

USER GUIDE

Q: How can the Sleeve Stars ankle brace help me?

It can reduce pain and pressure caused by Plantar fasciitis, arthritis, sprains, swelling, tendonitis, injuries and surgery.

Q: What is included in the package?

For a 1-pack order, the package includes one sleeve and one strap. For a 2-pack order, the package includes two sleeves and two straps. For each package ordered, you will also receive a measuring band and a booklet containing guides, services, and instructions.

Q: Should the ankle brace be tight or loose?

It should be snug for support but not too tight to cut off circulation or cause discomfort.

Q: Can I wear shoes with the ankle brace?

Yes, our ankle brace has been designed to provide support while remaining thin enough to comfortably fit in your shoe. We advise against using additional foot support products, such as gel pads, with this ankle brace.

Q: What should I do if the fit isn't right?

Measuring your feet is crucial in achieving significant compression with our ankle brace. Therefore, we have included a measuring band in your package so that you can double-check. Even though we have many satisfied customers (10,000+ 5-star reviews), due to differences in human anatomy, some customers don't get the perfect fit.

Too big? Too small? Not suitable for you? Give us a chance to fix it! Please get in touch with our friendly team by sending us an email to support@sleevestars.com.
