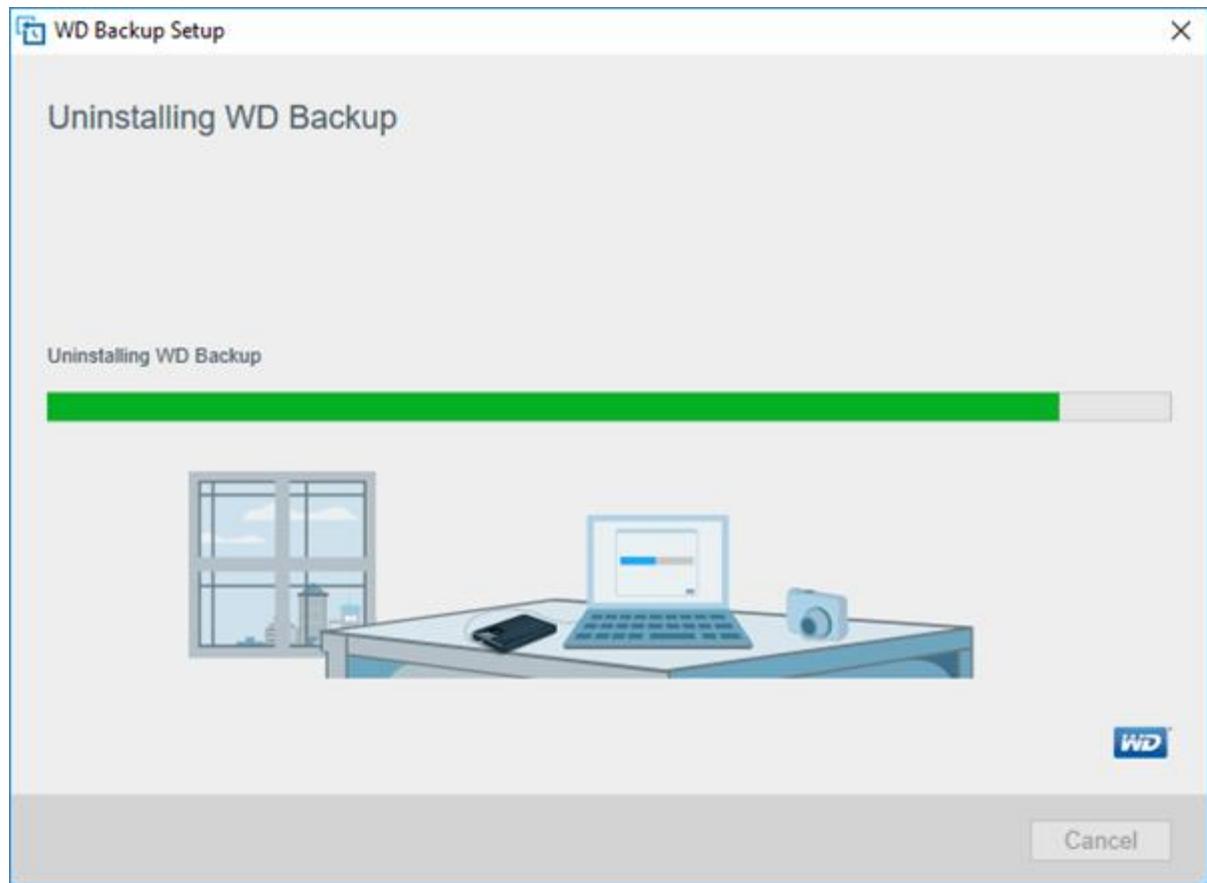

2. From the **Programs** choose **Uninstall a program**

3. Right click on **WD app** from installed programs and choose **Uninstall**

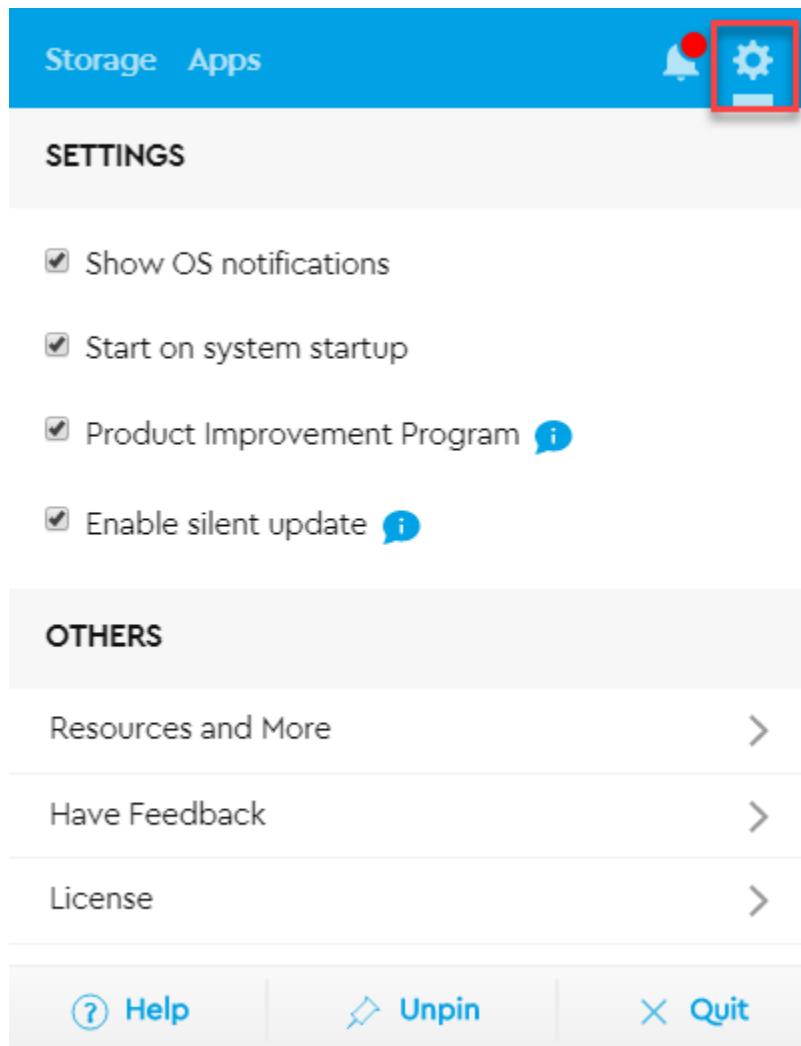

4. Check the box and click the **Uninstall** button

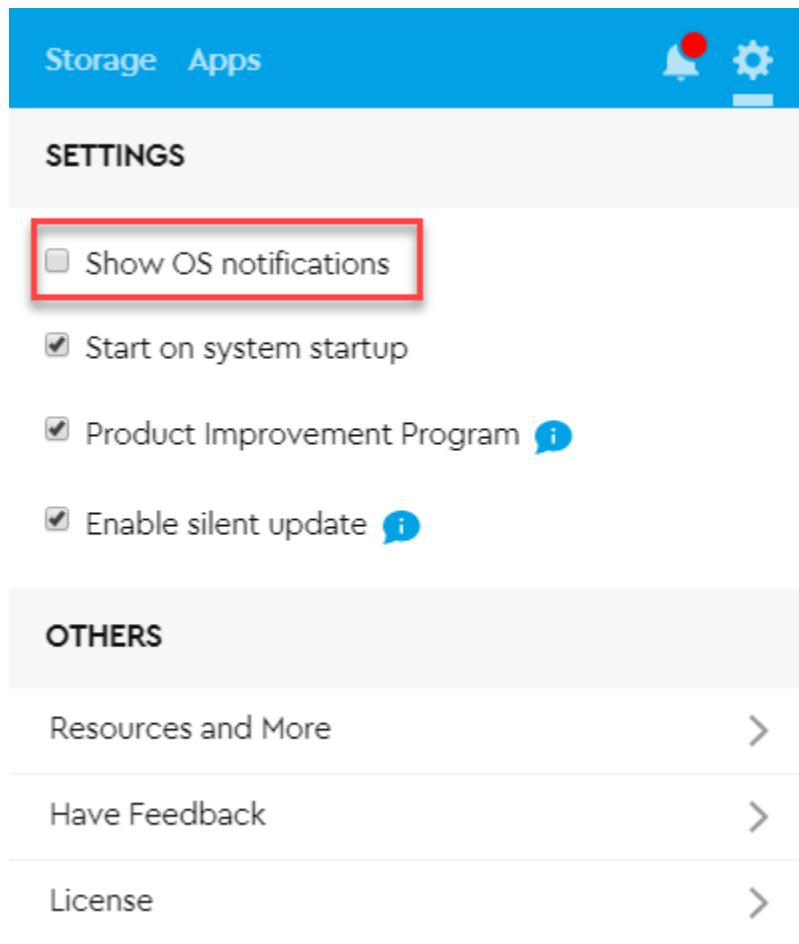

How to Turn Off Notifications, Start on System Startup, and Unpin from Windows System Tray and Apple Menu Bar

