- 1 Choose the installation location and pay attention to the difference between the main unit and the bottom of the hook part, to ensure the retractable clothesline remains level.

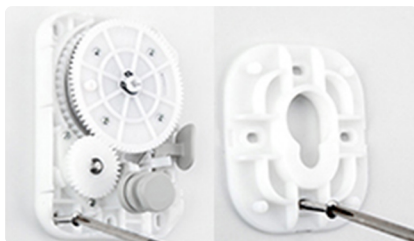

- 2 Mark the position of the desired holes.

- 3 Drill a pilot hole at each of the marked points.

- 4 Hammer in the plastic wall plugs.

- 5 Fasten both to the wall with screws as shown.

- 6 Place the outer cover on top to finish the installation.

CAUTION: Make sure to hold the line tight to avoid potential damage or injury.

- 1 The clothesline can be pulled out only when the lock switch is open.

- 2 Once you have the clothesline inserted into the slot on the hook part of the GorillaLine, close the lock switch.
