

# 尺寸:70x78mm

## INSTALLATION GUIDE

[www.szedup.com](http://www.szedup.com)

customer\_support@edup.cn

Two ways for driver installation: [via CD](#) or [online driver](#)

The official link of driver:

<http://www.szedup.com/support/driver-download/>

### 1.How to find the model number ?

There is a product barcode on the back of product box where you can find the model number.  
(e.g. Model:EP-1607,the number is 1607)

### 2. How to find the driver online ?

Input the model number in search box and search. (e.g. 1607)

## How to use?

**Step 1.** Please insert the CD or USB flash disk and open the file step by step as picture below.

**Step 2.** Without installing the drive, you can't use the WiFi adapter.  
(Note: if there is no CD slot in your computer, please download the driver from [www.szedup.com](http://www.szedup.com))

**Step 3.** How to access your network on different windows systems ?

For Windows 7 Users - page 2

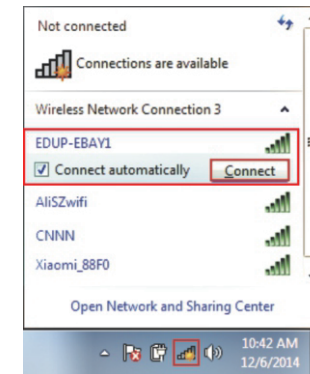

For Windows 10 Users - page 4

For Windows XP Users - page 5

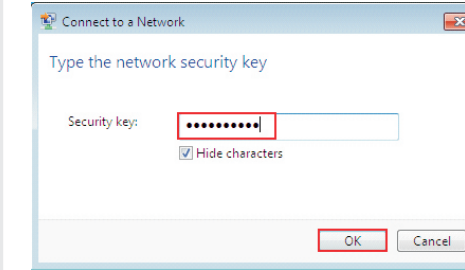

For MAC OSX Users - page 6

## For Windows 7 Users

1. Click this icon in the bottom-right corner of your Windows 7 computer, click your WiFi network to connect.  
(Note: Check "Connect automatically") (E.g. "EDUP - EBAY 1")

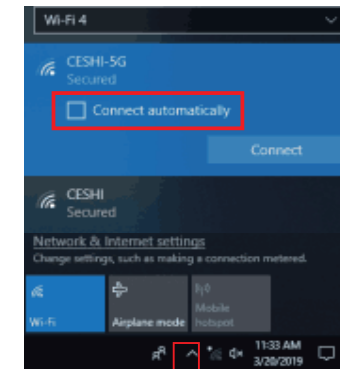

2. Please follow the picture to input the WiFi password, and click "OK", and then internet is connected as below.

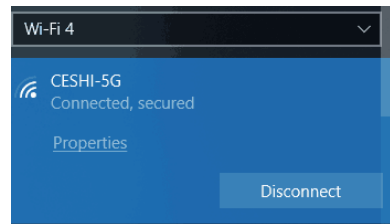

## For Windows 10 Users

1. Click this icon in the bottom-right corner of your Windows 10 computer, click your WiFi network to connect.  
(Note: Check "Connect automatically") (E.g. "CESHI-5G")

2. Please follow the picture to input the WiFi password, and click "✓", and then internet is connected as below.

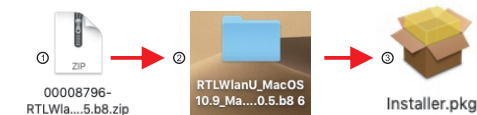

## For Windows XP Users

3. Click this icon in the bottom-right corner of your Windows XP computer, find your own WiFi from all available WiFi list, click your WiFi network to connect.

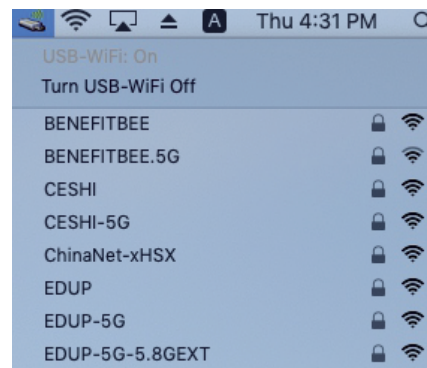

4. Input the WiFi password, and click "✓", and then icon means that internet is connected successfully.

## For MAC OSX Users

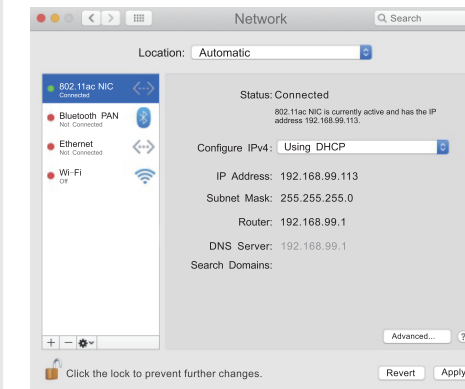

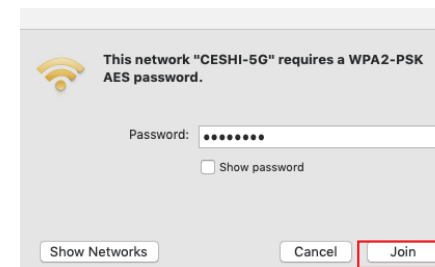

1. Unzip the driver for MAC OS, and then open the files as below.  
Then there will be an driver icon showing up in the upper right corner of your MAC OSX computer.

2. Click this icon and find your WiFi (E.g. "CESHI-5G") to click "Join" for connecting from all available wifi list.

3. Then this icon means that internet is connected successfully.

## Q&A

**Q1:** if there is no CD player, or any external installment problem, could the WiFi adapter be working?

**A1:** Sure, according to the model in the white sticker of package, you can download the driver from EDUP website: <http://www.szedup.com/>

**Q2:** If I click the icon but I can't search any WiFi on my Mac system, how to fix it?

**A2:** Please click the "system preferences" - Click the "Security & privacy" - Choose "APP Store and identified developers"