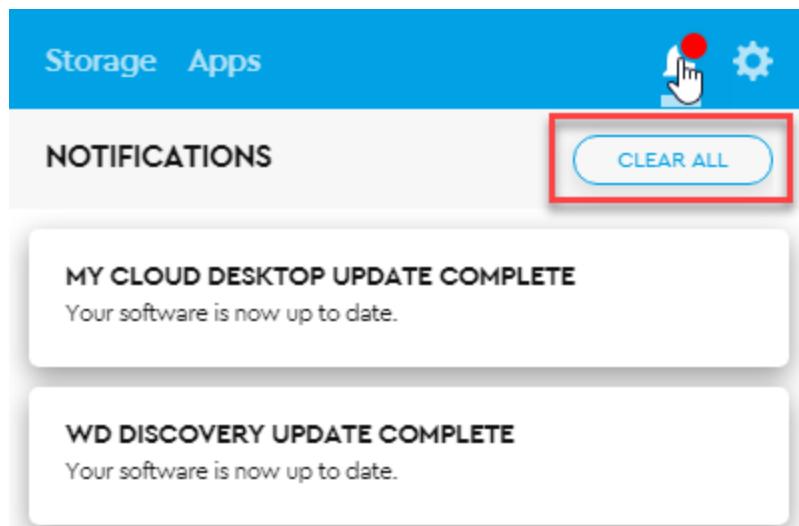

1. Open WD Discovery and go to **Settings**

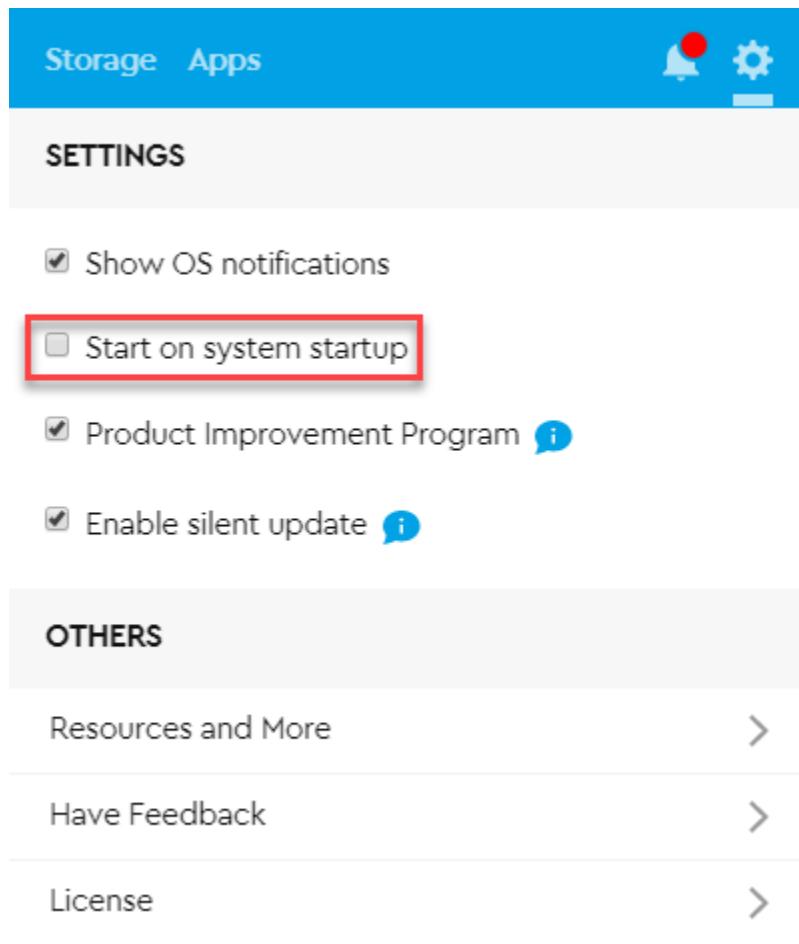

2. Uncheck the box for **Show OS notifications**

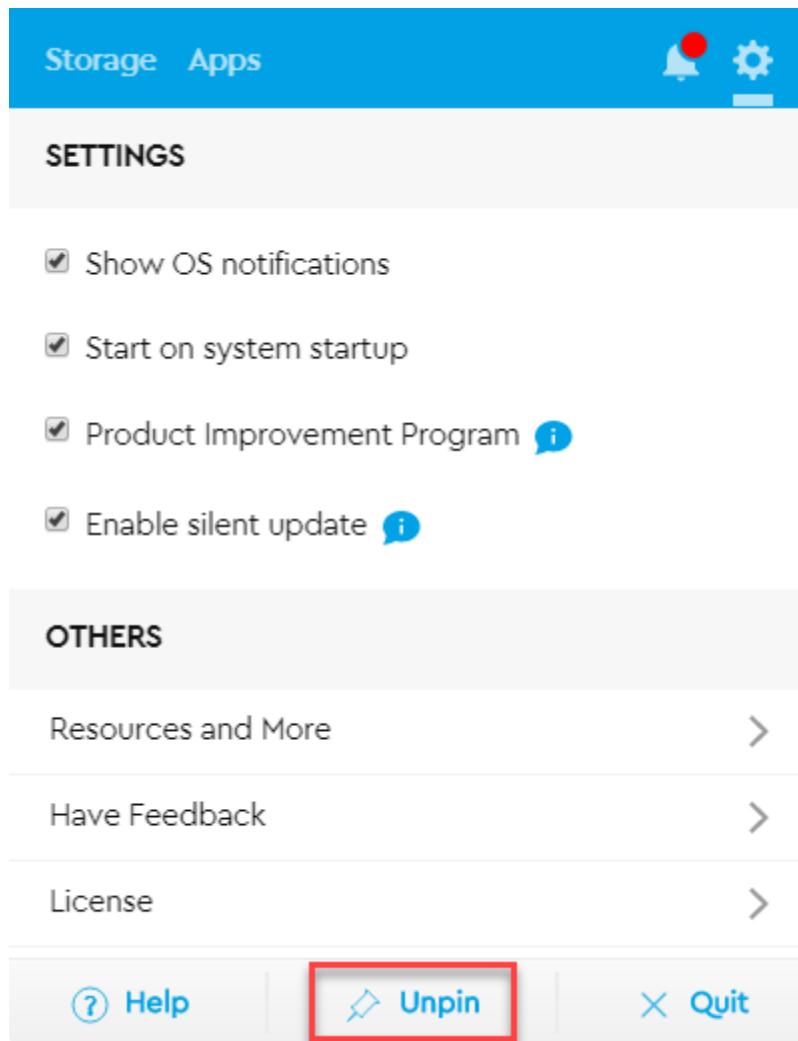

3. To clear all notifications, click on **Clear All**

4. To stop WD Discovery from automatically starting during computer start up uncheck the box next to **Start on system startup**

