WATER GARDEN

EXPERIENCE THE MAGIC OF AQUAPONICS

For thousands of years, farmers all over the world have used aquaponic growing systems (raising fish & plants together) as a sustainable & efficient way to grow food. Aquaponics can use 90% less water than traditional farming!

Now, you can bring the magic of aquaponics inside with the Water Garden — this easy & fun closed-loop ecosystem is perfect for any home or classroom! Just feed your fish and watch the garden on top come to life — all without any soil!

GROW ONE, GIVE ONE

Help us make gardening a part of every school curriculum. Post a picture of your growing Water Garden with #GrowOneGiveOne and tag @backtotheroots to be entered to win one for a classroom of your choice in our monthly giveaway!

WATER GARDEN

THE SELF-CLEANING CYCLE AQUAPONIC ECOSYSTEM

The Water Garden is not your average fish bowl. While regular tanks require weekly water changes to keep your fish happy and healthy, the Water Garden uses an aquaponic self-cleaning cycle, so you don't need to clean the tank as often!

WE'D LOVE TO HEAR FROM YOU! @BACKTOTHERROOTS
