SAFETY ON BOARD - HELLA BULBS

Dear customers:

In this first edition of the HELLA light bulb catalog, we have integrated new product families: LED bulbs, new xenon lamps and new special bulbs in blister pack presentation, in addition we include Emergency Sets with bulbs and fuses.

The specific standards that we apply to our wide range of bulbs allows us to offer you: diversity of products in standard halogen bulbs or, special high-performance bulbs (design-oriented) to xenon and LED light, which are subjected to rigorous tests high quality provide an optimal level of light output, even in the most adverse weather conditions.

This ensures that our products are durable and high performance, not only have the lowest possible failure rates, but they are also significantly brighter.

**FIRST
EDITION**

Our catalog offers you a general and detailed overview of the full range of products. For more details and other applications, please consult our web pages:

HELLA BULBS

Simulations and calculations have been used to support the development of headlights for many years. However, this information alone can not replace the actual impression of lighting as seen in the largest European Light test center in HELLA facilities Lippstadt, Germany.

Geometrical Measurement

A measuring projector is used to check the filament geometry - with regard to the statutory standards in accordance with IEC 60810. The filament must be dimensioned and positioned within bulb specifications.

Vibration and Shock Test

Here, vibration resistance of the bulb and the filament in particular, are tested on an electrodynamic vibration table.

Life Test

Sophisticated tests are used to prove the high reliability of the HELLA bulbs over a long period.

Paint Adhesion Test

The adhesion of paint on colored glass bulbs – such as the PY21W for example – are tested in a climate chamber at different temperatures and air humidities. Optimum adhesion of glass bulb paint guarantees the prescribed amber indicator light over the whole service life period.

Light Flux Measurement

The Ulbricht sphere and goniometer are used to determine the light fluxes and luminous intensities of the HELLA bulbs.

All the aforementioned tests and the forms of light measurement require technical capacity that can only be found in HELLA production plants.

■ Emergency Set **See page 35**

■ LED Miniature bulbs **See page 36**

■ Bulbs for Motorcycles **See page 54**

PERFORMANCE

Our bulbs are establishing new reference points for halogen lighting, making driving safer and more pleasant, providing a beam of light with greater intensity compared to HELLA Standard bulbs. The opaque silver lid offers an elegant look in the clear glass headlights

■ High Performance 2.0 **See page 46**

■ +50 **See page 47**

LONG LIFE

HELLA Long Life halogen bulbs have a long service life up to 2 times longer than HELLA standard bulbs and are more environmentally friendly, as they do not have to be replaced frequently. Provides an optimal value for your money and the best selection for frequent travelers.

HEAVY DUTY / DOUBLE POWER

Double power of 24V produces the light by means of a single filament. Heavy duty bulbs offer more power, more safety, without dazzling traffic.

The double power reduces costs by increasing the life of up to 100%.

- Heavy Duty See page 51
- Double Power See page 51

HIGH WATTAGE

It offers more light, with double brightness compared to HELLA standard halogen bulbs and greater luminous efficiency, its Special filament guarantees safety and relaxed driving in off-road conditions.

Note: Take into account that due to the high wattage it can generate on heating the wiring of the headlight.

See page 50

DESIGN

Our design bulbs meet special requirements regarding design and safety. The xenon-like effect makes whiter light the correct alternative for design-oriented drivers. Our range of products:

**NEW
4300 K & 5000K**

Mercury Free

With a color temperature of 4300K, twice as bright as halogen bulbs and with about three times their luminous efficiency, the white light of these new generation xenon bulbs ensures safety and relaxed driving.

The new HELLA XENON +30 bulbs have a color temperature of up to 5000K, which rivals white LED daytime running lights, offer maximum illumination and visibility similar to daylight. With a low power consumption of 35W, resistance to vibrations and a long service life.

LONG LIFE

The special design of Long Life bulbs for passenger cars guarantees a longer service life, more light performance and reduced energy consumption, making them ideal for frequent drivers and permanent use of daytime running lights. Long Life represents bright but glare-free light. Good performance under extreme conditions for construction machinery or off-road vehicles.

Long Life combines unusual sturdiness and vibration resistance with convincing brightness and long service life.

Features:

- Up to 200% longer life time than HELLA standard bulbs.
- Special mixture of halogen gases to achieve high durability and increase life time
- Meets global standard (ECE R37 & SAE/DOT regulation).
- Color temperature 3,200 K

HELLA has the most complete line of lighting for cars, trucks, buses and now for motorcycles, scooters, mopeds and ATVs.

As original equipment, HELLA is found in most of the car manufacturers, this means that we guarantee 100% light according to the technical standards, offering a long life and in perfect harmony with the whole vehicle. In addition, HELLA halogen bulbs have a UV filter that protects the headlight lens by blocking UV rays, which prevents yellowing of the lens.