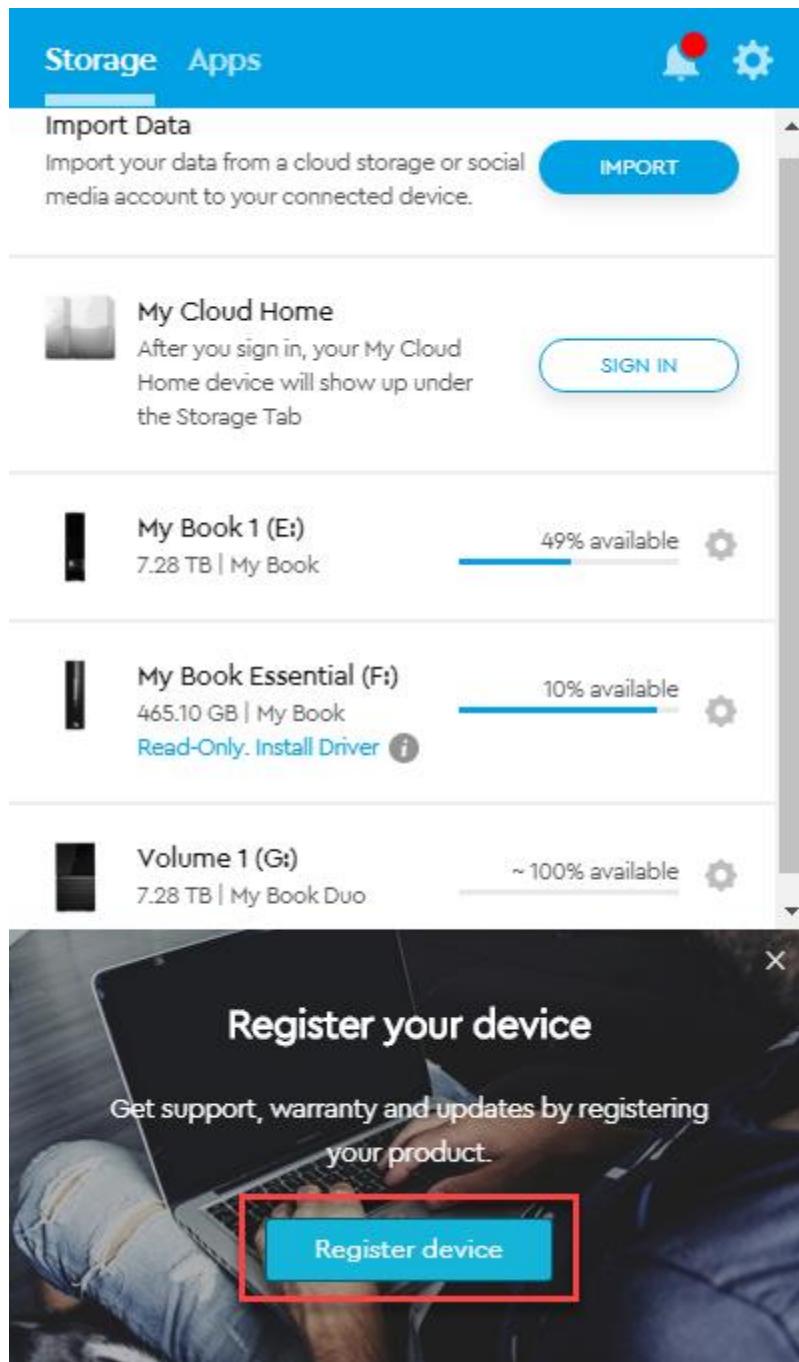

5. To move the WD Discovery window around, click the **Unpin**

How to Register a Drive

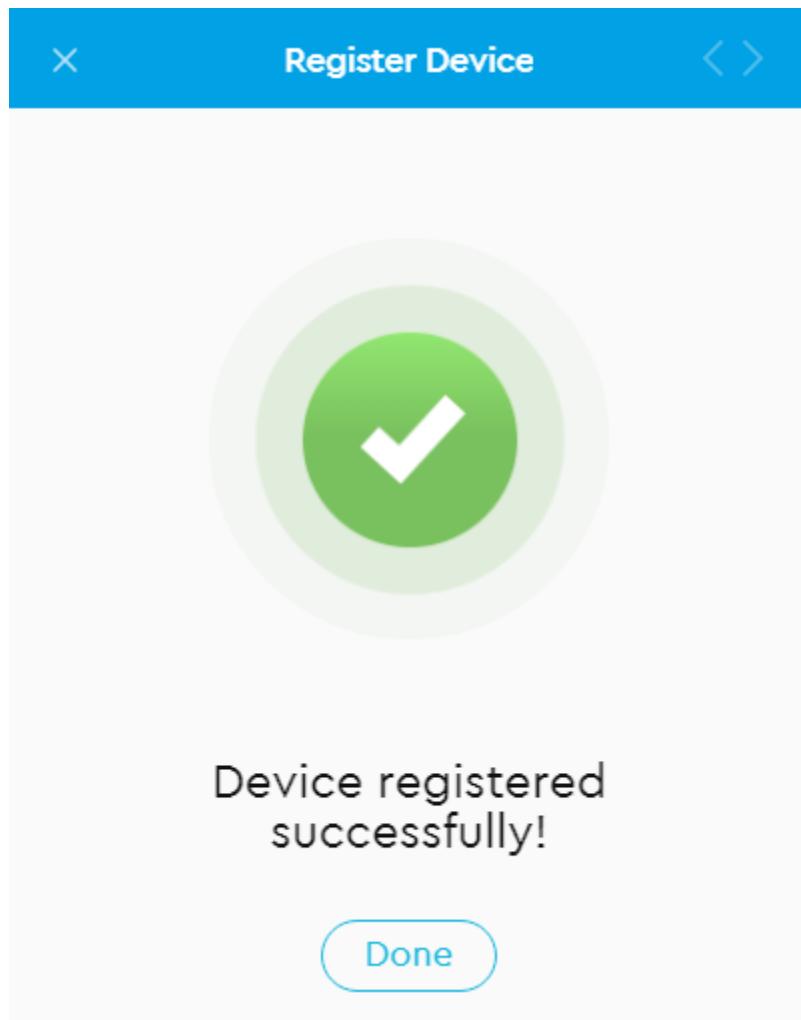

1. Open **WD Discovery** and Go to the **Storage** tab and at the bottom of the page click on **Register device**

2. Enter **First Name**, **Last Name**, **Email**, select the **Country** from the dropdown menu and click **Register device**

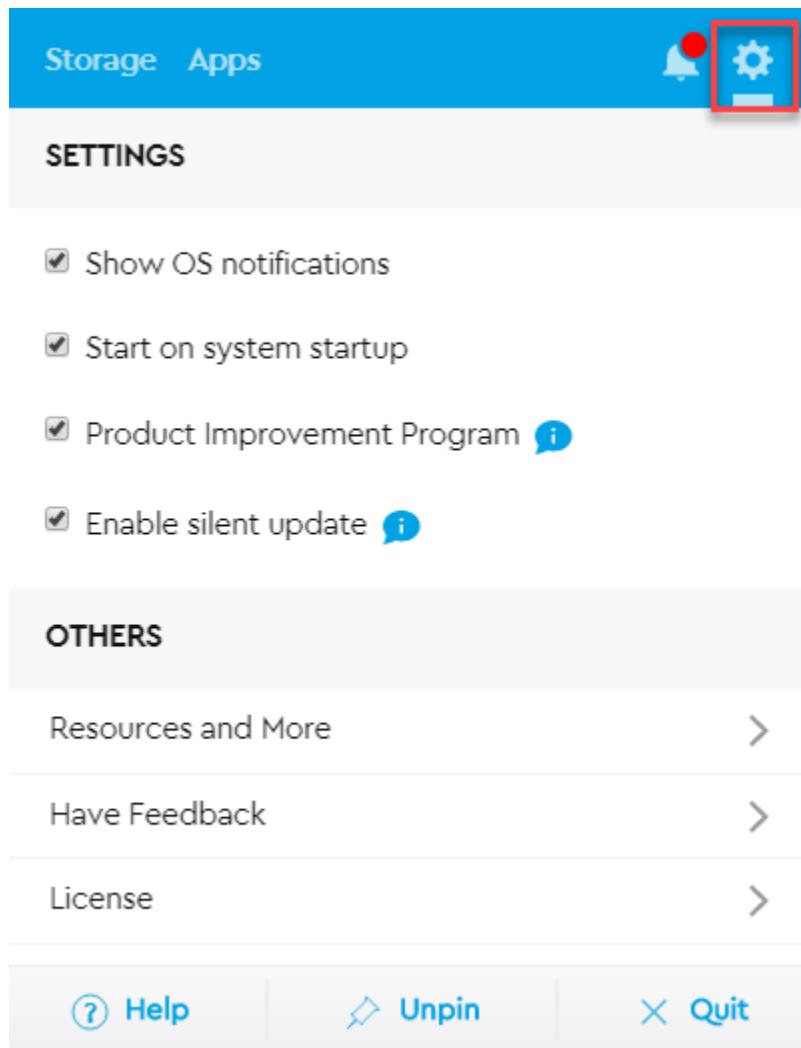

3. Click **Done** once the device has been successfully registered

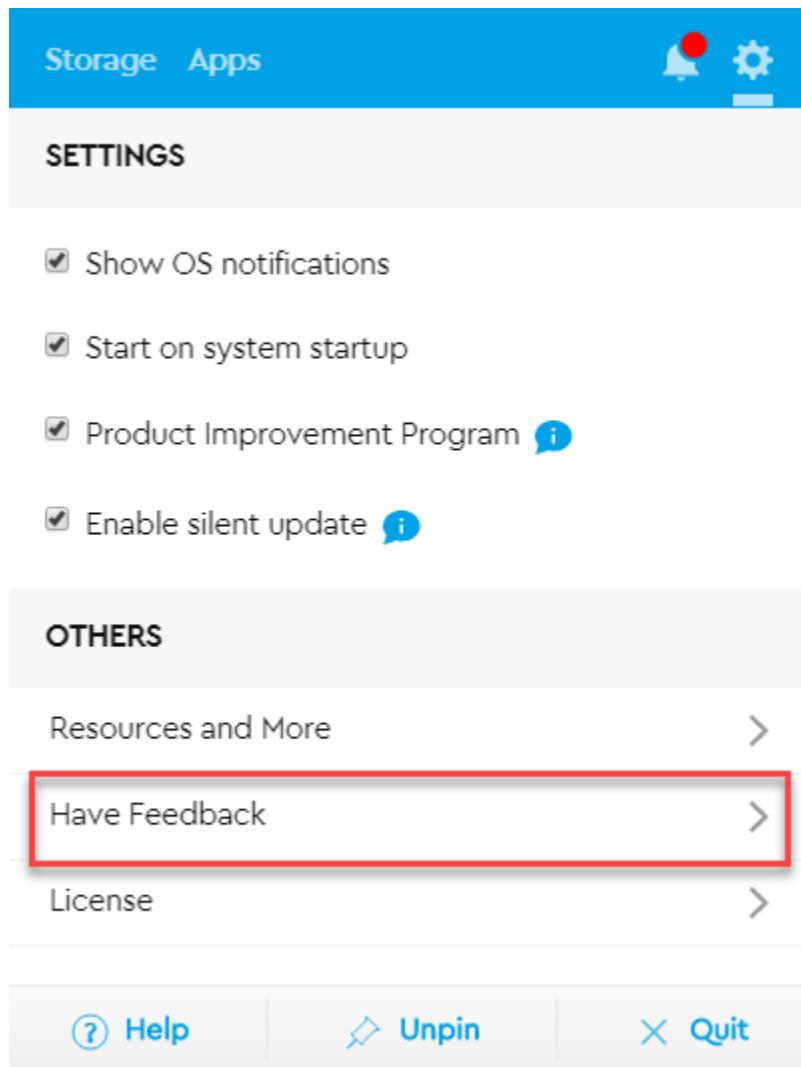

How to Provide WD Discovery Feedback

1. Open WD Discovery and go to **Settings** tab

2. Click on **Have Feedback**

3. Enter your **Email** and **Comments** and click **Submit**

WD Discovery Icon States

The WD Discovery icon is visible in the system tray:

- The icon can be visible by default:

- Or visible once opening the arrow:

Windows and macOS have the following four states:

1. Default State.

2. Selected State - When the system tray icon is clicked.

3. Activity In Progress - e.g. downloading software.

4. Critical Notification - An error within WD Discovery.

Supported WD Apps, File Systems, Operating Systems, and Languages

Supported WD Apps

WD Discovery supports the following WD apps

Windows

WD Backup (External Drive, and Dropbox backup)

Windows and MacOS

WD Drive Utilities (Installs with WD Discovery)

WD Security

Universal Firmware Updater (Launched by WD Discovery)

Supported File Systems

WD Discovery supports the following file systems

NTFS

exFAT

FAT32

FAT

HFS+

Supported Operating Systems

WD Discovery can be installed and is supported on the following Operating Systems

Windows

Windows 10

Windows 8.1 / 8.0 32-bit and 64-bit

Windows 7 SP1 32-bit and 64-bit

WD Discovery requires .NET 4.0 on Windows 7 and is installed with WD Discovery

Note:

Mac OS

macOS 10.12	(Sierra)
macOS 10.11	(El Capitan)
macOS 10.10	(Yosemite)
macOS 10.9	(Mavericks)

Supported Languages

WD Discovery is supported in the following languages

English

French

Italian

German

Spanish

Directory Removal

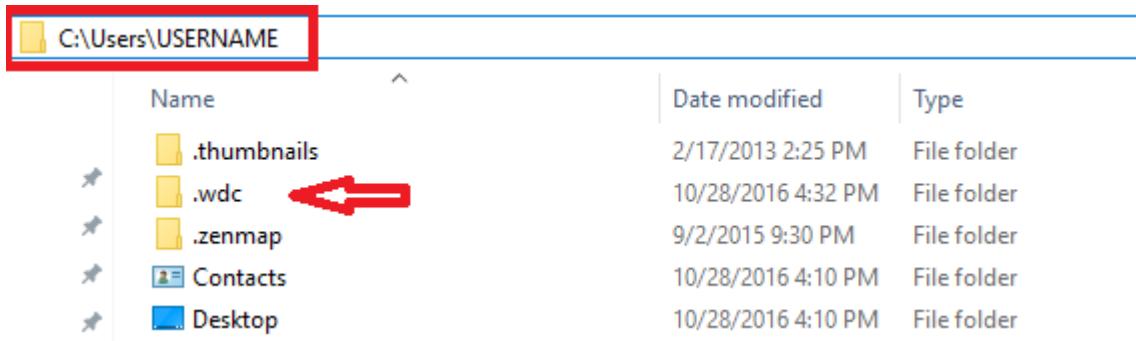

Manually delete the remaining files and directories after uninstalling WD Discovery Software

C:\Users\\$HOME\AppData is a hidden directory and will not be seen in Windows Explorer unless the "View Hidden Files" option is enabled on the PC

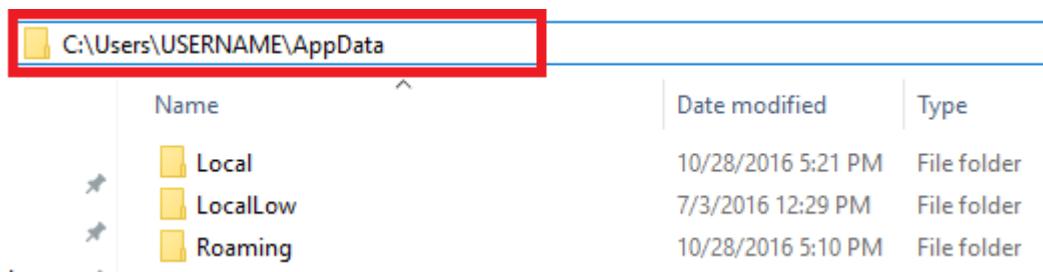

Note:

1. Go to C:\Users\USERNAME in Windows Explorer
2. Delete the **.wdc** folder

Name	Date modified	Type
.thumbnails	2/17/2013 2:25 PM	File folder
.wdc	10/28/2016 4:32 PM	File folder
.zenmap	9/2/2015 9:30 PM	File folder
Contacts	10/28/2016 4:10 PM	File folder
Desktop	10/28/2016 4:10 PM	File folder

3. Type \AppData after the USERNAME in the location bar and press Enter

Name	Date modified	Type
Local	10/28/2016 5:21 PM	File folder
LocalLow	7/3/2016 12:29 PM	File folder
Roaming	10/28/2016 5:10 PM	File folder

4. Go into the AppData/Local/Temp directory and delete all WD Discovery files in the Temp directory. **DO NOT** delete the Temp directory itself

- C:\Users\USERNAME\AppData\Local\Temp

5. Delete the following WD Discovery folders

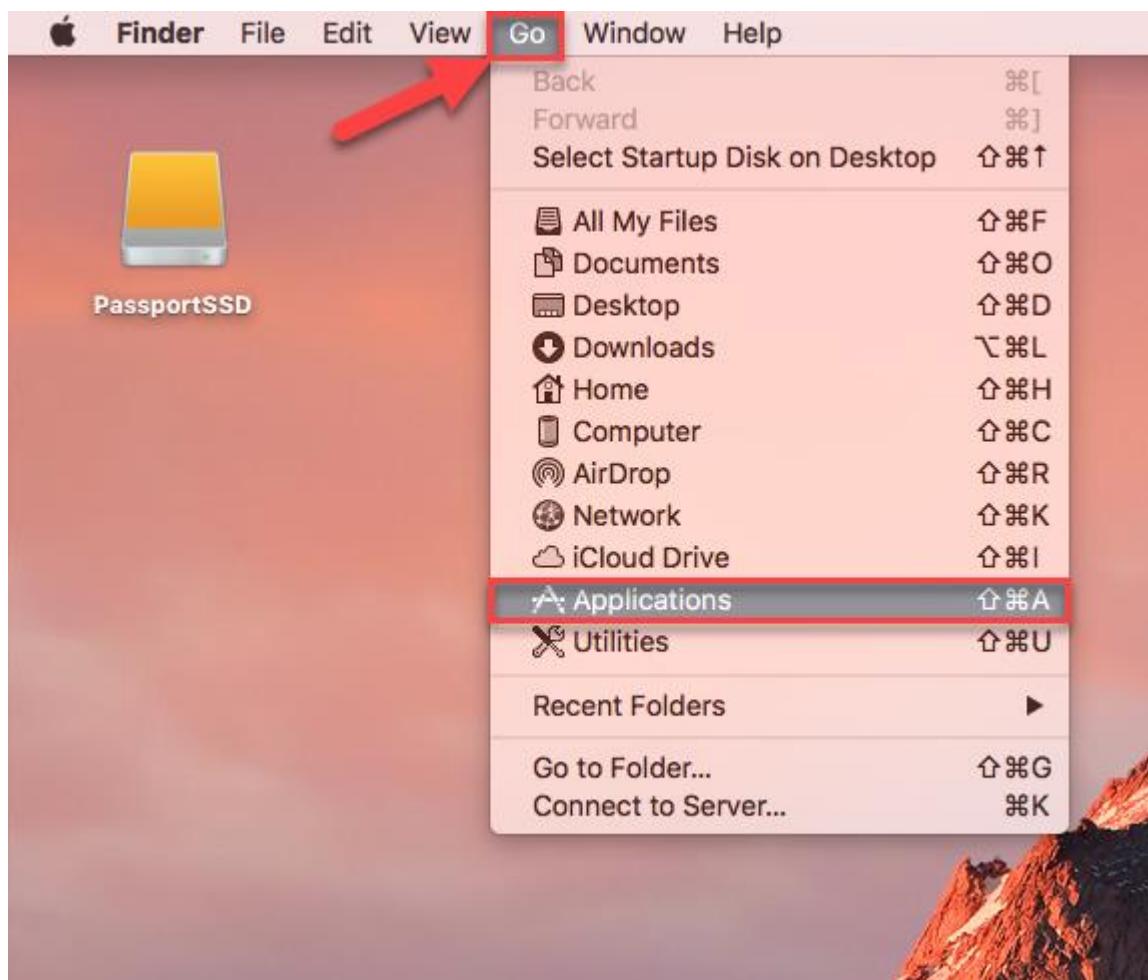

- C:\Users\USERNAME\AppData\Local\Western Digital\WD Discovery
- C:\Users\USERNAME\AppData\Roaming\Western Digital\WD Discovery

WD Discovery has been completely uninstalled and removed

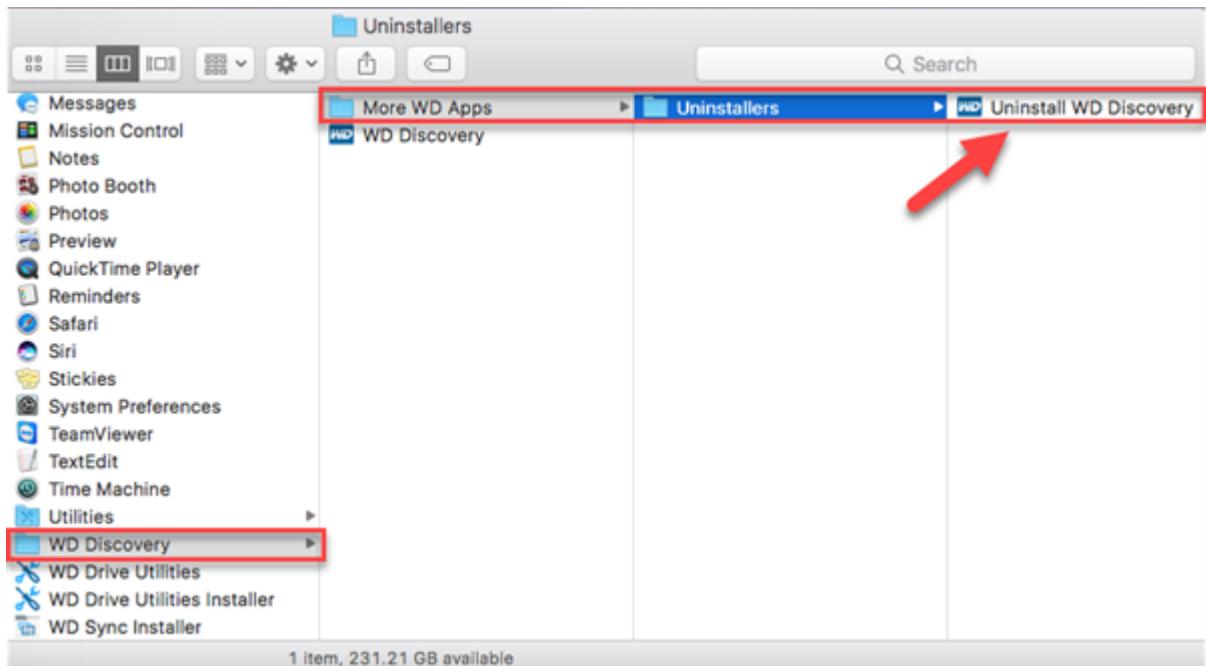

We recommend rebooting the computer

How to Uninstall and Remove on macOS

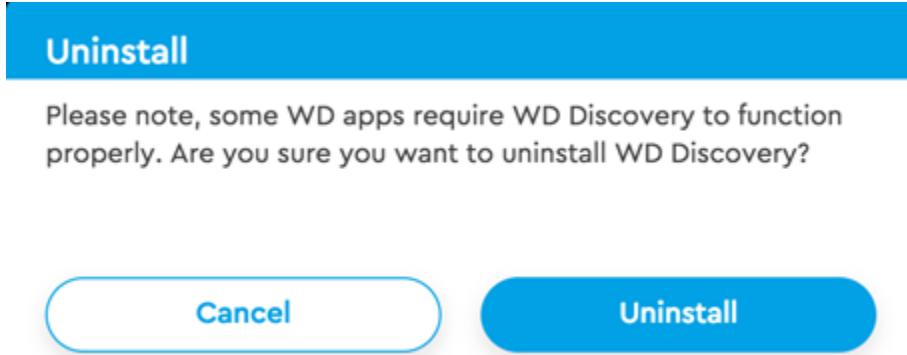

1. From Apple menu bar, click on **Go** and open **Applications**

2. Go to **WD Discovery** , **More WD Apps** , **Uninstallers** and double click **Uninstall WD Discovery**

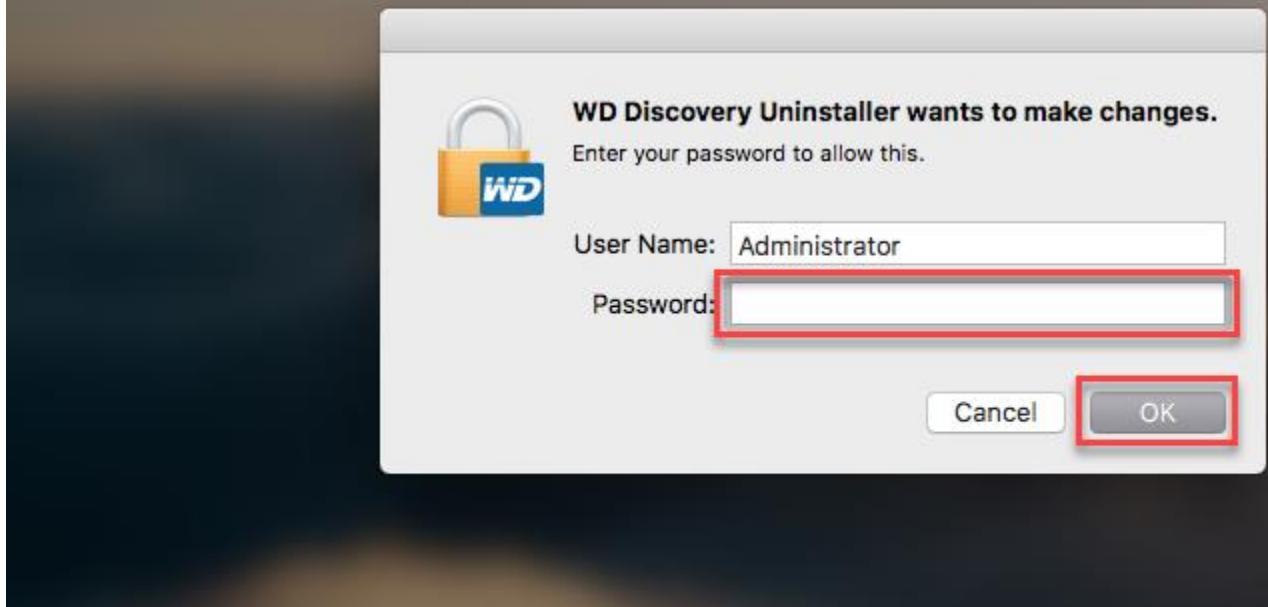

3. Click on **Uninstall**

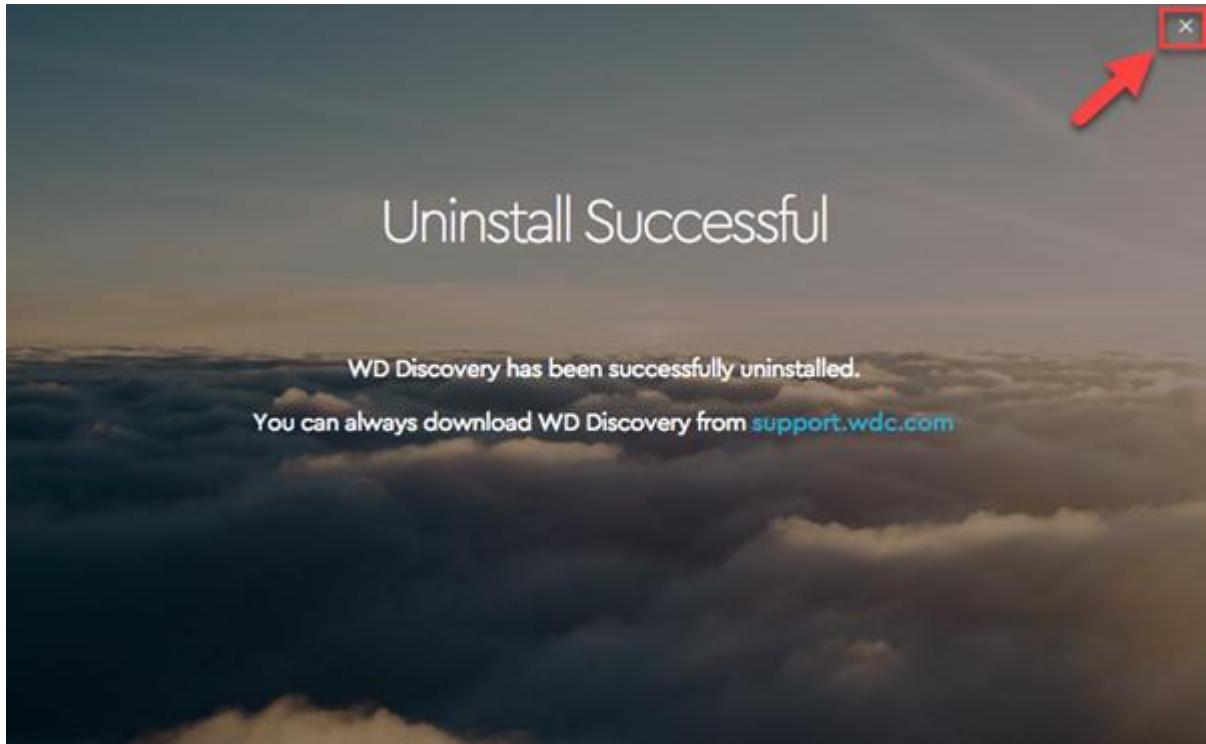

4. Enter the Mac user's **password** and click **OK** and wait for the uninstaller to complete

Uninstalling ...

5. Click the X once the **WD Discovery** has been successfully uninstalled

6. Check the following folders:

- **/Applications/WD Discovery**, remove it if it still exists
- **~/.wdc** , remove if it still exists
- **~/Library/Application Support/WD Discovery**, remove if it still exists
- **/Library/LaunchAgents**, remove everything which starts with com.wdc (for 1.x)

7. Reboot the Mac
